CPM200

Table Mountable MAAP Bay for Three MAAPs

Shown with optional MAAPs

FEATURES

- · Accepts up to three single-space MAAP Mini Architectural Adapter Plates
- · Connector bay installs in a tabletop or other flat surface
- · Adjustable MAAP mounting carriage
- · For applications using both active and passive MAAPs
- · Adjustable brackets accommodate tabletop thickness from 0.5" (1.3 cm) to 2.5" (6.3 cm)
- · Cable management tie points included on the bottom edge of the unit
- · Custom engraving available to label individual MAAPs
- · Captive cable kits with one to three cable holes and grommets for video, audio, or data cables available
- · Black finish

DESCRIPTION

The Extron CPM200 is a compact MAAP bay that can be easily mounted into virtually any furniture surface - tabletop, lectern, instructor's station - providing easy access to cables and A/V connection points. The CPM200 accepts up to three single-space MAAPs to help create a custom MAAP bay optimized for each application. Active and passive MAAPs are available and sold separately. Active MAAPs include VGA line drivers, audio buffers, twisted pair transmitters and receivers, and AC power outlet modules. Passive MAAPs include video, audio, phone, data, and control connectors. Custom engraving to label individual MAAPs is available at an additional charge.

The CPM200 offers cable management via tie points on the bottom of the enclosure. These tie points simplify captive cable installations by allowing the creation of cable loops when used with the optional Captive Cable Kits.

The CPM200 features an adjustable modular connector carriage that may be installed in either an upper or a lower position. In the upper position, the modular connector panel is recessed 1" below the top lid. This position is ideal for applications using both active and passive MAAPs. In the lower position, the modular connector panel is recessed 2.5" below the top lid. This position is ideal for installations where cables will be permanently installed in the connector bay and pulled out as needed. The CPM200 is available with a black finish.

SPECIFICATIONS

GENERAL

Rack mount No, but furniture mountable Enclosure type Metal **Enclosure dimensions**

CAUTION: Refer to the surface cutout dimensions here before cutting a hole in the furniture or other surface. Pay special attention to the direction the unit will face; the unit's MAAP and connector access side is <u>underlined</u>. Extron is not responsible for miscut mounting holes.
