

iCDMIX2

DUAL CD PERFORMANCE SYSTEM WITH UNIVERSAL DOCK FOR IPOD

COMPLETE MIXING AND PLAYBACK FOR YOUR CDS AND IPOD IN A SINGLE UNIT.

iCDMIX 2 is the first CDMIX system to feature an integrated Universal Dock for iPod, enabling you to play music from virtually any docking iPod. iCDMIX 2 is designed for professional use, with a dual-deck CD player, complete three-channel mixer, and a host of professional features and technologies all housed in a rugged, metal chassis.

FEATURES

- Compact all-in-one dual CD player with mixer and iPod dock
- Anti-Shock™ buffered skip-protection technology
- Housed in a metal chassis for rugged, reliable performance
- Multifunction jog/shuttle wheels for search and pitch bend
- Seamless loops on both decks for creative performance
- Single, continuous, and programmable playback
- Fader Start automatically starts playback when you move the crossfader
- Three-channel mixer with dedicated iPod and mic channels, replaceable crossfader, and PFL cueing
- RCA inputs for connecting additional CD players or turntables with preamps
