- **Power supply:** 100-240 VAC, 50/60 Hz

Product highlights

Three-disc changer for WMA/MP3-CD

40-preset digital tuning

3-step Dynamic Bass Boost

Digital Sound Control

Digital Sound Control offers you a choice of preset Jazz, Rock, Pop and Classical controls you can use to optimise the frequency ranges for different musical styles. Each mode uses graphic equalizing technology to automatically adjust the sound balance and enhance the most important sound frequencies in your chosen music style. Ultimately, Digital Sound Control makes it easy for you get the most out of your music by precisely adjusting the sound balance to match the type of music you are playing.

60 hours of WMA-MP3-CD music

USB Rip-All

With this smart feature you can easily listen to the music content of your portable MP3 player on your Hi-Fi system. Simply rip karaoke tunes and other desired music content from CDs, radio programmes or line-in music from your system directly to your USB device. Store your favourite cassette tapes and convert their content into MP3 format - without using a PC. You can also preset a timer recording of your favourite radio show on your system and it will automatically record the show onto your USB device.

Karaoke

The Karaoke feature on your DVD player provides endless entertainment and maximum audio and singing enjoyment. You can enhance your performance by adding an "echo" effect to your voice. The key controls allow you to choose the optimal key for your personal vocal range.

MAX Sound

MAX Sound technology produces an instant boost in the bass, maximising volume performance and instantly creating the most impressive listening experience with just the touch of a button. Its sophisticated electronic circuitry calibrates existing sound and volume settings, instantly boosting the bass and volume to maximum levels, without distortion. The end result is a noticeable amplification of both sound spectrum and volume and a powerful audio boost that will add mileage to any music.
