### Description

Tripp Lite expands its line of hard drive cables with the introduction of our new line of Serial ATA cables. The signal cables connect any high speed Serial ATA device to a Serial ATA controller/motherboard with SATA connections. Serial ATA delivers two significant benefits: it support much higher data transfer rates (up to 3.0 Gbps...backward compatible to 1.5Gbps) and the narrow cable design helps improve internal air flow. Perfect for the desktop or server that has multiple drives. These cables feature 7-pin straight/7-pin straight female connectors and offer easy installation. Tripp Lite warrants this product to be free from defects in materials and workmanship for life.
