

Sewing Machine Wireless Network Adapter

StitchLink™

Send Patterns Wirelessly From a PC to the Sewing Machine

No more messy cables between PC and your sewing machine

Innovative

StitchLink is designed for all the sewing professionals and PC embroidery enthusiasts to enhance their sew life more than ever.

It allows users to wirelessly move pattern data and software upgrades directly from a PC to the sewing machine, eliminating the need to use removable storage disks, or having to be connected with a cable.

Easy

StitchLink is as simple to use as a direct connection. Even if you are a wireless network novice user, the bundled wizard style setup tool walks you through the setup step by step.

Flexible

StitchLink can be used either from one PC to one sewing machine, (Ad-hoc mode), or from multiple PCs in a group (Infrastructure mode).

What do I need to use StitchLink?

To get started on your wireless embroidery with StitchLink, make sure you have the following ready:

- >>> Sewing machine with a USB interface*
- >>> StitchLink
- >>> Windows XP or Windows 2000 PC
- >>> Wireless communication for your PC

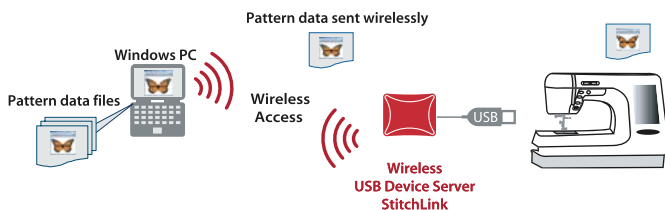

There are a couple of ways to add wireless capability to your PC. Here are typical examples:

- *Wireless ready PC (Antenna embedded)*
- *Wireless adapter (USB or PCMCIA interface)*
- *Wireless router or access point*
