

From its modern design to the modern features this is the clock that sets itself!

It features an automatic tuning system that scans and programs local radio stations to memory. The synchronized analog clock allows for quick reading. This clock receives time updates from the atomic clock in Boulder, Colorado. With the ability to set 2 different alarm times throughout the week. This could mean no more forgetting to turn on the alarm Sunday, and no getting bothered by alarms on Saturday!

This is by far the last alarm clock radio you will ever need.
