Product highlights

WMA-DRM and MP3 support
Store your music collection and downloaded songs on your PC in one of the many supported audio formats. Then playback on your audio system. Playback of WMA, WMA-DRM and MP3 music formats is supported

Goodbye cables
A 2.4 GHz wireless link between the receiver and transmitter means you don't have to lay cables or drill holes through walls.

Music processing
The digital music is sent in digital format to your music receiver and processed via the digital sound processor to give the best sound quality on your audio system.

Blue backlight LCD
Local blue backlight LCD display facilitates easy navigation through your music collection.

Music from Home Network
Add new possibilities to your home network and extract music from it to play on your audio system. Interact with your music collection to find the music that best fits your mood.

Central music enjoyment
Keep your music collection centrally stored on your PC and enjoy it wirelessly on your audio system.

Maximum choice of music
Digital distribution offers a convenient way to access favorite music at any time. With content protected with Windows Media DRM 10 even greater flexibility and choice is offered. Windows Media DRM 10 ensures enjoyment and greater flexibility and choice by allowing you to acquire and/or transfer your subscription content to the devices of your choice.

Internet music
Add more radio stations to your current audio system by connecting directly via your broadband Internet connection to the Internet Radio Station.

Free Internet radio stations
The vast collection of free Internet radio stations ensures an endless supply of high-quality music to fit your mood.

Play WMA / MP3 Internet radio
Internet radio stations can use both WMA- as well as MP3 format for their broadcasting services. Not to limit the available amount of Internet radio stations both WMA and MP3 formats are supported.

Internet upgradeable
New features, functions and media formats automatically downloaded over the Intenet via a broadband connection straight into your device.
