

USB Home PhoneLine 1Mbps Network Adapter

The **USB Home PhoneLine 1Mbps Network Adapter** is fully compatible with the Universal Serial Bus functionality built in Windows 98. It enables the instant connectivity to multiple PCs over a home's existing telephone lines. You can share network-enabled printers, transfer files between computers, play network games, and moreover - no switches, hubs, or even any additional cables is needed. The network runs on standard home-grade-telephone wires just like the ones you use everyday. Plus, it doesn't interfere with your normal phone use.
