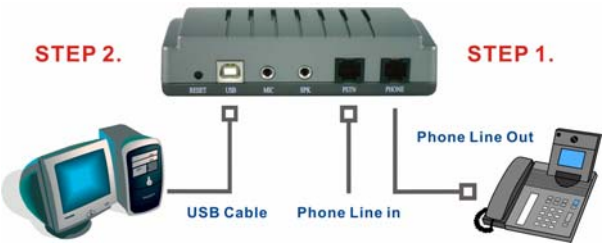
1.2. Install Skype Gateway Box

Step 1.
Connect RJ-11 phone line and USB cable as diagram.



Step 2.
Connect the USB cable to the PC. Windows will start installing the Skype Gateway Box driver automatically.

If the driver installation is ready, The LED will change from "Ready" to Green.

1.3 Install Middleware

Step 1.
Insert the “Driver & Utility CD” in to your CD-ROM drive, the system will auto run the middleware installation program.

Step 2.
Click “**Middleware**” then select “**Click To Setup**”, and the PC will start installing step by step. The system will create an icon of Middleware.

Step4.
Check the Installation Status. If the Skype Gateway Box is ready, then the Middleware icon will be with colored, if Skype Gateway Box is not ready or Skype is not running, the icon will remain grey.

***Please make sure that Skype was running on your PC.**
***Other special applications please check the manual CD.**

3. Using Skype Gateway Box

3.1 Call Contact by Speed-Dial

1. Pick up Handset. (Hear Dial Tone Generated from PSTN)
2. Press the ＊ key to switch Skype mode. (Hear Dial Tone Generated from Middleware)
3. Dial speed-dial number. (Eg: 88)
4. Press the ＊ key to call.
   EX: John's Speed-Dial Number is "88", Dial "88＊" to make a Skype Call.

3.2 Call with Skype Out

1. Pick up handset. (Hear Dial Tone Generated from PSTN)
2. Press the ＊ key to switch Skype mode. (Hear Dial Tone Generated from Middleware)
3. Dial the number
   (Format: 00 + Country Code + City Code + Local Phone or Cell Phone Number)
4. Press ＊ key to call.
   EX: Hong Kong Number : 852-87654321, Dial 0085287654321＊

3.3 Call a Regular Phone

1. Pick up the handset. (Hear Dial Tone Generated from PSTN)
2. Dial Phone Number.

Note: Please check the user's manual in CD for more info.
