For Your Safety

Read this manual carefully to ensure proper use of the product and to avoid any danger or physical damage.

WARNING Failing to heed the product instructions may cause serious injury.

Product Use

Improper use can result in explosion, fire or electric shock.

Do not disassemble, repair or modify this product on your own.

Do not get the product wet or drop it in water.
If the product gets wet, do not switch it on. Contact a Service Center.

Do not place the product in damp, dusty or sooty areas, as it could result in fire or electric shock.

Do not leave the player in areas above 35°C(95°F) (such as a sauna or inside a parked car).
During hot weather, the temperature inside a car may rise up to 80°C(176°F).

To avoid hearing damage

Avoid using your player at high volume levels, as it may result in permanent hearing damage.
If you experience ringing in your ears while using the earphones, remove the earphones immediately and/or lower the volume.

To avoid a risk of traffic accident

Do not use the earphones while you are driving a bicycle, automobile or motorcycle.
It can cause a serious accident and furthermore, is prohibited by law in some areas.
Using the earphones while walking, in particular, on a crosswalk, can lead to a serious accident.

Take care not to tangle the earphone cable around your arms or neighboring objects while driving, working out or walking, as it could result in a car accident or other injuries.

⚠ CAUTION Failure to follow all instructions lead to physical injuries or damage to the product.

Product Use

Take care to avoid product malfunction and physical damage.

When wearing the product around your neck, take care not to exert excessive force on the neck string.

Backup Important Data

Be sure to backup important data.
Please be aware that we claim no responsibility for damage from data loss due to breakdown, repair or other causes.

To avoid malfunction

Do not cause excessive impact on the product by dropping it. Do not place heavy objects on top of the product.

Prevent any foreign particles or dust from entering into the product.

Always use the accessories provided by or approved by Samsung.

Do not spray water on the product. Never clean the product with chemical substances such as benzene or thinner, as it may cause fire, electric shock or deteriorate the surface.

Do not place the product near magnetic objects, as it may cause a malfunction.

Charging the battery

Fully charge the rechargeable battery before using the player for the first time or when it has not been used for a while.
1 Connect the USB cable to the USB port (⟁) on your PC.

2 Connect the other end of the USB cable to the USB Connection Port on the bottom of the player.

- When connected with the USB cable, it takes about 4 hours for the player to fully charge although this may vary depending on your PC environment.

Battery Use

- Recharge and store within the temperature range of 5°C~35°C(40°F~95°F).

- Do not overcharge (longer than 12 hours). Excessive charging or discharging may shorten the battery's life.

- Battery life naturally shortens slowly over time.

Screen Display
- Charging...
- Fully Charged

NOTE
- If you are charging the player while it is connected to your Notebook, make sure the Notebook's battery is also fully charged.

Basic Use

Turning the Power On & Off

Turning the Power On
Press and hold the [►II/⏻] button

- Power is turned on.

Turning the Power Off
Press and hold the [►II/⏻] button

- Power is turned off.

✎
NOTE
- Power is automatically turned off when none of the buttons have been pressed for a preset period of time (Default: 1 minute) in the pause mode. ► Page 61

Playing Music
1 Press the [∧ ∨] button to select <Music> and then press the [⠿] button.

2 Press the [∧ ∨ ⟨ ⟩] button to select the desired music file.

3 Press the [⠿] button.

- The music file will begin playing.

✎
NOTE
- Press the [⠿] button to move to the sub menu.
- Press the [BACK] button to move to the previous screen.

Volume Control

Press the [⌃ ⌄] button.

- You will see a volume control icon.

- Press the ⌃ button to increase the volume or the ⌄ button to decrease it.

Lock Function
In Hold mode, all buttons are disabled. This function is useful when you are walking or jogging.

1 Push the [HOLD] switch in the direction of the arrow.

2 Push the [HOLD] switch in the opposite direction of the arrow to release the Lock function.

Basic Use (Continued)

Searching for Files with <File Browser>

Search easily for files using the <File Browser> function.

1 Press the [∧ ∨] button to select <File Browser>.

2 Press the [⦂⦂⦂] button.
- The <File Browser> folder list containing Music, Text, Pictures and Video appears.

3 Press the [∧ ∨] button to select a folder of your choice.

4 Press the [⦂⦂⦂] button to bring up the file list in the selected folder.
- Use the [〈] button to return to the previous step.

5 Press the [∧ ∨] button to select a file of your choice.

6 Press the [⦂⦂⦂] button.
- The selected file will start playing.

Reset Function
If a product malfunction occurs, you can re-initialize the system.

Press and hold the [MENU] and [A ↔ B/ ●] buttons at the same time.

- The system will be initialized.
- Your settings and files will not be affected.

Before you start! Insert the installation CD provided with the player into the CD-ROM drive of your PC.

1 Click <Install now>.
2 Click <NEXT>.
- Media Studio installation starts.
- An icon is created on the desktop after installation is complete and Media Studio starts.

Connecting to your PC

Before you start! Use the USB Cable provided when connecting the player to your PC.
1 **Connect the larger end of the USB cable to the USB Connection Port on the bottom of the player.**

2 **Connect the USB cable to the USB port (ψ) on your PC.**
- <USB Connected> appears on the screen display of the player.

> **CAUTION**
> - If you connect the player through a USB hub, the connection may be unstable. Please connect the player to the computer directly.

PC Requirements

For use in conjunction with your PC, the following is required:

- **Pentium 300MHz or higher**
- **USB Port 2.0**
- **Windows XP Service Pack 2 or higher**
- **DirectX 9.0 or higher**

- **100MB of free hard disc space**
- **CD Rom Drive (2X or higher)**
- **Windows Media Player 10.0 or higher**
- **Resolution 1024 X 768 or higher**

Media Studio enables you to select and organize files and folders in preparation for transfer to your player.
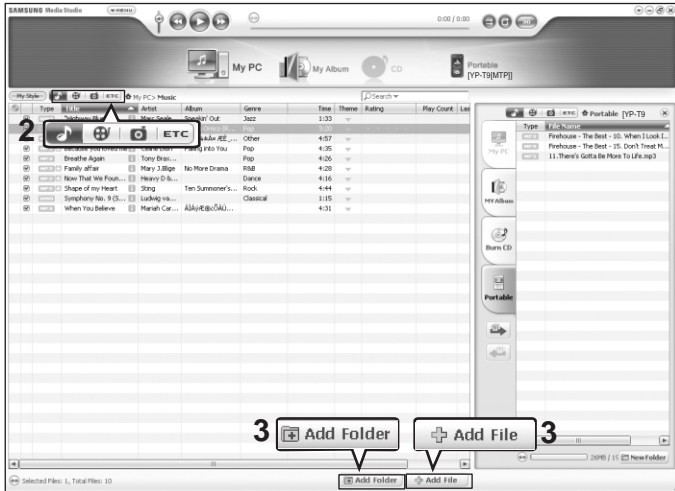

Please refer to Help for more information on how to use Media Studio.

■ Click <MENU> → <Help> → <Help> from the menu on the top of the Media Studio program.

Before you start! ■ Connect the player to your PC.
■ Media Studio must be installed on your PC.

1 Media Studio will automatically start when the player is connected to your PC.

■ If the program does not start automatically, double Click the Media Studio icon on the desktop.

2 Click the desired file icon.

■ Choose the file type you want to transfer by clicking on one of these icons.

■ Click ♪ icon to display music list.   ■ Click ⊕ icon to display video list.

■ Click 📷 icon to display photo list.

■ Click ETC icon to display etc list. The ETC list includes file types (ex: TXT, XOV, etc) other than music, photo, and video files.

To add folders to Media Studio

3 Click <Add Folder> on the bottom of Media Studio.

■ The Open Folder window will appear.

4 Select the folder from your PC to add and click <OK>.

■ The selected folder is added to the list on the left side of the Media Studio Screen.
To add files to Media Studio

3 Click <Add File> on the bottom of Media Studio.

■ The Open window will appear.

4 Select the files from your PC to add and click <Open>.

■ The selected files are added to the list.

19
Perform the following steps to transfer files from your PC to the player.

Portable window
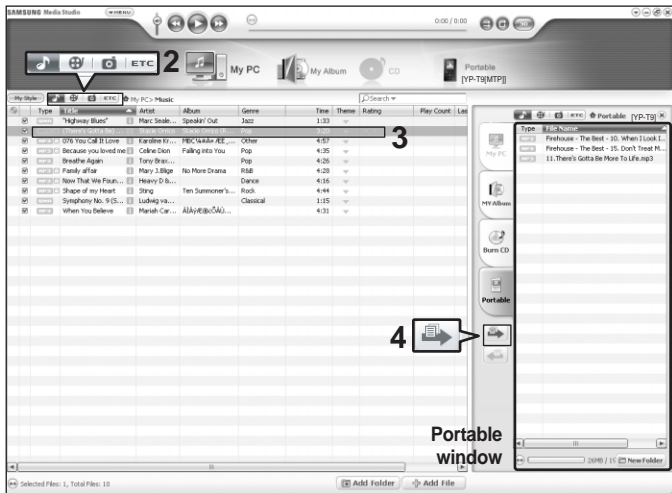

NOTE

- Music recognition technology and related data are provided by Gracenote and Gracenote CDDB® Music Recognition Service℠.

- CDDB is a registered trademark of Gracenote. The Gracenote logo and logotype, the Gracenote CDDB logo and logotype, and the "Powered by Gracenote CDDB" logo are trademarks of Gracenote. Music Recognition Service and MRS are service marks of Gracenote.

Before you start!
- Connect the player to your PC.
- Media Studio must be installed on your PC.

1 Media Studio will automatically start when the player is connected to your PC.

- If the program does not start automatically, double click the Media Studio icon on the desktop.

2 Click the desired file icon.

- Choose the file type you want to transfer by clicking on one of these icons.
- Click ♪ icon to display music list.   ■ Click ⊕ icon to display video list.
- Click 📷 icon to display photo list.
- Click ETC icon to display etc list. The ETC list includes file types (ex: TXT, XOV, etc) other than music, photo, and video files.

3 Select the file to transfer in the left file list.

4 Click 🔁 icon.

- The selected file is transferred to the player.

⚠ **CAUTION**
- Do not disconnect the USB cable during file transfer. This may cause damage to the player or your PC.

✎ **NOTE**
- When transferring a photo or video file to the player using <Media Studio>, it is automatically converted into JPG(photo) or SVI(video) format before transfer. The file size is automatically adjusted, too.
- You can't transfer a file on the player to your PC by using Media Studio.
- If you want to view a text file in the <File Browser> → <Text> folder in your player, select the <Text> folder from ETC of <Media Studio> and transfer the file into it.

21

Before you start! Connect the earphones, then turn on the player, and check the battery.

■ <Playlists> : To play by Playlist

NOTE

■ MP3 and WMA music files are compatible with this player.
■ MP1 or MP2 files which have a changed extension to MP3 may not play on the player.
■ If you press the [⠿] button in Music mode, the "S" mark appears on the screen and the Street mode is set to On. Press [⠿] again to make the "S" mark disappear and set the Street mode to off. ▶ Page 59
■ Press and hold the [BACK] button to move to the main menu.
■ **What is an ID3-Tag?**
  This is what is attached to an MP3 to carry information relevant to the file, such as the title, artist, album, year, genre and a comment field.

22

To Pause

1 **Press the [►II/⏻] button while the music is playing.**
- The music playback will be paused.

2 **Press the [►II/⏻] button again.**
- The music will play from the point where it stopped.

To search within a track

1 **Press and hold the [〈 〉] button while the selected track is playing.**
- It searches to the beginning or the end of the track.

2 **Release the button at the point you wish to start.**
- It starts playing from the point you release the button.

To Play from the beginning of the current track

Press the [〈] button after 5 seconds of play.

■ The current track starts playing from the beginning.

To play the previous/next track

Press the [〈] button within 5 seconds of play.

■ The previous track will start playing.

Press the [〉] button.

■ The next track will start playing.

!
CAUTION

■ When playing VBR files, the previous track may not play even if you press the **[〈]** button within 5 seconds of the play.

Section Repeat
This function enables you to listen to specific parts of a track repeatedly.
Recommended for language learning.

To set a section to repeat

1 **Play a file of your choice.**

2 **Press the [A ↔ B/ ●] button at the beginning of the section you want to repeat.**

- The starting point is set and <A ↔ > will appear in the screen display window.

3 **Press the [A ↔ B/ ●] button again to set the ending of the section you want to repeat.**

- <A ↔ B> will appear on the screen and the specified section starts to play repeatedly.

To cancel the section repeat

Press the [A ↔ B/ ●] button again during Section Repeat.

- Section Repeat will be canceled.

2,3

NOTE
- You can set the start and end points of the section repeat only within a single file.

A playlist is a list of your favorite songs.
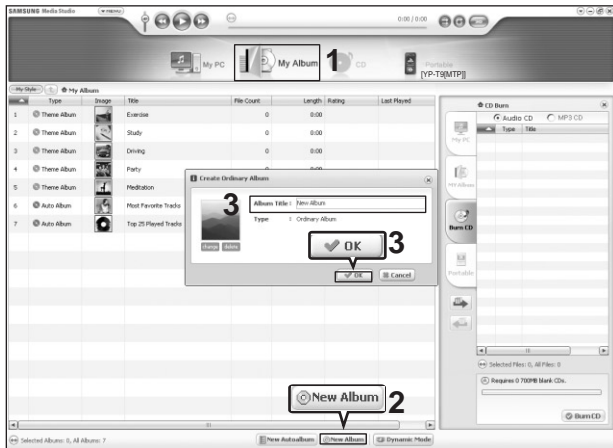

1 **Click <My Album> on the top of Media Studio.**
- The <My Album> window appears.

2 **Click <New Album> on the bottom.**
- The Creation window appears.

3 **Type in the album title and click <OK>.**
- A new album (playlist) will be created and stored in the My Album section of Media Studio on your computer.

Adding Music files to a Playlist
1 **Click <My PC> on the top of Media Studio.**
   - The My PC window appears. Click on <To Album> to the right.

2 **Click <My Album> in the right corner of the window.**
   - The My Album window appears.

3 **Double click on a desired album in the right window.**

4 **Select files that you want to transfer in the <My PC> window.**

5 **Click ▣ icon.**
   - The selected files will be added to the album (playlist).

✎ **NOTE**
   ■ A maximum of 999 playlists transferred to the player can be played.

Exporting a Playlist to your Player Using Media Studio

1 **Click <My Album> on the top of Media Studio.**
   - The My Album window appears.

3 **Press the [∧ ∨] button to select the desired text viewer color.**
 ■ Select either <Auto> <Blue> <Green> <Orange> <Pink> or <Purple>.
 ■ Selecting <Auto> will set the viewer color to the same as the main menu.

Before you start! Connect the earphones, then turn on the player, and check the battery.

Press the [∧ ∨] button to select <FM Radio> and then press the [⦂⦂⦂] button.

■ FM radio reception will start.

To use Mute function

Press [►❚❚/⏻] button during listening to FM radio.

■ Sound is muted.
■ Press [►❚❚/⏻] button once again to sound back.

NOTE

■ Press and hold the [BACK] button to move to the main menu.

To automatically search for frequencies
MONO   MANUAL

87.5 MHz

Auto Searching...

1 **Press the [∧ ∨] button to select <FM Radio>, then press the [::::] button to select <MANUAL>.**

■ You will see <MANUAL> in the top right corner.

2 **Press and hold the [〈 〉] button and then release.**

■ The frequency nearest from the point the button is released will be searched.

NOTE
■ To scan for an incoming frequency, select <MANUAL>. To listen to a memorized frequency, select <PRESET>.
■ To switch from <PRESET> to Manual mode, press [MENU] and use the [∧ ∨] button to select <Go to Manual Mode> and press the [::::] button. You will switch to <MANUAL> mode.
■ To switch from <MANUAL> mode to Preset mode, press [MENU] and use the [∧ ∨] button to select <Go to Preset Mode> and press the [::::] button. You will switch to <PRESET> mode.

To manually search for frequencies

MONO   MANUAL

87.5 MHz

FM

1 **Press the [∧ ∨] button to select <FM Radio>, then press the [::::] button to select <MANUAL>.**

■ You will see <MANUAL> in the top right corner.

2 **Press the [〈 〉] button.**

■ Moves to frequencies whenever the button is pressed.

CAUTION
■ Always connect your earphones to the player when searching or setting frequencies. The earphones are used as antennas to receive FM radio reception.

■ In poor reception areas, the player may not be able to scan any frequencies.

48

To automatically preset frequencies

1 Press the [MENU] button in FM Radio mode.

2 Press the [$\wedge\vee$] button to select <Auto Preset> and then press the [::::] button.

■ The Auto Preset Confirm window will appear.

3 Press the [$\langle\ \rangle$] button to select <Yes> and then press the [::::] button.

■ The <Auto Preset> window will appear and up to 30 frequencies will be set automatically.

To cancel during setting

To cancel the <Auto Preset> setting, press the [::::] button.

■ The auto preset setting is canceled and frequencies set up to then are stored.

NOTE

■ If <Auto Preset> is selected after presets have already been made, the existing presets will be deleted.

49

To manually preset frequencies
1 Press the [∧ ∨] button to select <FM Radio>, then press the [⦂⦂⦂] button to select <MANUAL>.

■ You will see <MANUAL> in the top right corner.

2 Press the [‹ ›] button to select the desired frequency to preset.

3 Press the [A ↔ B/●] button.

■ <ADD> blinks before the preset number appears.

4 Press the [‹ ›] button to select the desired preset number at the bottom of the screen and press the [⦂⦂⦂] button.

■ The selected frequency is set as a preset number.

NOTE
■ You can also set the preset frequency by pressing [MENU] to select <Add to Preset> in <MANUAL> mode.
■ If you set an identical frequency, you will see <Same frequency exists. Save?>. Press the [‹ ›] button to select <Yes> or <No> and press the [⦂⦂⦂] button.

To search for frequencies in PRESET mode

Once presets are set, the unit will automatically be in Preset mode when FM Radio mode is selected.
1 Press the [∧ ∨] button to select <FM Radio>, then press the [⦂⦂⦂] button to select <PRESET>.

■ You will see <PRESET> in the top right corner.

2 Press the [‹ ›] button.

■ The preset number is selected and you can listen to the stored radio frequency.

NOTE
■ If no frequencies were preset, <No preset> will appear and you cannot switch to <PRESET> mode.
■ To switch between Manual and Preset modes when listening to the FM Radio, simply press the [⦂⦂⦂] button.

50

Before you start! ■ Follow the steps below to delete frequencies while listening to FM radio.

1 **Press the [∧ ∨] button to select <FM Radio>, then press the [⦂⦂⦂] button to select <PRESET>.**

   ■ You will see <PRESET> in the top right corner.

2 **Press the [A ↔ B/●] button.**

   ■ <DELETE> blinks.

3 **Press the [‹ ›] button to select the frequency that you want to remove from the PRESET list and press the [⦂⦂⦂] button.**

   ■ The Delete Preset window will appear.

4 **Press the [‹ ›] button to select <Yes> and press the [⦂⦂⦂] button.**

   ■ The selected preset number will be deleted.
   ■ If you don't want to delete the preset number, select <NO>.

NOTE

■ You can also remove the preset frequency by pressing [MENU] to select <Delete Preset> in <PRESET> mode.

Using FM Radio menu

To set FM region

1 **Press the [MENU] button in FM Radio mode.**

2 **Press the [∧ ∨] button to select <FM Region> and then press the [⠿] button.**

- The FM Region menu appears.

3 **Press the [∧ ∨] button to select the FM Region and then press the [⠿] button.**

- You can select from <Korea/US> <Japan> <Other Countries>.

NOTE
- Frequency range by region
  - Korea/US: Search for FM frequencies in 100 kHz increments between 87.5 MHz~108.0 MHz.
  - Japan: Search for FM frequencies in 100 kHz increments between 76.0 MHz~108.0 MHz.
  - Other Countries: Search for FM frequencies in 50 kHz increments between 87.50 MHz~108.00 MHz.
- If you change the FM region, the previously stored radio frequencies are removed.

To set FM sensitivity
1 **Press the [MENU] button in FM Radio mode.**

2 **Press the [∧ ∨] button to select <FM Sensitivity> and then press the [⠿] button.**

- The FM Sensitivity menu appears.

3 **Press the [∧ ∨] button to select the search level and then press the [⠿] button.**

- You can select from <High> <Middle> and <Low>.
- The higher FM Sensitivity is, the more frequencies can be received.

Recording

Recordings can be made of your voice or FM broadcasts.
1 Press the [∧ ∨] button to select <Record> and then press the [⋮⋮⋮] button.

■ Then, press the [MENU] button and use the [∧ ∨] and [⋮⋮⋮] buttons to set your recording options.

2 Press the [∧ ∨] button to select the desired recording mode and press the [⋮⋮⋮] button.

■ The appropriate window appears.

3 Press the [A ↔ B/●] button.

■ Recording starts and the file name is displayed.

■ <Record Voice>: you can make a voice recording.
■ <Record FM Radio>: you can record the FM radio broadcast you're currently listening to, or you can use the [‹ ›] button to select a desired frequency.
■ <Recorded Files>: you can listen to voice recording and FM radio recording.

To stop recording

1 Press the [A ↔ B/●] button while in recording.

■ You will see a message that prompts you to confirm your choice.

2 Press the [‹ ›] button to select <Yes> or <No> and press the [⋮⋮⋮] button.

■ <Yes> will play the just recorded file.
■ <No> will not play the just recorded file.
■ After the recorded file plays back, the 'Save the recording file?' message appears.

3 Press the [‹ ›] button to select <Yes> and press the [⋮⋮⋮] button.

■ The recorded file is stored in the <File Browser> → <Recorded>.

NOTE
■ Press and hold the [BACK] button to move to the main menu.

Below are other ways to make Voice or FM broadcast recordings.

To make a voice recording

You can make a voice recording at any time.

Press and hold the [A ↔ B/ ●] button.

■ Recording is started with displaying the file name to save.

To record FM radio broadcasting

You can record FM radio broadcasts.

In FM Radio mode, press and hold the [A ↔ B/ ●] button.

■ An automatically created file name appears and the recording starts.

NOTE
■ Do not place the microphone too close or too far away during recording, as this can affect the recording quality.
■ Voice recording does not perform properly when the battery is low.
■ You can make a voice recording for up to 69 hours (based on 32Kbps, 1GB)

54

File names during recording

1 **During recording, a recording file name is automatically generated.**
The file name contains the type (V or F), month (mm), date (dd), hour (hh),
minutes (mm) and seconds (ss).

2 **The recording type is as follows;**
- Voice - V
- Radio – F (FM)

3 **For example, the file name "V0801103020" indicates a voice recording was**
made 10 o'clock 30 minutes 20 seconds on August 1st.

NOTE
- To listen to saved recording files, use the <File Browser> function. ▶ Page 14
- For more information on recording, see the recording setting section on page 60.
- You can set or store a maximum of 999 files for each of voice and FM radio recording.

55

Game

Game

You can enjoy BaseBall and Pizza Delivery games.

Before you start! ■ Connect the earphones, then turn on the player, and check the battery.
1 Press the [∧ ∨] button to select <Game> and then press the [⠿] button.
  ■ The Game menu appears.

2 Press the [∧ ∨] button to select the desired game and then press the [⠿] button.

1,2

■ The games bundled with the player may be added or changed without notice.

NOTE ■ Press and hold the [BACK] button to move to the main menu.

BaseBall

This game provides you with animated players, and simulates the feel of a baseball stadium.

- Press the [∧ ∨ ⟨ ⟩] button to select a menu or function.
- Press the [⠿] button to pitch or hit the ball.

Pizza Deliver

The goal of this game is to deliver pizza on a motor bike while dodging obstacles on the road.

- Press the [⠿] button to make the motorbike jump to avoid obstacles.

Setting Music
You can set detailed settings for music playback.
```
■ 11:11 PM                    [    ]

        Settings

 ♫ Music                  >
 ● Record

 ▯ System
```

1 Press the [∧ ∨] button to select <Settings> and then press the [⠿] button.

■ The Settings menu appears.

2 Press the [∧ ∨] button to select <Music> and then press the [⠿] button.

■ The Music menu appears.

3 Use the [∧ ∨ ‹ ›] and [⠿] buttons to set the desired functions

---

NOTE

■ Button functions to use during setting.
- Press the [‹] button to move to the previous item.
- Press the [›] button to move to the next item.
- Press the [∧ ∨] button to move up or down through the current menu.
- Press the [⠿] button to select or save the menu.
■ Press and hold the [BACK] button to move to the main menu.
■ If you do not press any buttons for approximately 1 minute in the Settings screen, settings will be canceled and the player will return to the last function you were using.

- **<Street mode>:** Allows you to enjoy the music outdoors more clearly.
  You can select either <On> or <Off>.

- **<DNSe> :** You can select a suitable sound for each music genre. Select either <3D-User>
  <3D-Studio> <3D-Stage> <3D-Club> <Normal> <Rock> <House> <Dance> <Jazz> <Ballad>
  <Rhythm & Blues> <Classical> or <User EQ>.

- **<3D User Set> :** Sets 3D sound effect and bass enhancement.
  3D can be set between 0~5 levels, and Bass Enhance between 0~3 levels.
  After you set <3D User Set>, you can select <3D User> in <DNSe>.

- **<User EQ Set> :** You can directly select a sound frequency to adjust (EQ). After you set
  <User EQ Set>, you can select <User EQ> in <DNSe>.

- **<Play Mode> :** Select playback mode such as repeat settings.
  Select from <Normal> <Repeat > <Repeat One> and <Shuffle>.

- **<Play Speed> :** Adjust the playback speed of music/voice recordings.
  Select either <-3> <-2> <-1> <0>(Normal) <+1> <+2> <+3>. (The higher the number is, the
  faster the playback speed is.)

- **<Skip Interval> :** Set the playback interval within a track when you press the [❮ ❯] button during
  playback. Select either <1 Track> <3 sec> <5 sec> <7 sec> <10 sec> <30 sec> or <1 min>.

- For a VBR file, the Skip Interval may not be exact.

NOTE
- **What is DNSe?**
  DNSe is a sound effect function for MP3 players developed by Samsung and consists of 3D and Street
  modes. The 3D adds a stereophonic sound effect to the music and the Street mode provides an automatic
  volume control function that amplifies quiet sounds in noisy street environments.

Chapter 4. Settings

Setting Music

✎
NOTE
- The supported languages can be changed or added.
- **What is ID3-Tag?**
  This is what is attached to an MP3 to carry information relevant to the file, such as the title, artist, album, year, genre and a comment field.

Setting System
You can set the booting mode, resume and button sound.
1 Press the [∧ ∨] button to select <Settings> and then press the [::::] button.

■ The Settings menu appears.

**2** Press the [∧ ∨] button to select <System> and then press the [::::] button.

■ The System menu appears.

3 Use the [∧ ∨ 〈 〉] and [::::] buttons to set the desired functions

- **<Booting Mode>** : You can set the start window after the system reboots. Select either <Main Menu> or <Last Played>. If you set <Last Played>, the function last used will come up when you turn the player back on.

- **<Resume>** : Specifies the starting point to restart playback after playback is stopped. If set to <Off>, the last file will play from the beginning. If set to <On>, the last file will play from the point it was previously stopped.

- **<Button Sound>** : Sets the beep sound for button operations to on or off. Select either <On> or <Off>.

- **<Volume Limit>** : You can avoid hearing damage by setting the volume limit when using earphones. <On> will limit the maximum volume level up to 20. The maximum volume level when Volume Limit is set to <Off> is 40.

- **<Default Set>** : Returns all settings to the default value. Select from <Yes> and <No>. ▶ Page 66

- **<Memory>** : Indicates the remaining memory capacity. <Used> indicates the usage, <Available> indicates the remaining capacity and <Total> indicates the total memory capacity.

- **<Firmware Version>** : Displays the current firmware version.
Default Set

Press the [〈 〉] button to select either <Yes> or <No> and then press the [⠿] button.

- <Yes> : Initializes all settings to default (original factory settings).
- <No> : Cancels default settings.

✎ ■ **Regarding the Built-In Memory**

NOTE The actual built-in memory available is slightly less than indicated as the internal firmware uses a portion of the memory.

Troubleshooting

Problem	Check points & Troubleshooting
Power will not turn on.	■ Power will not turn on if the battery is fully discharged. Recharge the battery and turn the power on again. ■ Press and hold the [MENU] and [A ⇌ B/ ●] buttons at the same time to reset the system.
Buttons do not work.	■ Check if the [HOLD] switch is in the direction of the arrow position. ■ Check if you pressed the right button, then press again. ■ Press and hold the [MENU] and [A ⇌ B/ ●] buttons at the same time to reset the system.
The screen will not turn on.	■ The screen may not be visible under direct sunlight. ■ When <LCD Off> is selected from <Settings> → <Display>, the LCD will be turned off. Press any button and see if it turns on.
Power is turning off.	The power is automatically turned off when the battery is fully discharged. Recharge the battery.
Battery life differs from what is stated in the Manual.	■ The battery time may vary, depending on the sound mode and display setting. ■ Product life may be shortened when left for extended periods in low or high temperatures.
Program Malfunction	Please check if your PC requirements are met.
Connection to your PC is disabled.	Press <Start> on the toolbar of your PC to run Windows Update. Select Key Updates and Service Packs, then update all. Reboot your PC and reconnect.
The file transfer rate is too low.	If you are running multiple programs including Media Studio on your PC, the file transfer rate will be low. Make sure to exit unnecessary programs before proceeding.

Troubleshooting (Continued)

Problem	Check points & Troubleshooting
Playing is disabled.	■ Check if the available file has been saved in the memory. ■ Check if the music file is damaged. ■ Check if there is enough battery power.
File upload is disabled.	■ Check if the USB cable is securely connected. Reconnect if necessary. ■ Check if the memory is full. ■ Press and hold the [MENU] and [A ↔ B/●] buttons at the same time to reset the system.
Files or Data are Missing.	Check if the USB cable has been disconnected during file or data transmission. If this is the case, it may cause serious damage not only to files/data but also to the product. You have to be extra cautious as Samsung cannot be held responsible for data loss.
Abnormal Play Time Display during Play.	Check if the file is in VBR (Variable Bit Rate) format.
Abnormal Display of File Name.	Move to <Settings> → <Language> → <ID3 Tag> in the Menu screen and set an appropriate language.
The product is hot.	Heat may be generated during recharging. This has no effect on the product life or functions.
A downloaded video does not play and a message pops up.	Try to download the movie clip through Media Studio again.

Menu Tree You can quickly view the menu structure.

Built-in Battery Power		740 mAh
File	Compatibility	AUDIO: MPEG1/2/2.5 Layer3(8kbps~320kbps, 8kHz~48kHz), WMA(5kbps~320kbps,8kHz~48kHz) Video: SVI (Video: MPEG4, Audio: MP3 (44.1kHZ, 128kbps), Resolution: 208X176, Frame Rate: 15fps) Image: JPG (Progressive, Sequential Scanning, File Size: less than 3MB)
Supported Number of folders and Files		Folder: Max. 500, File: Max. 5000(Include folder)
Earphone Output		20mW (16Ω)
Output Frequency Range		20Hz~20KHz
Noise Ratio		85 dB with 20kHz LPF(based on 1KHz 0 dB)
Play Time		Maximum of 30 hours for music playback (based on: MP3 128kbps, Volume: 20, Normal Mode), Maximum of 6 hours for video playback
Temperature Range for Operation		-5~35 °C (23~95°F)
Case		Plastic
Weight		1.73 oz
Dimension (WxHxD)		1.67 X 3.27 X 0.43 inches

FM Radio	FM Frequency	87.5~108.0MHz	FM T.H.D	1%
	FM Signal to Noise Ratio	55dB	FM Useable Sensitiivity	10dBμ

License

The product unit accompanying this user manual is licensed under certain intellectual property rights of certain third parties. In particular, this product is licensed under the following US patents : 5,991,715, 5,740,317, 4,972,484, 5,214,678, 5,323,396, 5,539,829, 5,606,618, 5,530,655, 5,777,992, 6,289,308, 5,610,985, 5,481,643, 5,544,247, 5,960,037, 6,023,490, 5,878,080, and under US Published Patent Application No. 2001-44713-A1.

This license is limited to private non-commercial use by end-user consumers for licensed contents. No rights are granted for commercial use. The license does not cover any product unit other than this product unit and the license does not extend to any unli-censed product unit or process conforming to ISO/IEC 11172-3 or ISO/IEC 13818-3 used or sold in combination with this product unit. The license only covers the use of this product unit to encode and/or decode audio files conforming to the ISO/IEC 11172-3 or ISO/IEC 13818-3. No rights are granted under this license for product features or func-tions that do not conform to the ISO/IEC 11172-3 or ISO/IEC 13818-3.

Safety Information

FCC

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Caution: Any changes or modifications in construction of this device which are not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.
This equipment generates, uses and can radiate radio frequency ener-gy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications, However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the inter-ference by one or more of the following measures:

◆ Reorient or relocate the receiving antenna.

◆ Increase the separation between the equipment and receiver.

◆ Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.

◆ Consult the dealer or an experienced radio/TV technician for help.

FCC

Any changes or modifications not expressly approved by the grantee of this device could void the user's authority to operate the device.

Compliance

This product conforms to the following Council Directive:

◆ Directive 89/336/EEC, 92/31/EEC(EMC)

Declaration of Conformity

Name: Samsung Electronics Co., Ltd
Address: 416, Maetan-3Dong, Yeongtong-Gu, Suwon City, Kyungki-Do, Korea 442-742 declares under its sole responsibility that the product
Trade Name: Samsung Electronics Co., Ltd
Model Number: YP-T9
has been tested according to the FCC/CISPR22/95 requirements for Class B devices and found compliant with the following standards

EMI/EMC: FCC Part 15 Subpart B

This device complies with part 15 of the FCC Rules.

Operation is subject to the following two conditions:

1.This device may not cause harmful interference, and

2.This device must accept any interference received, including interference that may cause undesirable operation.
