**INSTALL SOFTWARE**

Digi Device Setup Wizard

**Welcome to the Digi Device Setup Wizard**
This wizard will guide you through the initial device installation.

This wizard will discover your device on the network, help you to set it up for your application scenario, and save the configuration to the device.

Before you continue, make sure

● The device is connected and powered up as described in the Quick Start Guide.
● You have the MAC address of the device available. The MAC address is located on the white label on the bottom or back of the device.

● Welcome
● Discover Device
● Configure Device
● Save Settings
● Finished!

To continue, click Next.

Next >

Digi Device Setup Wizard

**Congratulations!**
You have successfully completed the Digi Device Setup Wizard.

● Welcome
● Discover Device
● Configure Device
● Save Settings
● Finished!

ⓘ **Saved configuration successfully.**

Go to the PortServer TS 16   web interface for manual configuration.
To access the web interface, check the "Log on to web interface" checkbox below and click Finish, or go to http://192.168.2.2.

The username and default password are:
Username: root
Password: dbps

Additional information such as cabling and configuration information as well as troubleshooting tips may be found in the User's Guide.

☑ Register my PortServer TS 4 W on the Digi website
☑ Log on to web interface

To close this wizard, click Finish.

< Back          Finish
