

ServSwitch Micro USB

Switch between computers
from a single console with
a USB keyboard, USB mouse,
and VGA monitor.

FEATURES

- » Ideal for multimedia applications requiring frequent switching between computers.
- » All connections are self contained in a single cable for hassle-free setup.
- » Powered from the equipment interface. No external power supply is required.
- » Supports Microsoft® IntelliMouse®, Logitech FirstMouse+, MouseMan+, and similar mice.
- » Audio version enables you to listen to stereo audio from two applications using one set of multimedia speakers.
- » Superior digital video resolutions up to 1920 x 1440.
- » Plug-and-play monitor support.

OVERVIEW

The ServSwitch™ family of high-quality KVM switches continues to expand to fit your changing workstation requirements. Similar to the ultra-compact footprint of our popular ServSwitch Micro™, the ServSwitch Micro USB is designed for a workstation with a VGA video monitor and USB-style keyboard and mouse.

The ServSwitch Micro USB works a lot like a larger, full-featured ServSwitch to enable you to access two computers from a single shared monitor, keyboard, and mouse. Controlling computers couldn't be easier—you switch access to a computer with a simple hotkey command.

Video-enhancement technology provides you with sharp, clear video quality up to 1920 x 1440.

The ServSwitch Micro USB takes virtually no space at all. You can use it under the desk and eliminate clutter on your desktop. It features plug-and-play connections, so installing the switch is as easy as plugging in the KVM peripherals.

All connectors are embedded on a 6-foot (1.8-m) cable that links the computers to a KVM console. The console side of the cable features an HD15 connector and two USB ports for your mouse and keyboard; the other side has connectors for plugging into each computer (two HD15 video connectors and two USB mouse/keyboard connectors).

The audio version of the ServSwitch Micro USB also has two audio plugs for speakers on the console side and two audio jacks for connecting to the computers on the other side.

TECH SPECS

Cable Length to Computer — 6 ft. (1.8 m)

Resolution (Maximum) — 1920 x 1440

CE Approval — Yes

Connectors —

Console side:

Both: (1) HD15 F to shared monitor, (2) USB Type A F to shared keyboard/mouse;

Power — From the interface

Size — 1.9"H x 2.4"W x 0.8"D (4.8 x 6.1 x 2 cm) on a 6-ft. (1.8-m) integrated cable

Item	Code
ServSwitch Micro USB (2) USB Computers	KV407A
ServSwitch Micro USB with Audio (2) USB Computers	KV408A

Why Buy From Black Box? Exceptional Value. Exceptional Tech Support. Period.

Recognize any of these situations?

- You wait more than 30 minutes to get through to a vendor's tech support.
- The so-called "tech" can't help you or gives you the wrong answer.
- You don't have a purchase order number and the tech refuses to help you.
- It's 9 p.m. and you need help, but your vendor's tech support line is closed.

According to a survey by *Data Communications* magazine, 90% of network managers surveyed say that getting the technical support they need is extremely important when choosing a vendor. But even though network managers pay anywhere from 10 to 20% of their overall purchase price for a basic service and support contract, the technical support and service they receive falls far short of their expectations—and certainly isn't worth what they paid.

At Black Box, we guarantee the best value and the best support. You can even consult our Technical Support Experts before you buy if you need help selecting just the right component for your application.

Don't waste time and money—call Black Box today.
