SuperTooth II

USER GUIDE

PH: 1300 669 049 (AUS) PH: 0800 443 122 (NZ)

www.blueant.com.au

OVERVIEW

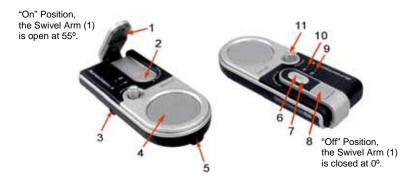

The SuperTooth II is equipped with Bluetooth Technology and a Digital Signal Processor which allow wireless communications on devices such as Mobile phones, Smartphones and PDA's.

It is designed to be a totally portable wireless handsfree kit which will enable the user to communicate freely without holding a phone. The Supertooth II will work with any Bluetooth cellular phones available provided that they respect the Bluetooth Protocol.

Don't forget: Drive safely and within the law.

Essentially the new laws mean that if you have to use a mobile phone while driving a vehicle, then you must use some form of handsfree device.

GETTING STARTED

VEHICLE PLACEMENT

The optimum place to position the Supertooth II in the vehicle is on the sun visor. The Supertooth II sun visor clip is designed to be reversible to easily transfer the Handsfree Kit in case you change the position of the sun visor.

Fix the metal clip of SuperTooth II to the sun visor.

Attach the magnetic back of SuperTooth II to the fixed metal clip. The Supertooth II must be placed wherein its microphone is directed to the mouth of the user.

The position of the Supertooth II can vary according to the position of the sun visor. The Swivel Arm can be adjusted to 0° , 55° and 210° orientations.

CHARGING THE SUPERTOOTH II

SuperTooth II can be charged in a car using the SuperTooth II Car Charger or at home using the Wall charger.

 Connect the charger's plug into the Charger Input of SUPERTOOTH II.

Charge Indicator Status:

- Red = Low battery
- Steady Green = Fully charged
- Alternate Red/Green = indicates charging

2. When fully charged, disconnect the charger.

Bluetooth Indicator Status:

Blinking Blue = standby (when Swivel Arm is open to 55° to 210° positions).

TURNING ON/OFF THE SUPERTOOTH II

To turn SuperTooth II on, just flip up the Swivel Arm at 55° to 210° positions.
The Bluetooth indicator will glow (blue blink). This indicates that the kit is ready (standby mode).

Note: Before using this car kit, the user must pair the SuperTooth II with his phone (refer to PROCEDURE OF PAIRING TO THE MOBILE PHONE).

 To turn SuperTooth II off, just flip down the Swivel Arm to 0° position. The Bluetooth Indicator will become red then will turn off after a second.

- 2. Wall Charger
- 3. Car Charger
- 4. Earpiece Headset

BLUETOOTH PAIRING PROFILES

IMPORTANT NOTICE!!!

You must establish the correct Bluetooth Pairing Mode for your mobile phone before connecting. If your handset is not listed on the next page, look in your phones manual to find the right Bluetooth Profile to use.

Alternatively, call the Blueant Customer Support Team or visit www.blueant.com.au for more information.

Note: Most newly released phones use the Bluetooth Handsfree Profile.

Does your phone use HEADSET or HANDSFREE Bluetooth Profile?

EXAMPLE PROCEDURE FOR PAIRING TO A MOBILE PHONE

- Pairing to your phone is not possible while charging the Supertooth.
- First, refer to the Compatibility Table above for suggested pairing modes to determine what pairing mode is best for your phone.
- Pairing will create a link or connection between the two Bluetooth devices, SuperTooth II and your phone.
- This kit supports either Handsfree or Headset pairing.
- The Handsfree and Headset pairing procedures are different.
- When you are certain of what pairing mode to use, proceed with the instructions on the following pages.

Please also see the index for each individual phone on page 16.

HANDSFREE pairing: (Example)

1. Bring the mobile phone to about 20cm from SuperTooth II.

 The Supertooth II is initially off. Turn it on by flipping up the Swivel Arm to the 55° position. The Bluetooth Indicator will glow (blue blink).

- Simultaneously press the Reject Button and the Pick-Up/Hang-Up Button for about 10 seconds. A distinctive tone will be heard and the Bluetooth Indicator LED will change from blinking blue to alternate blinking red and blue. SuperTooth II is now in Handsfree Pairing Mode.
- 4. While the kit is in pairing mode, access the Bluetooth menu of your phone. (Kindly refer to your phone's manual.) Turn on its Bluetooth function then execute a Bluetooth search so that it will be able to search and find your Supertooth II. When the phone displays the list of the Bluetooth devices it has found, select the name of this kit (Supertooth II).
- 5. When the phone asks for a passcode, enter "0000".
- 6. Pairing is successful if the alternating red/blue lights of Bluetooth Indicator will stop and then change to plain blinking blue. Normally, the phone would also show briefly on its display if it's already paired and connected to SuperTooth II or if pairing has failed.

Note: If pairing has failed, repeat the procedure. If pairing has succeeded, then your SuperTooth II kit is now ready to use. You can now make or answer a call using your kit instead of your phone.

HEADSET Pairing: (Example)

1. Bring the mobile phone to about 20cm from the Supertooth II.

 SuperTooth II is initially off. Turn it on by flipping up the Swivel Arm to 55° position. The Bluetooth Indicator will glow (blue blink).

 Simultaneously press the Reject Button and Pick-Up/Hang-Up Button for about 10seconds. A distinctive tone will be heard and The Bluetooth indicator LED will change from blinking blue to alternate blinking red and blue.

 Press the *Pick-Up/Hang-Up Button* again. Press shortly (release immediately). Bluetooth indicator blinking will be faster. The Supertooth II is now in Headset Pairing Mode.

- 5. While the kit is in pairing mode, access the Bluetooth menu of your phone. (Kindly refer to your phone's manual.) Turn on its Bluetooth function then execute a Bluetooth search so that it will be able to search and find your Supertooth II. When the phone displays the list of the Bluetooth devices it found, select the name of this kit (Supertooth II).
- 6. When the phone asks for a passcode, enter "0000".
- Pairing is successful if the alternating red/blue lights of **Bluetooth Indicator**will stop and then change to plain blinking blue. Normally, the phone would
 also show briefly on its display if it's already paired and connected to
 SuperTooth II or if pairing with it failed.

Note: If pairing has failed, repeat the procedure. If pairing succeeded, then your SuperTooth II kit is now ready to use. You can now make or answer a call using your kit instead of your phone.

Important Remarks:

- On some versions of Nokia, Motorola, Sony Ericsson and Sharp phone software, the kit
 will not connect automatically to the cell phone until you do One press on the PickUp/Hang-Up Button of the Supertooth II to connect to the cell phone.
- If disconnection problem are encountered on some Nokia cell phones, kindly turn off the keypad tones of your cell phone.

MULTI-PAIRING

- You can pair 2 devices to the Supertooth II (Multi-Pairing). That is, the Supertooth II can remember connection information for two different devices and will connect with either when requested depending on which is in range and which was connected last.
- When Pairing a second mobile phone, make sure the first is off or out of range.
- You will overwrite the first paired device by pairing a third device to the Supertooth II. The pairing rule is... first in first out.
- If you cannot connect to a previously paired and connected phone, go to the Bluetooth menu in the phone and select the Supertooth II and Press Connect.. Some phones may require this if it is the second phone used. You do not have to repair the devices just manually connect..

MAKING/RECEIVING CALLS

ANSWERING A CALL

When the phone receives a call, a ring tone is heard on SuperTooth II and at the same time on the telephone (depending on your phone model).

- 1. Shortly press the Pick-Up/Hang-Up Button to answer the call.
- When communication is over, press the Pick-Up/Hang-Up Button to terminate the call.

MAKING A CALL USING THE SUPERTOOTH II

Normal dialing

 Enter the contact number and press send on the phone. Normally, audio will be on the kit.

Note: With some phones like Siemens S55; Panasonic X70, audio is always on the phone during an outgoing call. You will need to press Pick-Up/Hang-Up Button to transfer the audio to your kit.

When communication is over, press the Pick-Up/Hang-Up Button to terminate the call.

Voice dialing

First, you have to access the voice dialing function of your phone, turn it
on and record for a voice name or voice tag. (Kindly refer to this
procedure in your phone's manual.)

Note: Voice dialing entries must be stored in the phone's memory, not on the SIM card!

When done, execute voice dialing on your kit by proceeding with these instructions.

- 2. Shortly press Pick-Up/Hang-Up Button.
- A beep will then be heard on the Supertooth II prompting the user to say a voice name or voice tag of a person to call.
- 4. Say the name. The name will be played back to you (audio on kit). The phone will then place the call automatically.
- When communication is over, press the Pick-Up/Hang-Up Button to terminate the call.

Note: Voice Recognition and Car Kit performance is dependent on microphone positioning. Noisy environments can also affect voice recognition. Record your voice commands in a quiet environment.

Redialing (Handsfree profile only)

Make a long press on the **Pick-Up/Hang-Up Button**. Audio will be on the Supertooth II.

Audio Transfer

Kit to Phone

Flip down the **Swivel Arm** to 0° position (or turn-off the unit). This will automatically transfer the audio from the kit to the phone.

Phone to Kit

For Nokia Phones:

Flip up the **Swivel Arm** from 0° to 55° or 210° positions. This will automatically transfer the audio from phone to kit.

For Other Phone Models:

Flip the **Swivel Arm** up from 0° to 55° or 210° position (Turn-On the Kit). Then shortly press the Pick-Up/Hang-Up Button. The audio will be transferred from the phone to the kit.

Note: for some phones in **Headset mode**, Kit to Phone transfer must be done from the phones menu.

Rejecting a call (Handsfree Profile only)

Press Reject Button to reject an incoming call.

Note: For Headset profile, Call Reject must be done from the phone.

Setting the Volume of the Supertooth II

Set the volume using the Volume Control.

- Turn it clockwise to increase the volume.
- Turn it counterclockwise to decrease.

Note: If the volume knob on the Supertooth II is too high, it can cause feedback (Whistling sound), echo, or background noise during calls on some cell phones.

Setting the Volume of the Mobile Phone

Volume levels on most phones are **set automatically** to optimum levels when you connect your Supertooth II.

VOLUME LEVELS – Finding The Right Balance

- 1) The Supertooth II has a very powerful speaker that is designed to boost low level voice signals if required. Use the Volume Control Knob to turn down levels if too much signal is present and distortion or echo occurs. The Supertooth II sounds best when it is loud enough to cut through to be heard without becoming too loud and distorting.
- 2) In your phone, **set up a Sounds Profile** with lower ringing volumes and keypad tones and activate when using with Supertooth II. Some phones can automatically activate a desired profile when connecting to Car Kit and Headset Accessories (see your phone's user manual for instructions on using and activating Profiles).
- 3) Altering the position of the SuperTooth II so that the microphone is directly in front of your mouth increases the microphone signal level.

ADDITIONAL INFORMATION

Phone Profiles (different to Bluetooth Profiles)

In your phone, set up a Sounds Profile with appropriate ringing volumes and keypad tones and activate when using with the Supertooth II. Some phones can automatically activate a desired profile when connecting to Car Kit or Headset Accessory (see your phone's user manual for instructions on using and activating Phone Profiles). Typical phone Profiles are General, Outdoor, Meeting, Silent.

Phone Software

Please make sure you have the latest firmware upgrade for your Phone especially if you are using a PDA Phone. Go to the support section of the relevant site to check you have the latest version. Many new pda phones require a Bluetooth patch to improve Bluetooth functionality from the original version.

Resetting Your Phone

As new phones become more like computers they become prone to software and memory issues which may cause bluetooth reconnection problems. This can be fixed simply by turning the phone off and back on again. The phone will be reset and the working memory cleared.

Leaving your phone on continually for weeks at a time can cause this to happen so we recommend you switch your phone off at least once a fortnight to avoid any problems. If you experience this problem regularly call your phone's manufacturer for a software upgrade at a service center. You may be able to do this online.

MANUALS FOR INDIVIDUAL MOBILE PHONES If your phone does not appear below, please use a manual for a phone does not appear below, please use a manual for a phone does not appear below.

If your phone does not appear below, please use a manual for a similar phone or use the Example Pairing procedure above. Also check the website for newly updated models and also for older outdated models. www.blueant.com.au

BLACKBERRY 7100v / 7100g / 7290 / 7250

Note: Please make sure you have the latest firmware upgrade for your Phone. Go to the support section of the relevant site to check you have the latest version. You may need to register your device to download updates.

For Blackberry go to www.blackberry.com

a. ACTIVATING THE BLUETOOTH

You must activate the Bluetooth feature of your device to establish a Bluetooth connection between your Pocket PC device and other Bluetooth devices.

- 1. Using the Jog wheel, scroll to Options, Press the Jog wheel button.
- 2. Scroll to Bluetooth, Press Jog. Press Jog again and again to select Enable Bluetooth
- 3. Press Jog and select Close

b. PAIRING TO THE CELLULAR PHONE (not possible while charging)

- 1. Bring your Phone to within about 20 cm from the Supertooth.
- The Supertooth II is initially off. Turn it on by flipping up the Swivel Arm to the 55° position. The Bluetooth Indicator will glow (blue blink).
- Simultaneously press the Reject Button and the Pick-Up/Hang-Up Button for about 10 seconds. A distinctive tone will be heard and the Bluetooth Indicator LED will change from blinking blue to alternate blinking red and blue. SuperTooth II is now in Handsfree Pairing Mode.
- 4. Using the Jog wheel, scroll to Options, Press the Jog wheel button.
- Select Bluetooth
- 6. Press Jog, Select Add Device
- Your device now searches for Bluetooth devices and displays them in the list.
- 7. Select the name of the device Supertooth, and then press Jog.
- 8. Enter "0000" as the PassKey and then press Jog.
- Make sure Supertooth is selected and press Jog. Scroll to Device Properties. Press Jog.
- 10. Scroll to Trusted, press Jog, select Change Option, scroll to Yes and press Jog.
- 11. Press Jog again and select Save.
- 12. Now Press Jog again and select Connect.
- 13. Tap ok, and then ⊗ to exit.

The Supertooth is paired with your Phone. An enabled Bluetooth icon will be seen on screen indicating that the Supertooth is linked with the Phone..

c. RECONNECTING TO THE SUPERTOOTH

After turning the Supertooth off, or going out of range, to reconnect just press the Pick-Up/Hang-Up button on the Supertooth Once.

d. ANSWERING/RECEIVING A CALL

When the phone is receiving a call, two dissimilar ring tones will be heard from the phone and then from the Supertooth.

 When answering is done on the Supertooth (that is, pressing Pick-Up/Hang-Up once), audio will be heard on it.

- When answering is done on the phone, ongoing call will be heard on the phone (not on the Supertooth). But if you wish to hear and transfer the audio to the Supertooth, just press the Pick-Up/Hang-Up button once on the Supertooth.
- To terminate the call, press down the Pick-Up/Hang-Up Button.

e. MAKING A CALL with the Supertooth on

Normal dialing

With your Device you can make a call using different methods. Please refer to your PC Phone's User Guide.

The most direct method is by using the Phone keypad.

- Press a keypad to bring up the dialer screen.
- 2. Press the number on the keypad, and then press the green call key.

Note: Audio will be heard directly on the Supertooth. At times, for first time dialing, audio will be heard on the phone and not immediately on the Supertooth. If this is the case you have to press once on the Pick-Up/Hang-Up Button to transfer the audio to the Kit.

3. To terminate the call, press down the Pick-Up/Hang-Up Button.

Redial

Calls the last number dialed from the phone.

1. Press and hold the Pick-Up/Hang-Up key on the Supertooth for 3 seconds.

f. AUDIO TRANSFER DURING A CALL

Kit to Phone

Flip down the **Swivel Arm** to 0° position (or turn-off the unit). This will automatically transfer the audio from the kit to the phone.

Phone to Kit

Flip the *Swivel Arm* up from 0° to 55° or 210° position (Turn-On the Kit). Then press shortly the Pick-Up/Hang-Up Button. The audio will be transferred from the phone to the kit."

Audio Transfer back to the Supertooth is done by pressing the Jog wheel and selecting Activate Supertooth

g. REJECTING A CALL

Rejecting a call can be done by selecting IGNORE on the phone or pressing the Reject button on the Supertooth II.

h. SETTING THE VOLUME

Setting the volume can be done using the Volume Control.

- Turn it clockwise to increase the volume.
- 2. Decrease the volume by turning it counter-clockwise.
- 3. Volume can also be adjusted using the phone's volume control.

Note: If the volume is too high, it can cause feedback (whistling sound), echo or background noise during calls on some cell phones.

IMATE POCKET PC / JAM

Note: Please make sure you have the latest firmware upgrade for your Phone. Go to the support section of the relevant site to check you have the latest version. You will need to register your device to download updates.

For Imate go to www.clubimate.com

a. ACTIVATING THE BLUETOOTH

You must activate the Bluetooth feature of your Imate to establish a Bluetooth connection between your Pocket PC device and other Bluetooth devices.

- 1. Tap 🥙. Scroll down to Settings. Tap Connections. Tap Bluetooth.
- 2. Select On and tap ok.
- Tap ⊗ to exit.

b. PAIRING TO THE CELLULAR PHONE

- 1. Bring your Imate to within about 20 cm from the Handsfree Kit.
- The Supertooth II is initially off. Turn it on by flipping up the Swivel Arm to the 55° position. The Bluetooth Indicator will glow (blue blink).
- Simultaneously press the Reject Button and the Pick-Up/Hang-Up Button for about 10 seconds. A distinctive tone will be heard and the Bluetooth Indicator LED will change from blinking blue to alternate blinking red and blue. SuperTooth II is now in Handsfree Pairing Mode.
- Press the Pick-Up/Hang-Up Button once again for a short time to access Headset Pairing Mode. The Supertooth is now in the correct pairing mode for the Imate . (most important)
- Tap . Scroll down to Settings. Tap Connections tab. Tap Bluetooth.
- 6. Tap Bonded Devices tab. Tap New.
 - Your device now searches for Bluetooth devices and displays them in the list.
- Tap the name of the device that you want to bond with your PC phone, and then tap Next.
- 8. Enter "0000" as the Device PIN and then tap Next.
- 9. Tap Finish. (Note: In Name, you may or may not edit the name of your bonded device).
- For the question, "This Bluetooth device supports headset profile, would you like to set it as your Blue tooth headset?", tap Yes.
- 11. Tap ok, and then ⊗ to exit.

The Handsfree Kit is paired with your Imate. An enabled Bluetooth icon will be seen on screen indicating that the Handsfree Kit is linked with the Imate.

c. ANSWERING/RECEIVING A CALL

When the phone is receiving a call, two dissimilar ring tones will be heard from the phone and then from the Handsfree Kit.

- When answering is done on the Handsfree Kit (that is, pressing Send once), audio will be heard on it.
- 2. When answering is done on the phone, ongoing call will be heard on the phone (not on the Handsfree Kit). But if you wish to hear and transfer the audio to the Handsfree Kit, just press the Send button once on the Supertooth.
- 3. To terminate the call, press down the Pick-Up/Hang-Up Button.

d. MAKING A CALL with the Handsfree Kit on

Normal dialing

With your Imate you can make a call using different methods. Please refer to your PC Phone's User Guide.

The most direct method is by using the Phone keypad.

- Press Sutton to bring up the dialer screen.
- 2. Tap the number on the keypad, and then tap Talk key.

Note: Audio will be heard directly on the Handsfree Kit. At times, for first time dialing, audio will be heard on the phone and not immediately on the Handsfree Kit. If this is the case you have to press once on the Send Button to transfer the audio to the Kit.

3. To terminate the call, press down the Pick-Up/Hang-Up Button.

e. AUDIO TRANSFER DURING A CALL

 Audio Transfer back to the Imate can be done by accessing the phone's Bluetooth Headset icon.

Phone to Kit

Flip the $\it Swivel Arm$ up from 0° to 55° or 210° position (Turn-On the Kit). Then press shortly the Pick-Up/Hang-Up Button.

f. REJECTING A CALL

Rejecting a call must be done by selecting *IGNORE* on the phone or by pressing the Reject Button on the Supertooth II

g. **SETTING THE VOLUME**

Setting the volume can be done using the Volume Control.

- Turn it clockwise to increase the volume.
- 2. Decrease the volume by turning it counter-clockwise.

Note: If the volume is too high, it can cause feedback (whistling sound), echo or background noise during calls on some cell phones.

Useful Information for Imate Pocket Pc

After pairing the Supertooth please make sure headphones are enabled on your Imate. Tap Start....Settings... Today....Items and tick Profile. (make sure profile is ticked). This creates a link so you can enable or disable the Supertooth. You will see a small headphone symbol on the main screen allowing you to connect or disconnect from the Supertooth quickly...

Note: The Imate Pocket Pc can only use one audio device, set as the default.

To use a second paired device with this phone, rename it and set it as the default.

IMATE PDA2k / PDA2K EV-DO

Note: Please make sure you have the latest firmware upgrade for your Phone. Go to the support section of the relevant site to check you have the latest version. You will need to register your device to download updates.

For Imate go to www.clubimate.com

a. ACTIVATING THE BLUETOOTH

You must activate the Bluetooth feature of your device to establish a Bluetooth connection between your Pocket PC device and other Bluetooth devices.

- 1. Tap the Bluetooth icon in the bottom right of your today screen.
- 2. Tap Turn Bluetooth ON

b. PAIRING TO THE CELLULAR PHONE (cannot pair while charging)

- 1. Bring your Phone to within about 20 cm from the Supertooth.
- The Supertooth II is initially off. Turn it on by flipping up the Swivel Arm to the 55° position. The Bluetooth Indicator will glow (blue blink).
- Simultaneously press the Reject Button and the Pick-Up/Hang-Up Button for about 10 seconds. A distinctive tone will be heard and the Bluetooth Indicator LED will change from blinking blue to alternate blinking red and blue. SuperTooth II is now in Handsfree Pairing Mode.
- 4. Tap the *Bluetooth icon* in the bottom right of your today screen.
- 5. Tap Bluetooth Manager
- 6. Tap New.
- 7. Tap Handsfree/Headset Setup...Tap Next
 - Your device now searches for Bluetooth devices and displays them in the list.
- 8. Select display 'All Devices'
- 9. Tap the name of the device, Supertooth, and then tap Next.
- 10. Enter "0000" as the Device PIN and then tap OK.
- 11. Tap Finish.
- For the question, "Do you want to set this device as the default Handsfree device", tap Yes.
- 13. Tap ok, and then ⊗ to exit.

The Supertooth is now paired with your Phone. An icon will be seen on screen indicating that the Supertooth is linked with the Phone..

c. ANSWERING/RECEIVING A CALL

When the phone is receiving a call, two dissimilar ring tones will be heard from the phone and then from the Supertooth.

- When answering is done on the Supertooth (that is, pressing Pick-Up/Hang-Up once), audio will be heard on it.
- When answering is done on the phone, ongoing call will be heard on the phone (not on the Supertooth). But if you wish to hear and transfer the audio to the Supertooth, just press the Pick-Up/Hang-Up button once on the Supertooth.
- 3. To terminate the call, press down the Pick-Up/Hang-Up Button.

d. MAKING A CALL with the Supertooth on

Normal dialing

With your Device you can make a call using different methods. Please refer to your PC Phone's User Guide.

The most direct method is by using the Phone keypad.

- Press Sutton to bring up the dialer screen.
- 2. Tap the number on the keypad, and then tap Talk key on your phone.

 Note: Audio will be heard directly on the Supertooth. At times, for first time dialing, audio will be heard on the phone and not immediately on the Supertooth. If this is the case you have to press once on the Pick-Up/Hang-Up Button to transfer the audio to the Kit.
- 3. To terminate the call, press down the Pick-Up/Hang-Up Button.

Redial

Calls the last number previously dialed from the phone.

Redialing must be done while in the Today screen.

1. Press and hold the Pick-Up/Hang-Up button on the Supertooth for 3 seconds.

e. AUDIO TRANSFER DURING A CALL

- Audio Transfer to the Supertooth is done by...

Kit to Phone

Flip down the **Swivel Arm** to 0° position (or turn-off the unit). This will automatically transfer the audio from the kit to the phone.

Phone to Kit

Flip the **Swivel Arm** up from 0° to 55° or 210° position (Turn-On the Kit). Then press shortly the Pick-Up/Hang-Up Button. The audio will be transferred from the phone to the kit."

f. REJECTING A CALL

Rejecting a call can be done by selecting *IGNORE* on the phone or pressing the *Reject* button on the Supertooth.

g. SETTING THE VOLUME

Setting the volume can be done using the Volume Control.

- Turn it clockwise to increase the volume.
- 2. Decrease the volume by turning it counter-clockwise.
- Volume can also be adjusted using the phone's volume control.

h. RECONNECTING

The latest Rom from I-mate does not support auto reconnect. To reconnect after turning the Supertooth back on or coming into range...

- Press the Pick-Up/Hang-Up button on the supertooth. Wait for the connection to happen. Then press Pick-Up/Hang-Up. OR
- 2. Go to the Bluetooth Manager Tap and Hold the Supertooth, select connect.

Note: If the volume is too high, it can cause feedback (whistling sound), echo or background noise during calls on some cell phones.

IMATE SP3/SP3i

Note: Please make sure you have the latest firmware upgrade for your Phone. Go to the support section of the relevant site to check you have the latest version. You will need to register your device to download updates.

For Imate go to www.clubimate.com

a. ACTIVATING THE BLUETOOTH

- 1. Select Start . Select Settings. Select Bluetooth. Select Bluetooth
- 2. Select On and tap ok.

b. PAIRING TO THE CELLULAR PHONE (not possible while charging)

- 1. Bring your phone to within about 20 cm from the Supertooth.
- The Supertooth II is initially off. Turn it on by flipping up the Swivel Arm to the 55° position. The Bluetooth Indicator will glow (blue blink).
- Simultaneously press the Reject Button and the Pick-Up/Hang-Up Button for about 10 seconds. A distinctive tone will be heard and the Bluetooth Indicator LED will change from blinking blue to alternate blinking red and blue. SuperTooth II is now in Handsfree Pairing Mode.
- 4. On your phone Select Start 2. Select Settings. Select Bluetooth. Select Bluetooth.
- 5. Select Menu...Select Devices... Select Menu...Select New.
- Your phone now searches for Bluetooth devices and will display them in the list.

 6. Scroll to the name of the device, *Supertooth*, and then press *Select*.
- 7. Enter "0000" as the PassKey and then tap Done.
- 8. Enter a Display Name and Press *Done*. Note: In *Name*, you may or may not edit the name of your bonded device).
- For the question, "Would you like to designate Supertooth as a handsfree device?", Select Yes.

The Supertooth is paired with your SP3. An enabled Bluetooth icon will be seen on screen indicating that the Supertooth is linked.

c. ANSWERING/RECEIVING A CALL

When the phone is receiving a call, two dissimilar ring tones will be heard from the phone and then from the Supertooth.

- When answering is done on the Supertooth (that is, pressing Pick-Up/Hang-Up once), audio will be heard on it.
- When answering is done on the phone, ongoing call will be heard on the phone (not on the Supertooth). But if you wish to hear and transfer the audio to the Supertooth, just press the Pick-Up/Hang-Up button once on the Supertooth.
- 3. To terminate the call, press down the Pick-Up/Hang-Up Button.

d. MAKING A CALL

Normal dialing

With your Phone you can make a call using different methods. Please refer to your PC Phone's User Guide.

The most direct method is by using the Phone keypad.

 Tap the number on the phone's keypad, and then press the <u>Talk</u> key on the phone.

Note: Audio will be heard directly on the Supertooth. At times, for first time dialing, audio will be heard on the phone and not immediately on the Supertooth. If this is the case you have to press once on the Pick-Up/Hang-Up Button to transfer the audio to the Kit.

2. To terminate the call, press down the Pick-Up/Hang-Up Button on either device.

Voice Dialing

Set up voice commands for each contact as per the Phone's user manual. To activate voice dialing...

- 1. Press the Pick-Up/Hang-Up button once on the Supertooth
- 2. When prompted by a beep, say the name you wish to call.

Redial

Calls the last number dialed from the phone.

1. Press and hold for 3 seconds the Pick-Up/Hang-Up key on the Supertooth.

e. AUDIO TRANSFER DURING A CALL

 Audio Transfer to the phone during a call can be done by accessing the phone's Menu and selecting *Turn Handsfree ON/OFF*.

Kit to Phone

Flip down the **Swivel Arm** to 0° position (or turn-off the unit). This will automatically transfer the audio from the kit to the phone.

Phone to Kit

Flip the **Swivel Arm** up from 0° to 55° or 210° position (Turn-On the Kit). Then press shortly the Pick-Up/Hang-Up Button. The audio will be transferred from the phone to the kit."

f. REJECTING A CALL

Rejecting a call can be done from the Phone by selecting *IGNORE* or from the Supertooth by pressing the *Reject button*.

Note: It is recommended to create a phone profile to use with the Supertooth. Configure phone volume and ring settings to suit your cars environment.

I-MATE SMARTPHONE 2

Note: Please make sure you have the latest firmware upgrade for your Phone. Go to the support section of the relevant site to check you have the latest version. You will need to register your device to download updates.

For Smartphone 2 go to www.clubimate.com

a. ACTIVATING THE BLUETOOTH

j. RECONNECTING SUPERTOOTH

After coming into range or turning Supertooth back on, Press the Pick-Up/Hang-Up key on the Supertooth once.

Additional Information

Some Motorola phones have a Power-Off Delay setting that is set to 15 minutes by default.

- To check if your phone has this setting
- 1. Press... Menu...Settings...Car Settings...
- 2. For Power-off delay set to 0 minutes...
- 3. For Charger Time set to Off...

NOKIA 6255/6230/6820/6650/6310/6310i

a. ACTIVATING THE BLUETOOTH

You must activate the Bluetooth feature of your cell phone to establish a Bluetooth connection between your mobile phone and other Bluetooth devices.

- Press Menu and select Settings, Connectivity and Bluetooth. (For 6310 Press Menu and select Bluetooth)
- Select Blue tooth on and On.
- Continue pressing Back then finally Exit.

b. PAIRING TO THE CELLULAR PHONE (not possible while charging the Handsfree Kit)

- 1. Bring the cellular phone at about 20 cm from the Handsfree Kit.
- The Supertooth II is initially off. Turn it on by flipping up the Swivel Arm to the 55° position. The Bluetooth Indicator will glow (blue blink).
- Simultaneously press the Reject Button and the Pick-Up/Hang-Up Button for about 10 seconds. A distinctive tone will be heard and the Bluetooth Indicator LED will change from blinking blue to alternate blinking red and blue. SuperTooth II is now in Handsfree Pairing Mode.
- 4. Press Menu and select Settings. Connectivity and Bluetooth.
- 5. Select Search for audio enhancements.
 - The phone now searches for Bluetooth devices to be paired. When the search is complete, it displays the names of the devices found.
- 6. Choose the device you want to pair with your phone, **Select**.
- 7. Enter "0000" as the passcode then press **ok**.
- Continue pressing Back then finally Exit.

The Handsfree Kit is paired and ready to use. An icon will be displayed during the standby mode indicating that the Handsfree Kit is linked with the phone.

- Once paired, keypad tones can be heard on the Handsfree Kit.
- Pairing is done only once. When the Handsfree Kit is turned off, then turned back on, it
 automatically connects to the cell phone. That is, when you have already activated the
 cell phone's Auto Accept Mode. (Kindly refer to "section c. AUTO ACCEPT MODE").
- When the paired device is deleted, it can still be viewed as an active device and not yet
 completely disconnected. Thus, there will still be simultaneous connection between your
 Handsfree Kit and cell phone even after deleting was done. But when you delete the
 pairing and at the same time, turn off your Handsfree Kit, you automatically disconnect
 the bond.
- When the paired device was deleted and the Handsfree Kit was turned off, no need to undergo the same pairing procedure. When you turn back on the Handsfree Kit, the phone displays a question, "Pair with?..." Press Accept, enter "0000" as the passcode and press ok.

c. AUTO ACCEPT MODE

The auto accept mode allows the Bluetooth function to be turned on automatically whenever the user starts sending information such as answering or making a call via the Handsfree Kit.

- 1. Press *Menu* and select *Settings*, *Connectivity* and *Bluetooth*.
- 2. Select Paired devices. Choose Supertooth and press Options.
- 3. Select Request conn. authorisation.
- 4. Select No.
- 5. Continue pressing *Back* then finally *Exit*.

d. ANSWERING/RECEIVING A CALL

When the phone is receiving a call, same ring tone will be heard simultaneously on the Handsfree Kit as well as on the phone.

- 1. Press once on the Pick-Up/Hang-Up Button to answer the call.
- End the call by pressing the Pick-Up/Hang-Up Button.

Note: Cell phone buttons can also be used to answer a call but audio will still be heard on the Handsfree Kit.

i. SETTING THE VOLUME

Setting the volume can be done during calls or every time a key is pressed on your cell phone.

- Turn it clockwise to increase the volume.
- Decrease the volume by turning it counter-clockwise.

Note: If the volume is too high, it can cause feedback (whistling sound), echo or background noise during calls. It is also possible to use the volume keys of the cellular phone to set the volume.

j. RECORDING FOR VOICE DIALING

Use your phone when recording voice dialing.

- Press the Menu \(\frac{1}{3} \) button. Scroll to Contacts and press \(\bigcirc \)
- 2. Find a contact name. Press button. (The contact number is the one being displayed.)
- Press Options button. Scroll to Add Voice tag, SELECT. Instructions appear. Your voice is automatically saved on the phone after being played back to you.
- In case you wish to change your recorded voice, press Options button. Voice tag, SELECT. Change, SELECT. Instructions appear.
- 5. Continue pressing Exit key to get out of Menu.

Note: Record your voice command in a quiet place so that only your voice will be recorded on the phone.

NOKIA 9500 / 9300

Note: Please make sure you have the latest firmware upgrade for your Phone. Go to the support section of the relevant site to check you have the latest version. You may need to register your device to download updates.

For Nokia 9500 go to www.nokia.com.au

a. ACTIVATING THE BLUETOOTH

You must activate the Bluetooth feature of your phone to establish a Bluetooth connection between your Pocket PC device and other Bluetooth devices.

- 1. Select Desk...Tools...Control Panel...Connections...Bluetooth...
- 2. Select the Settings page...Select Bluetooth Active...Select Yes

b. PAIRING TO THE CELLULAR PHONE (not possible while charging)

- 1. Bring your phone to within about 20 cm from the Supertooth.
- The Supertooth II is initially off. Turn it on by flipping up the Swivel Arm to the 55° position. The Bluetooth Indicator will glow (blue blink).
- Simultaneously press the Reject Button and the Pick-Up/Hang-Up Button for about 10 seconds. A distinctive tone will be heard and the Bluetooth Indicator LED will change from blinking blue to alternate blinking red and blue. SuperTooth II is now in Handsfree Pairing Mode.
- Select Desk...Tools...Control Panel...Connections...Bluetooth...
- Select Paired Devices...Press New... then Start to search for devices
 Your phone now searches for Bluetooth devices and will display them in the list.
- 6. Scroll to the name of the device, Supertooth, and then press Pair.
- 7. Enter "0000" as the Passcode and then press OK.
- 8. In Paired Devices select Supertooth and Press Edit.
- 9. Move to the Device Authorized field and select Yes.
- 10. In Paired Devices select Supertooth...Press Edit...Press Connect.

The Supertooth is paired with your Nokia 9500. An enabled Bluetooth icon will be seen on screen indicating that the Supertooth is linked.

c. ANSWERING/RECEIVING A CALL

When the phone is receiving a call, two dissimilar ring tones will be heard from the phone and then from the Supertooth.

- When answering is done on the Supertooth (that is, pressing Answer once), audio will be heard on it.
- When answering is done on the phone, ongoing call will be heard on the phone (not on the Supertooth). But if you wish to hear and transfer the audio to the Supertooth, just press the Answer button once on the Supertooth.
- 3. To terminate the call, press down the Pick-Up/Hang-Up Button.

d. MAKING A CALL

Normal dialing

With your Phone you can make a call using different methods. Please refer to your PC Phone's User Guide.

The most direct method is by using the Phone keypad.

 Tap the number on the phone's keypad, and then press the <u>Talk</u> key on the phone.

Note: Audio will be heard directly on the Supertooth. At times, for first time dialing, audio will be heard on the phone and not immediately on the Supertooth. If this is the case you have to press once on the Answer Button to transfer the audio to the Kit.

2. To terminate the call, press down the Pick-Up/Hang-Up Button on either device.

Voice Dialing

Set up voice commands for each contact as per the Phone's user manual.

To activate voice dialing...

- 1. Press the Answer button once on the Supertooth
- 2. When prompted by a beep, say the name you wish to call.

Redial

Calls the last number dialed from the phone.

1. Press and hold for 3 seconds the Answer key on the Supertooth.

e. AUDIO TRANSFER DURING A CALL

 Audio Transfer to the phone by accessing the phone's Menu and selecting Transfer Call to Handset.

Kit to Phone

Flip down the **Swivel Arm** to 0° position (or turn-off the unit).

This will automatically transfer the audio from the kit to the phone.

Phone to Kit

Flip the **Swivel Arm** up from 0° to 55° or 210° position (Turn-On the Kit). Then press shortly the Pick-Up/Hang-Up Button. The audio will be transferred from the phone to the kit."

f. REJECTING A CALL

Rejecting a call can be done from the Phone by selecting *IGNORE* or from the Supertooth by pressing the *Reject button*.

Note: It is recommended to create a phone profile to use with the Supertooth. Configure phone volume and ring settings to suit your cars environment.

NOKIA WIRELESS AUDIO ADAPTER AD-5B

The Nokia Bluetooth adapter supports Bluetooth Headset Profile only, Therefore the Supertooth needs to be placed into Headset Pairing Mode first.

a. PAIRING TO THE CELLULAR PHONE

- The Supertooth II is initially off. Turn it on by flipping up the Swivel Arm to the 55° position. The Bluetooth Indicator will glow (blue blink).
- Simultaneously press the Reject Button and the Pick-Up/Hang-Up Button for about 10 seconds. A distinctive tone will be heard and the Bluetooth Indicator LED will change from blinking blue to alternate blinking red and blue. SuperTooth II is now in Handsfree Pairing Mode.
- Press the Pick-Up/Hang-Up Button once again for a short time to access Headset Pairing Mode. The SuperTooth is now in the correct pairing mode for the AD-5B (most important).
- 4. Bring your AD-5B and phone to within about 20 cm from the SuperTooth.
- 5. Insert the Nokia adaptor into the pop port connector of the 7250 etc
- Reset the Adapter. Press and hold the Control button on the AD-5B for 10 seconds until the LED flashes alternately red and green.
- Next, press Once the Control button on the AD-5B to begin the search. LED will flash Green and will turn Continuously Green after it finds the Supertooth
- 8. At this point enter the **PIN KEY 0000** followed by the # key. Wait a few seconds and a Car icon will appear on your screen.
- When keys are pressed or when calls made or received audio will transfer to the Supertooth.

The Supertooth is now connected to the Nokia pop-port phone and Bluetooth adaptor. An enabled Bluetooth icon will be seen on screen indicating that the Handsfree Kit is linked with the AD-5B.

If you cannot see this symbol, you will need to hit the Control Button to wake the Bluetooth adaptor up as it goes into a sleep mode.

b. ANSWERING/RECEIVING A CALL

When the phone is receiving a call, two different ring tones may be heard from the phone and then from the Handsfree Kit.

- 1. When answering is done on the Handsfree Kit (that is, pressing Send once on the Supertooth), audio will be heard on it.
- When answering is done on the phone, ongoing call will be heard on the phone (not on the Handsfree Kit). But if you wish to hear and transfer the audio to the Handsfree Kit, just press the Send button once on the SuperTooth.
- 3. To terminate the call, press down the Pick-Up/Hang-Up Button.

c. MAKING A CALL with the Handsfree Kit on

Normal dialing

With your AD-5B you can make a call using different methods. Please refer to your Phone's User Guide.

The most direct method is by using the Phone keypad.

1. Dial a number on the keypad, and then press Call on the phone.

Note: Audio will be heard directly on the Handsfree Kit. At times, for first time dialing, audio will be heard on the phone and not immediately on the Handsfree Kit. If this is the case you have to press once on the Send Button to transfer the audio to the Kit.

2. To terminate the call, press down the Pick-Up/Hang-Up Button.

d. AUDIO TRANSFER DURING A CALL

Kit to Phone

Flip down the **Swivel Arm** to 0° position (or turn-off the unit). This will automatically transfer the audio from the kit to the phone.

Phone to Kit

Flip the *Swivel Arm* up from 0° to 55°or 210° position (Turn-On the Kit). Then press shortly the Pick-Up/Hang-Up Button. The audio will be transferred from the phone to the kit.

e. REJECTING A CALL

Rejecting a call must be done on the phone.

f. SETTING THE VOLUME

Setting the volume can be done using the Volume Control.

- 1. Turn it clockwise to increase the volume.
- 2. Decrease the volume by turning it counter-clockwise.

Note: If the volume is too high, it can cause feedback (whistling sound), echo or background noise during calls on some cell phones.

02 XDA11s

Note: Please make sure you have the latest firmware upgrade for your Phone. Go to the support section of the relevant site to check you have the latest version. You will need to register your device to download updates.

For Xda11s go to www.seeo2.com

a. ACTIVATING THE BLUETOOTH

You must activate the Bluetooth feature of your device to establish a Bluetooth connection between your Pocket PC device and other Bluetooth devices.

- 1. Tap the *Bluetooth icon* in the bottom right of your today screen.
- 2. Tap Turn Bluetooth ON

b. PAIRING TO THE CELLULAR PHONE (not possible while charging)

- 1. Bring your Phone to within about 20 cm from the Supertooth.
- The Supertooth II is initially off. Turn it on by flipping up the Swivel Arm to the 55° position. The Bluetooth Indicator will glow (blue blink).
- Simultaneously press the Reject Button and the Pick-Up/Hang-Up Button for about 10 seconds. A distinctive tone will be heard and the Bluetooth Indicator LED will change from blinking blue to alternate blinking red and blue. SuperTooth II is now in Handsfree Pairing Mode.
- 4. Tap the *Bluetooth icon* in the bottom right of your today screen.
- 5. Tap Bluetooth Manager
- 6. Tap New.
- 7. Tap Handsfree/Headset Setup...Tap Next
 - Your device now searches for Bluetooth devices and displays them in the list.
- 8. Select display 'All Devices'
- 9. Tap the name of the device, Supertooth, and then tap Next.
- 10. Enter "0000" as the Device PIN and then tap OK.
- 11. Tap Finish.
- For the question, "Do you want to set this device as the default Handsfree device", tap Yes.
- 13. Tap ok, and then ⊗ to exit.

The Supertooth is now paired with your Phone. An enabled Bluetooth icon will be seen on screen indicating that the Supertooth is linked with the Phone..

c. ANSWERING/RECEIVING A CALL

When the phone is receiving a call, two dissimilar ring tones will be heard from the phone and then from the Supertooth.

- When answering is done on the Supertooth (that is, pressing Pick-Up/Hang-Up once), audio will be heard on it.
- When answering is done on the phone, ongoing call will be heard on the phone (not on the Supertooth). But if you wish to hear and transfer the audio to the Supertooth, just press the Pick-Up/Hang-Up button once on the Supertooth.
- 3. To terminate the call, press down the Pick-Up/Hang-Up Button.

d. MAKING A CALL with the Supertooth on

Normal dialing

With your Device you can make a call using different methods. Please refer to your PC Phone's User Guide.

The most direct method is by using the Phone keypad.

- Press Sutton to bring up the dialer screen.
- 2. Tap the number on the keypad, and then tap Talk key on the phone.

 Note: Audio will be heard directly on the Supertooth. At times, for first time dialing, audio will be heard on the phone and not immediately on the Supertooth. If this is the case you have to press once on the Pick-Up/Hang-Up Button to transfer the audio to the Kit.
- 3. To terminate the call, press down the Pick-Up/Hang-Up Button.

Redial

Calls the last number dialed from the phone.

Redialing must be done while in the Today screen.

1. Press and hold the Pick-Up/Hang-Up key for 3 seconds.

e. AUDIO TRANSFER DURING A CALL

1. Audio Transfer back to the Phone can be done by accessing the phone's Bluetooth Headset 🚱 icon at the top of the screen.

Kit to Phone

Flip down the **Swivel Arm** to 0° position (or turn-off the unit). This will automatically transfer the audio from the kit to the phone.

Phone to Kit

Flip the *Swivel Arm* up from 0° to 55° or 210° position (Turn-On the Kit). Then press shortly the Pick-Up/Hang-Up Button. The audio will be transferred from the phone to the kit.

f. REJECTING A CALL

Rejecting a call must be done by selecting *IGNORE* on the phone or pressing the *Reject* button on the Supertooth.

g. SETTING THE VOLUME

Setting the volume can be done using the Volume Control.

- 4. Turn it clockwise to increase the volume.
- Decrease the volume by turning it counter-clockwise.
- 6. Volume can also be adjusted using the phone's volume control.

h. RECONNECTING

The latest Rom from 02 does not support auto-reconnect on the Supertooth. To reconnect after turning the Supertooth back on or coming into range...

- Press the Pick-Up/Hang-Up button on the supertooth. Wait for the connection to happen. Then press Pick-Up/Hang-Up. OR
- Go to the Bluetooth Manager Tap and Hold the Supertooth, select Connect.

Note: If the volume is too high, it can cause feedback (whistling sound), echo or background noise during calls on some cell phones.

O2 XPHONE2

Note: Please make sure you have the latest firmware upgrade for your phone. Go to the support section of the following website to check you have the latest version.

You will need to register your device to download updates.

For Xphone2 go to www.seeo2.com

a. ACTIVATING THE BLUETOOTH

You must activate the Bluetooth feature of your phone to establish a Bluetooth connection between your Pocket PC device and other Bluetooth devices.

- 1. Select Start . Select Settings. Select Bluetooth. Select Bluetooth
- 2. Select On and tap ok.

b. **PAIRING TO THE CELLULAR PHONE** (not possible while charging)

- 1. Bring your phone to within about 20 cm from the Supertooth.
- The Supertooth II is initially off. Turn it on by flipping up the Swivel Arm to the 55° position. The Bluetooth Indicator will glow (blue blink).
- Simultaneously press the Reject Button and the Pick-Up/Hang-Up Button for about 10 seconds. A distinctive tone will be heard and the Bluetooth Indicator LED will change from blinking blue to alternate blinking red and blue. SuperTooth II is now in Handsfree Pairing Mode.
- 4. On your phone Select Start. Select Settings. Select Bluetooth. Select Bluetooth.
- 5. Select Menu...Select Devices... Select Menu...Select New.
 - Your phone now searches for Bluetooth devices and will display them in the list.
- 6. Scroll to the name of the device, Supertooth, and then press Select.
- 7. Enter "0000" as the PassKey and then tap *Done*.
- 8. Enter a Display Name and Press *Done*. Note: In *Name*, you may or may not edit the name of your bonded device).

- Record your voice. To check if your recording is of good quality, tap Play. If not, tap Record again. Tap Done when finished.
- 5. Tap 😊 to make another record and repeat the steps above.

To return to the Applications window, tap

Noisy environment may affect voice recognition. Record your voice in a quiet environment.

FREQUENTLY ASKED QUESTIONS (FAQ)

- 1. Am I using the correct pairing Mode according to my phone?
- 2. Why won't my Supertooth II won't go into Pairing mode?
- 3. Is my Supertooth II Charged?
- 4. Why will my Supertooth II not connect when turned on or comes into range (10m)?
- 5. Why can't I hear any sound from the Speaker?
- 6. Why is the Supertooth II noisy and distorted?
- 7. Is it safe to use Bluetooth devices, I have heard they can allow unauthorized connections?

1. Am I using the correct pairing Mode according to my phone?

It is of most importance to establish whether your mobile phone uses
 Handsfree or Headset Modes for Pairing, and to use the appropriate
 mode when pairing the Supertooth II. If both are available, use
 Handsfree. (To find out refer to the table in this User Manual, or in the
 Bluetooth section of your phones manual.)

2. Why won't my Supertooth II won't go into Pairing mode?

- Follow through the Pairing Guide according to your phone in the Supertooth II Manual or below.
- Be clear about the extra step required to enter Headset Mode
- The Supertooth II sometimes requires a few seconds to establish a connection. Advise user to be patient while devices are searching.

3. Is my Supertooth II Charged?

- Blue Flashing Light = Battery Charged
- Red Flashing Light = Battery Low needs recharging

4. Why will my Supertooth II not connect when turned on or comes into range (10m)?

- Make sure you are using the correct profile for your phone, Headset or Handsfree.
- Some phones will not connect to Supertooth II immediately when in range and require the user to press the Pick-Up/Hang-Up key on the Supertooth II once, to establish connection.

5. Why can't I hear any sound from the Speaker?

 Make sure the Volume control knob is turned up when making the connection or making a call. This is the simplest solution but often is the most correct.

6. Why is the Supertooth II noisy and distorted?

- Turn Supertooth II Volume knob down to a level that does not give echo or feedback.
- Turn the volume down on your phone and up on the Supertooth II.
- You may have low antenna strength from your phone network.

Also, some people like to have their phone ring loudly, but this may cause distortion when transferred to the Supertooth II speaker. In your phone, set up a **Profile** with lower ringing volumes and keypad tones and activate when using with Supertooth II. (see your phones user manual for instructions).

7. Is it safe to use Bluetooth devices, I have heard they can allow unauthorized connections?

For Bluetooth security reasons, once you have set up your bluetooth devices
we recommend turning OFF the visibility option in the Bluetooth Menu of
your phone so that other Bluetooth users cannot see the contents of your
phone. (This only applies to a few mainly older Bluetooth enabled phones as
most new phones have better security.)

Contact Us:

For **Connection Assistance** or if you are having difficulties using your Supertooth II, please make an enquiry to support@blueant.com.au or on our website www.blueant.com.au

or

call us on 1300 669 049 (AUS) 0800 443 122 (NZ)
