Product highlights

Wireless PC Music Link

Stream music from your PC to your audio system in high quality. Listen on your audio system to music files stored on the PC. Select songs from your music collection according to artist, album or genre.

Browse music

Browse, select and play music from your music collection on your PC. The remote control gives you direct interactive access to the PC music you want to play on the audio system.

Internet music

Add more radio stations to your current audio system by connecting directly via your broadband Internet connection to the Internet Radio Station.

40 Free Radio Stations

Use your broadband internet connection to access one of the 40 pre-programmed internet radio stations. Upgrade your existing audio system with new internet radio stations.

Music processing

The digital music is sent in digital format to your music receiver and processed via the digital sound processor to give the best sound quality on your audio system.

Robust wireless connection

The wireless standard means that no wires need to be installed between your PC and consumer electronics devices. The wireless standard ensures a robust and secure connection with optimal bandwidth availability for high-quality sound transmission.

WMA-DRM and MP3 support

Store your music collection and downloaded songs on your PC in one of the many supported audio formats. Then playback on your audio system. Playback of WMA, WMA-DRM and MP3 music formats is supported

Blue backlight LCD

Local blue backlight LCD display facilitates easy navigation through your music collection.

Goodbye cables

A 2.4 GHz wireless link between the receiver and transmitter means you don't have to lay cables or drill holes through walls.

PC upgradeable

The product is capable of benefiting from new and improved functionality via software upgrades. Check via the broadband internet connection for the availability of new software versions. You can easily decide if you want to upgrade and enjoy even more features. Stay up-to-date with new and improved product functionality via the website and upload it using the software supplied.
