- **Product weight:** 0.030 kg

Power

- **Batteries included**
- **Battery type:** AAA / LR03 Alkaline
- **Playtime on external battery:** Up to 8 hours

SA1107/02

Product highlights

USB mass storage device

USB mass storage devices offer a convenient way to save, backup and move your files around. The devices connect to your computer using a USB connection and do not require any special software to be installed (only Windows 98 and Me need drivers). The device automatically shows up as a removable drive in Windows Explorer allowing you to simply drag and drop files to and from the device.

Folder Browsing

You have a lot of music on your player and you want to find the right song, fast. Folder Browsing is a quick shortcut to finding and playing your music. Organize your music into folders on your PC. Give the folders any name you like, you might use the artist's or album's name. Then drag and drop the folders to your device in Windows Explorer. When you're listening to your player, you can zoom to the songs by holding the next or previous key to see folder names scrolling across one by one. Release the button when you see the folder you're looking for and the first song will start to play.
