

USB Flash Disk

The X-Disk is a removable flash disk drive with USB connection and can support up to 512MB disk space, which is 355 pieces of 1.44MB floppy disk. The X-Disk is USB 2.0 compliant and is a plug-and-play device, you just simply plug it into any USB port and it will be automatically detected by the operating system as a removable drive. Now you can read, write, copy, delete and move data from your hard disk drive to the X-Disk and vice versa.

Features

- USB specification revision 2.0 compliant.
- Capacity available in **64MB, 128MB, 256MB and 512MB.**
- Supports Windows 98 / 98 SE with device driver
- Supports Linux Kernel version 2.4.0 or above **with no** device driver needed.
- Supports Windows ME, Windows 2000 and Windows XP **with no** device driver needed.
- Supports MAC OS8.6 or above **with no** device driver needed.
- With LED indicator.
- Security function.
- Hot Plug & Play - Enable you to install anytime.
- Durable solid-state storage – data retention for at least 10 years.
- No external power is required - DC 4.5V ~ 5.5V from USB port.
- Power consumption < 100 mA when in use.

Specification:

| | |
|-------------------|---|
| Capacity | 64MB ~ 512MB |
| USB Port | Comply with USB2.0 spec, Max Speed @ 480Mbps |
| Transfer Rate | 940KB/s for Read Mode; 648KB/s for Write Mode |
| Power Supply | 5V DC, supplied by USB port |
| Operating System | Supports Windows 98/ 98SE/ 2000/ME/XP, Linux kernel 2.4.0 or later and Mac 8.6 or later |
| Power Consumption | 82mA@3.3V |
| Dimension | 62mm x17.5mm x5.5mm (L x W x H) |
| Weight | 12g |
