Product Family Name:

Sun StorageTek™ Enterprise 8Gb FC PCI-Express Single and Dual Port Host Bus Adapter (SG-XPCIE1FC-EM8-Z, SG-XPCIE2FC-EM8-Z)

EMC

USA—FCC Class A

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This equipment may not cause harmful interference.
2. This equipment must accept any interference that may cause undesired operation.

Canada

This Class A digital apparatus complies with Canadian ICES-003.

European Union

This equipment complies with the following requirements of the EMC Directive 2004/108/EC:

As Information Technology Equipment (ITE) Class A per (as applicable):

EN 55022:2006 Class A

EN 61000-3-2:2000 +A2:2005 Pass

EN 61000-3-3:1995 +A1:2001 Pass

EN 55024:1998 +A1:2001 +A2:2003 Required Limits:

IEC61000-4-2 4 kV (Direct), 8 kV (Air)

IEC61000-4-3 3 V/m

IEC61000-4-4 1 kV AC Power Lines, 0.5 kV Signal and DC Power Lines

IEC61000-4-5 1 kV AC Line-Line and Outdoor Signal Lines, 2 kV AC Line-Gnd, 0.5 kV DC Power Lines

IEC61000-4-6 3 V

IEC61000-4-8 1 A/m

IEC61000-4-11 Pass

Safety

This equipment complies with the following requirements of the Low Voltage Directive 2006/95/EC:

EC Type Examination Certificates:

EN 60950-1:2001, 1st Edition

IEC 60950-1:2001, 1st Edition

Evaluated to all CB Countries

UL 60950-1:2003, CSA C22.2 No. 60950-03

File: E157779-A10-UL-1

Supplementary Information

This product was tested and complies with all the requirements for the CE Mark. This equipment complies with the Restriction of Hazardous Substances (RoHS) directive 2002/95/EC.

Regulatory Compliance Statements

Your Sun product is marked to indicate its compliance class:

- Federal Communications Commission (FCC) — USA
- Industry Canada Equipment Standard for Digital Equipment (ICES-003) — Canada
- Voluntary Control Council for Interference (VCCI) — Japan
- Bureau of Standards Metrology and Inspection (BSMI) — Taiwan

Please read the appropriate section that corresponds to the marking on your Sun product before attempting to install the product.

FCC Class A Notice

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference.
2. This device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy, and if it is not installed and used in accordance with the instruction manual, it may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference, in which case the user will be required to correct the interference at his own expense.

Modifications: Any modifications made to this device that are not approved by Sun Microsystems, Inc. may void the authority granted to the user by the FCC to operate this equipment.

ICES-003 Class A Notice - Avis NMB-003, Classe A

This Class A digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe A est conforme à la norme NMB-003 du Canada.

VCCI 基準について

クラス A VCCI 基準について

クラス A VCCI の表示があるワークステーションおよびオプション製品は、クラス A 情報技術装置です。これらの製品には、下記の項目が該当します。

この装置は、情報処理装置等電波障害自主規制協議会(VCCI)の基準に基づくクラス A 情報技術装置です。この装置を家庭環境で使用すると電波妨害を引き起こすことがあります。この場合には使用者が適切な対策を講ずるよう要求されることがあります。

BSMI Class A Notice

The following statement is applicable to products shipped to Taiwan and marked as Class A on the product compliance label.

警告使用者：

這是甲類的資訊產品，在居住的環境中使用時，可能會造成射頻干擾，在這種情況下，使用者會被要求採取某些適當的對策。

CCC Class A Notice

The following statement is applicable to products shipped to China and marked with "Class A" on the product's compliance label.

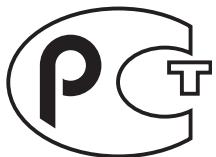

以下声明适用于运往中国且其认证标志上注有 "Class A" 字样的产品。

声明

此为A级产品，在生活环境中，该产品可能会造成无线电干扰。
在这种情况下，可能需要用户对其干扰采取切实可行的措施。

GOST-R Certification Mark

Safety Agency Compliance Statements

Read this section before beginning any procedure. The following text provides safety precautions to follow when installing a Sun Microsystems product.

Safety Precautions

For your protection, observe the following safety precautions when setting up your equipment:

- Follow all cautions and instructions marked on the equipment.
- Ensure that the voltage and frequency of your power source match the voltage and frequency inscribed on the equipment's electrical rating label.
- Never push objects of any kind through openings in the equipment. Dangerous voltages may be present. Conductive foreign objects could produce a short circuit that could cause fire, electric shock, or damage to your equipment.

Symbols

The following symbols may appear in this book:

Caution – There is a risk of personal injury and equipment damage. Follow the instructions.

Caution – Hot surface. Avoid contact. Surfaces are hot and may cause personal injury if touched.

Caution – Hazardous voltages are present. To reduce the risk of electric shock and danger to personal health, follow the instructions.

Depending on the type of power switch your device has, one of the following symbols may be used:

On – Applies AC power to the system.

Off – Removes AC power from the system.

Standby – The On/Standby switch is in the standby position.

Modifications to Equipment

Do not make mechanical or electrical modifications to the equipment. Sun Microsystems is not responsible for regulatory compliance of a modified Sun product.

Placement of a Sun Product

Caution – Do not block or cover the openings of your Sun product. Never place a Sun product near a radiator or heat register. Failure to follow these guidelines can cause overheating and affect the reliability of your Sun product.

- **Product:** Sun StorageTek 8 Gb FC PCI-Express HBA, Emulex

In compliance with the requirements defined in ISO 7779, the workplace-dependent noise level of this product is less than 70 db (A).

In compliance with the requirements defined in ISO 7779, the workplace-dependent noise level of this product is XX db(A).

SELV Compliance

Safety status of I/O connections comply to SELV requirements.

Power Cord Connection

Caution – Sun products are designed to work with power systems having a grounded neutral (grounded return for DC-powered

products). To reduce the risk of electric shock, do not plug Sun products into any other type of power system. Contact your facilities manager or a qualified electrician if you are not sure what type of power is supplied to your building.

Caution – Not all power cords have the same current ratings. Do not use the power cord provided with your equipment for any other products or use. Household extension cords do not have overload protection and are not meant for use with computer systems. Do not use household extension cords with your Sun product.

注意 – 添付の電源コードを他の装置や用途に使用しない
添付の電源コードは本装置に接続し、使用することを目的として設計され、その安全性が確認されているものです。決して他の装置や用途に使用しないでください。火災や感電の原因となる恐れがあります。

The following caution applies only to devices with a Standby power switch:

Caution – The power switch of this product functions as a standby type device only. The power cord serves as the primary disconnect device for the system. Be sure to plug the power cord into a grounded power outlet that is nearby the system and is readily accessible. Do not connect the power cord when the power supply has been removed from the system chassis.

The following caution applies only to devices with multiple power cords:

Caution – For products with multiple power cords, all power cords must be disconnected to completely remove power from the system.

Battery Warning

Caution – There is danger of explosion if batteries are mishandled or incorrectly replaced. On systems with replaceable batteries, replace only with the same manufacturer and type or equivalent type recommended by the manufacturer per the instructions provided in the product service manual. Do not disassemble batteries or attempt to recharge them outside the system. Do not dispose of batteries in fire. Dispose of batteries properly in accordance with the manufacturer's instructions and local regulations. Note that on Sun CPU boards, there is a lithium battery molded into the real-time clock. These batteries are not customer replaceable parts.

System Unit Cover

You must remove the cover of your Sun computer system unit to add cards, memory, or internal storage devices. Be sure to replace the cover before powering on your computer system.

Caution – Do not operate Sun products without the cover in place. Failure to take this precaution may result in personal injury and system damage.

Rack System Warning

The following warnings apply to Racks and Rack Mounted systems.

Caution – For safety, equipment should always be loaded from the bottom up. That is, install the equipment that will be mounted in the lowest part of the rack first, then the next higher systems, etc.

Caution – To prevent the rack from tipping during equipment installation, the anti-tilt bar on the rack must be deployed.

Caution – To prevent extreme operating temperature within the rack insure that the maximum temperature does not exceed the product's ambient rated temperatures.

Caution – To prevent extreme operating temperatures due to reduced airflow consideration should be made to the amount of air flow that is required for a safe operation of the equipment.

Laser Compliance Notice

Sun products that use laser technology comply with Class 1 laser requirements.

Class 1 Laser Product
Luokan 1 Laserlaite
Klasse 1 Laser Apparat
Laser Klasse 1

CD and DVD Devices

The following caution applies to CD, DVD, and other optical devices.

Caution – Use of controls, adjustments, or the performance of procedures other than those specified herein may result in hazardous radiation exposure.

Conformité aux normes de sécurité

Veuillez lire attentivement cette section avant de commencer. Ce texte traite des mesures de sécurité qu'il convient de prendre pour l'installation d'un produit Sun Microsystems.

Mesures de sécurité

Pour votre sécurité, nous vous recommandons de suivre scrupuleusement les mesures de sécurité ci-dessous lorsque vous installez votre matériel:

- Suivez tous les avertissements et toutes les instructions inscrites sur le matériel.
- Assurez-vous que la tension et la fréquence de votre source d'alimentation correspondent à la tension et à la fréquence indiquées sur l'étiquette de la tension électrique nominale du matériel
- N'introduisez jamais d'objets quels qu'ils soient dans les ouvertures de l'équipement. Vous pourriez vous trouver en présence de hautes tensions dangereuses. Tout objet étranger conducteur risque de produire un court-circuit pouvant présenter un risque d'incendie ou de décharge électrique, ou susceptible d'endommager le matériel.

Symboles

Vous trouverez ci-dessous la signification des différents symboles utilisés:

Attention – Vous risquez d'endommager le matériel ou de vous blesser. Veuillez suivre les instructions.

Attention – Surfaces brûlantes. Evitez tout contact. Les surfaces sont brûlantes. Vous risquez de vous blesser si vous les touchez.

Attention – Tensions dangereuses. Pour réduire les risques de décharge électrique et de danger physique, observez les consignes indiquées.

Selon le type d'interrupteur marche/arrêt dont votre appareil est équipé, l'un des symboles suivants sera utilisé:

Marche – Met le système sous tension alternative.

Arrêt – Met le système hors tension alternative.

Veilleuse – L'interrupteur Marche/Veille est sur la position de veille.

Modification du matériel

N'apportez aucune modification mécanique ou électrique au matériel. Sun Microsystems décline toute responsabilité quant à la non-conformité éventuelle d'un produit Sun modifié.

Positionnement d'un produit Sun

Attention – Evitez d'obstruer ou de recouvrir les orifices de votre produit Sun. N'installez jamais un produit Sun près d'un radiateur ou d'une source de chaleur. Si vous ne respectez pas ces consignes, votre produit Sun risque de surchauffer et son fonctionnement en sera altéré.

Niveau de pression acoustique

Produit : Sun StorageTek 8 Gb FC PCI-Express HBA, Emulex

Conformément à la norme ISO 7779, le niveau sonore de ce produit sur le lieu de travail est inférieur à 70 db(A).

Conformément à la norme ISO 7779, le niveau sonore de ce produit sur le lieu de travail est de XX db(A).

Conformité SELV

Le niveau de sécurité des connexions E/S est conforme aux normes SELV.

Connexion du cordon d'alimentation

Attention – Les produits Sun sont conçus pour fonctionner avec des systèmes d'alimentation équipés d'un conducteur neutre relié à la terre (conducteur neutre pour produits alimentés en CC). Pour réduire les risques de décharge électrique, ne branchez jamais les produits Sun sur une source d'alimentation d'un autre type. Contactez le gérant de votre bâtiment ou un électricien agréé si vous avez le moindre doute quant au type d'alimentation fourni dans votre bâtiment.

Attention – Tous les cordons d'alimentation ne présentent pas les mêmes caractéristiques électriques. Les cordons d'alimentation à usage domestique ne sont pas protégés contre les surtensions et ne sont pas conçus pour être

utilisés avec des ordinateurs. N'utilisez jamais de cordon d'alimentation à usage domestique avec les produits Sun.

L'avertissement suivant s'applique uniquement aux systèmes équipés d'un interrupteur Veille:

Attention – L'interrupteur d'alimentation de ce produit fonctionne uniquement comme un dispositif de mise en veille. Le cordon d'alimentation constitue le moyen principal de déconnexion de l'alimentation pour le système. Assurez-vous de le brancher dans une prise d'alimentation mise à la terre près du système et facile d'accès. Ne le branchez pas lorsque l'alimentation électrique ne se trouve pas dans le châssis du système.

L'avertissement suivant s'applique uniquement aux systèmes équipés de plusieurs cordons d'alimentation:

Attention – Pour mettre un système équipé de plusieurs cordons d'alimentation hors tension, il est nécessaire de débrancher tous les cordons d'alimentation.

Mise en garde relative aux batteries

Attention – Les batteries risquent d'exploser en cas de manipulation maladroite ou de remplacement incorrect. Pour les systèmes dont les batteries sont remplaçables, effectuez les remplacements uniquement selon le modèle du fabricant ou un modèle équivalent recommandé par le fabricant, conformément aux instructions fournies dans le manuel de service du système. N'essayez en aucun cas de démonter les batteries, ni de les recharger hors du système. Ne les jetez pas au feu. Mettez-les au rebut selon les instructions du fabricant et conformément à la législation locale en vigueur. Notez que sur les cartes processeur de Sun, une batterie au lithium a été moulée dans l'horloge temps réel. Les batteries ne sont pas des pièces remplaçables par le client.

Couvercle de l'unité

Pour ajouter des cartes, de la mémoire ou des périphériques de stockage internes, vous devez retirer le couvercle de votre système Sun. Remettez le couvercle supérieur en place avant de mettre votre système sous tension.

Attention – Ne mettez jamais des produits Sun sous tension si leur couvercle supérieur n'est pas mis en place. Si vous ne prenez pas ces précautions, vous risquez de vous blesser ou d'endommager le système.

Mise en garde relative au système en rack

La mise en garde suivante s'applique aux racks et aux systèmes montés en rack.

Attention – Pour des raisons de sécurité, le matériel doit toujours être chargé du bas vers le haut. En d'autres termes, vous devez installer, en premier, le matériel qui doit se trouver dans la partie la plus inférieure du rack, puis installer le matériel sur le niveau suivant, etc.

Attention – Afin d'éviter que le rack ne penche pendant l'installation du matériel, tirez la barre anti-basculement du rack.

Attention – Pour éviter des températures de fonctionnement extrêmes dans le rack, assurez-vous que la température maximale ne dépasse pas la fourchette de températures ambiantes du produit déterminée par le fabricant.

Attention – Afin d'empêcher des températures de fonctionnement extrêmes provoquées par une aération insuffisante, assurez-vous de fournir une aération appropriée pour un fonctionnement du matériel en toute sécurité

Avis de conformité des appareils laser

Les produits Sun qui font appel aux technologies lasers sont conformes aux normes de la classe 1 en la matière.

Class 1 Laser Product
Luokan 1 Laserlaite
Klasse 1 Laser Apparat
Laser Klasse 1

Pérophériques CD et DVD

L'avertissement suivant s'applique aux périphériques CD, DVD et autres périphériques optiques:

Attention – L'utilisation de contrôles et de réglages ou l'application de procédures autres que ceux spécifiés dans le présent document peuvent entraîner une exposition à des radiations dangereuses.

Einhaltung sicherheitsbehördlicher Vorschriften

Lesen Sie vor dem Ausführen von Arbeiten diesen Abschnitt. Im folgenden Text werden Sicherheitsvorkehrungen beschrieben, die Sie bei der Installation eines Sun Microsystems-Produkts beachten müssen.

Sicherheitsvorkehrungen

Treffen Sie zu Ihrem eigenen Schutz bei der Installation des Geräts die folgenden Sicherheitsvorkehrungen:

- Beachten Sie alle auf den Geräten angebrachten Warnhinweise und Anweisungen.
- Stellen Sie sicher, dass Spannung und Frequenz der Stromversorgung den Nennleistungen auf dem am Gerät angebrachten Etikett entsprechen.
- Führen Sie niemals Fremdobjekte in die Öffnungen am Gerät ein. Es können gefährliche Spannungen anliegen. Leitfähige Fremdobjekte können einen Kurzschluss verursachen, der einen Brand, Stromschlag oder Geräteschaden herbeiführen kann.

Symbole

Die Symbole in diesem Handbuch haben folgende Bedeutung:

Achtung – Gefahr von Verletzung und Geräteschaden. Befolgen Sie die Anweisungen.

Achtung – Heiße Oberfläche. Nicht berühren, da Verletzungsgefahr durch heiße Oberfläche besteht.

Achtung – Gefährliche Spannungen. Befolgen Sie die Anweisungen, um Stromschläge und Verletzungen zu vermeiden.

Je nach Netzschatertyp an Ihrem Gerät kann eines der folgenden Symbole verwendet werden:

Ein – Versorgt das System mit Wechselstrom.

Aus – Unterbricht die Wechselstromzufuhr zum Gerät.

Wartezustand – Der Ein-/Standby-Netzschatz befindet sich in der Standby-Position.

Modifikationen des Geräts

Nehmen Sie keine elektrischen oder mechanischen Gerätemodifikationen vor. Sun Microsystems ist für die Einhaltung der Sicherheitsvorschriften von modifizierten Sun-Produkten nicht haftbar.

Aufstellung von Sun-Geräten

Achtung – Geräteöffnungen Ihres Sun-Produkts dürfen nicht blockiert oder abgedeckt werden. Sun-Geräte sollten niemals in der Nähe von Heizkörpern oder Heißluftklappen aufgestellt werden. Die Nichtbeach-

tung dieser Richtlinien kann Überhitzung verursachen und die Zuverlässigkeit Ihres Sun-Geräts beeinträchtigen.

Lautstärke

Produkt: Sun StorageTek 8 Gb FC PCI-Express HBA, Emulex

Gemäß den Vorgaben in der Norm ISO 7779 beträgt der Geräuschpegel dieses Geräts in Abhängigkeit vom Arbeitsplatz unter 70 db(A).

Gemäß den Vorgaben in der Norm ISO 7779 beträgt der Geräuschpegel dieses Geräts in Abhängigkeit vom Arbeitsplatz XX db(A).

SELV-Konformität

Der Sicherheitsstatus der E/A-Verbindungen entspricht den SELV-Anforderungen.

Anschluss des Netzkabels

Achtung – Sun-Geräte sind für Stromversorgungssysteme mit einem geerdeten neutralen Leiter (geerdeter Rückleiter bei gleichstrombetriebenen Geräten) ausgelegt. Um die Gefahr von Stromschlägen zu vermeiden, schließen Sie das Gerät niemals an andere Stromversorgungssysteme an. Wenden Sie sich an den zuständigen Gebäudeverwalter oder an einen qualifizierten Elektriker, wenn Sie nicht sicher wissen, an welche Art von Stromversorgungssystem Ihr Gebäude angeschlossen ist.

Achtung – Nicht alle Netzkabel verfügen über die gleichen Nennwerte. Herkömmliche, im Haushalt verwendete Verlängerungskabel besitzen keinen Überlastschutz und sind daher für Computersysteme nicht geeignet. Verwenden Sie bei Ihrem Sun-Produkt keine Haushalts-Verlängerungskabel.

Die folgende Warnung gilt nur für Geräte mit Standby-Netzschalter:

Achtung – Beim Netzschatzer dieses Geräts handelt es sich nur um einen Ein/Standby-Schalter. Zum völligen Abtrennen des Systems von der Stromversorgung dient hauptsächlich das Netzkabel. Stellen Sie sicher, dass das Netzkabel an eine frei zugängliche geerdete Steckdose in der Nähe des Systems angeschlossen ist. Schließen Sie das Stromkabel nicht an, wenn die Stromversorgung vom Systemchassis entfernt wurde.

Die folgende Warnung gilt nur für Geräte mit mehreren Netzkabeln:

Achtung – Bei Produkten mit mehreren Netz-kabeln müssen alle Netzkabel abgetrennt werden, um das System völlig von der Stromver-sorgung zu trennen.

Warnung bezüglich Batterien

Achtung – Bei unsachgemäßer Handhabung oder nicht fachgerechtem Austausch der Batterien besteht Explosionsgefahr. Verwen-den Sie bei Systemen mit austauschbaren Batterien ausschließlich Ersatzbatterien desselben Typs und Herstellers bzw. einen entsprechenden, vom Hersteller gemäß den Anweisungen im Service-Handbuch des Produkts empfohlenen Batterietyp. Versuchen Sie nicht, die Batterien auszubauen oder außerhalb des Systems wiederaufzuladen. Werfen Sie die Batterien nicht ins Feuer. Entsorgen Sie die Batterien entsprechend den Anweisungen des Herstellers und den vor Ort geltenden Vorschriften. CPU-Karten von Sun verfügen über eine Echtzeituhr mit integrierter Lithiumbatterie. Diese Batterie darf nur von einem qualifizierten Servicetechniker ausgewechselt werden.

Gehäuseabdeckung

Sie müssen die Abdeckung Ihres Sun-Computersystems entfernen, um Karten, Speicher oder interne Speichergeräte hinzuzufügen. Bringen Sie vor dem Einschalten des Systems die Gehäuseabdeckung wieder an.

Achtung – Nehmen Sie Sun-Geräte nicht ohne Abdeckung in Betrieb. Die Nichtbeachtung dieses Warnhinweises kann Verletzungen oder Geräteschaden zur Folge haben.

Class 1 Laser Product
Luokan 1 Laserlaite
Klasse 1 Laser Apparat
Laser Klasse 1

Warnungen bezüglich in Racks eingebauter Systeme

Die folgenden Warnungen gelten für Racks und in Racks eingebaute Systeme:

Achtung – Aus Sicherheitsgründen sollten sämtliche Geräte von unten nach oben in Racks eingebaut werden. Installieren Sie also zuerst die Geräte, die an der untersten Position im Rack eingebaut werden, gefolgt von den Systemen, die an nächsthöherer Stelle eingebaut werden, usw.

Achtung – Verwenden Sie beim Einbau den Kippschutz am Rack, um ein Umkippen zu vermeiden.

Achtung – Um extreme Betriebstemperaturen im Rack zu vermeiden, stellen Sie sicher, dass die Maximaltemperatur die Nennleistung der Umgebungstemperatur für das Produkt nicht überschreitet

Achtung – Um extreme Betriebstemperaturen durch verringerte Luftzirkulation zu vermeiden, sollte die für den sicheren Betrieb des Geräts erforderliche Luftzirkulation eingesetzt werden.

Hinweis zur Laser-Konformität

Sun-Produkte, die die Laser-Technologie verwenden, entsprechen den Laser-Anforderungen der Klasse 1.

CD- und DVD-Geräte

Die folgende Warnung gilt für CD-, DVD- und andere optische Geräte:

Achtung – Die hier nicht aufgeführte Verwendung von Steuerelementen, Anpassungen oder Ausführung von Vorgängen kann eine gefährliche Strahlenbelastung verursachen.

Normativas de seguridad

Lea esta sección antes de realizar cualquier operación. En ella se explican las medidas de seguridad que debe tomar al instalar un producto de Sun Microsystems.

Medidas de seguridad

Para su protección, tome las medidas de seguridad siguientes durante la instalación del equipo:

- Siga todos los avisos e instrucciones indicados en el equipo.
- Asegúrese de que el voltaje y frecuencia de la fuente de alimentación coincidan con el voltaje y frecuencia indicados en la etiqueta de clasificación eléctrica del equipo.
- No introduzca objetos de ningún tipo por las rejillas del equipo, ya que puede quedar expuesto a voltajes peligrosos. Los objetos conductores extraños pueden producir cortocircuitos y, en consecuencia, incendios, descargas eléctricas o daños en el equipo.

Símbolos

En este documento aparecen los siguientes símbolos:

Precaución – Existe el riesgo de que se produzcan lesiones personales y daños en el equipo. Siga las instrucciones.

Precaución – Superficie caliente. Evite todo contacto. Las superficies están calientes y pueden causar lesiones personales si se tocan.

Precaución – Voltaje peligroso. Para reducir el riesgo de descargas eléctricas y lesiones personales, siga las instrucciones.

En función del tipo de interruptor de alimentación del que disponga el dispositivo, se utilizará uno de los símbolos siguientes:

Encendido – Suministra alimentación de CA al sistema.

Apagado – Corta la alimentación de CA del sistema.

Espera – El interruptor de encendido/espera está en la posición de espera.

Modificaciones en el equipo

No realice modificaciones de tipo mecánico ni eléctrico en el equipo. Sun Microsystems no se hace responsable del cumplimiento de normativas en caso de que un producto Sun se haya modificado.

Colocación de un producto Sun

Precaución – No obstruya ni tape las rejillas del producto Sun. Nunca coloque un producto Sun cerca de radiadores ni fuentes de calor. Si no sigue estas indicaciones, el producto Sun podría sobrecalentarse y la fiabilidad de su funcionamiento se vería afectada.

Nivel de ruido

Producto: Sun StorageTek 8 Gb FC PCI-Express HBA, Emulex

En conformidad con la norma ISO 7779, el nivel de emisión de ruido de este producto en el puesto de trabajo es inferior a los 70 db(A).

En conformidad con la norma ISO 7779, el nivel de emisión de ruido de este producto en el puesto de trabajo es de XX db(A).

Cumplimiento de la normativa para instalaciones SELV

Las condiciones de seguridad de las conexiones de entrada y salida cumplen los requisitos para instalaciones SELV (del inglés *Safe Extra Low Voltage*, voltaje bajo y seguro).

Conexión del cable de alimentación

Precaución – Los productos Sun se han diseñado para funcionar con sistemas de alimentación que cuenten con un conductor neutro a tierra (con conexión a tierra de regreso para los productos con alimentación de CC). Para reducir el riesgo de descargas eléctricas, no conecte ningún producto Sun a otro tipo de sistema de alimentación. Póngase en contacto con el encargado de las instalaciones de su empresa o con un electricista cualificado en caso de que no esté seguro del tipo de alimentación del que se dispone en el edificio.

Precaución – No todos los cables de alimentación tienen la misma clasificación eléctrica. Los alargadores de uso doméstico no cuentan con protección frente a sobrecargas y no están diseñados para su utilización con sistemas informáticos. No utilice alargadores de uso doméstico con el producto Sun.

La siguiente medida solamente se aplica a aquellos dispositivos que dispongan de un interruptor de alimentación de espera:

Precaución – El interruptor de alimentación de este producto funciona solamente como un dispositivo de espera. El cable de alimentación hace las veces de dispositivo de desconexión principal del sistema. Asegúrese de que conecta el cable de alimentación a una toma

de tierra situada cerca del sistema y de fácil acceso. No conecte el cable de alimentación si la unidad de alimentación no se encuentra en el bastidor del sistema.

La siguiente medida solamente se aplica a aquellos dispositivos que dispongan de varios cables de alimentación:

Precaución – En los productos que cuentan con varios cables de alimentación, debe desconectar todos los cables de alimentación para cortar por completo la alimentación eléctrica del sistema.

Advertencia sobre las baterías

Precaución – Si las baterías no se manipulan o reemplazan correctamente, se corre el riesgo de que estallen. En los sistemas que cuentan con baterías reemplazables, reemplácelas sólo con baterías del mismo fabricante y el mismo tipo, o un tipo equivalente recomendado por el fabricante, de acuerdo con las instrucciones descritas en el manual de servicio del producto. No desmonte las baterías ni intente recargarlas fuera del sistema. No intente deshacerse de las baterías echándolas al fuego. Deshágase de las baterías correctamente de acuerdo con las instrucciones del fabricante y las normas locales. Tenga en cuenta que en las placas CPU de Sun, hay una batería de litio incorporada en el reloj en tiempo real. Los usuarios no deben reemplazar este tipo de baterías.

Cubierta de la unidad del sistema

Debe extraer la cubierta de la unidad del sistema informático Sun para instalar tarjetas, memoria o dispositivos de almacenamiento internos. Vuelva a colocar la cubierta antes de encender el sistema informático.

Precaución – No ponga en funcionamiento los productos Sun que no tengan colocada la cubierta. De lo contrario, puede sufrir lesiones personales y ocasionar daños en el sistema.

Advertencia sobre el sistema en bastidor

Las advertencias siguientes se aplican a los sistemas montados en bastidor y a los propios bastidores.

Precaución – Por seguridad, siempre deben montarse los equipos de abajo arriba. A saber, primero debe instalarse el equipo que se situará en el bastidor inferior; a continuación, el que se situará en el siguiente nivel, etc.

Precaución – Para evitar que el bastidor se vuelque durante la instalación del equipo, debe extenderse la barra antivolcado del bastidor.

Precaución – Para evitar que se alcance una temperatura de funcionamiento extrema en el bastidor, asegúrese de que la temperatura máxima no sea superior a la temperatura ambiente establecida como adecuada para el producto.

Precaución – Para evitar que se alcance una temperatura de funcionamiento extrema debido a una circulación de aire reducida, debe considerarse la magnitud de la circulación de aire requerida para que el equipo funcione de forma segura.

Aviso de cumplimiento de la normativa para la utilización de láser

Los productos Sun que utilizan tecnología láser cumplen los requisitos establecidos para los productos láser de clase 1.

Class 1 Laser Product
Luokan 1 Laserlaite
Klasse 1 Laser Apparat
Laser Klasse 1

Dispositivos de CD y DVD

La siguiente medida se aplica a los dispositivos de CD y DVD, así como a otros dispositivos ópticos:

Precaución — La utilización de controles, ajustes o procedimientos distintos a los aquí especificados puede dar lugar a niveles de radiación peligrosos.

Nordic Lithium Battery Cautions

Norge

Advarsel — Litiumbatteri — Eksplosjonsfare. Ved utskifting benyttes kun batteri som anbefalt av apparatfabrikanten. Brukt batteri returneres apparatleverandøren.

Sverige

Varning — Explosionsfara vid felaktigt batteribyte. Använd samma batterityp eller en ekvivalent typ som rekommenderas av apparattillverkaren. Kassera använt batteri enligt fabrikantens instruktion.

Danmark

Advarsel! — Litiumbatteri — Eksplosjonsfare ved fejlagtig håndtering. Udkiftning må kun ske med batteri af samme fabrikat og type. Lever det brugte batteri tilbage til leverandøren.

Suomi

Varoitus — Paristo voi räjähää, jos se on virheellisesti asennettu. Vaihda paristo ainoastaan laitevalmistajan suosittelemaan typpiin. Hävitä käytetty paristo valmistajan ohjeiden mukaisesti.

Nordic Power Distribution Cautions

English

Caution — This product is also designed for an IT power distribution system with phase-to-phase voltage of 230V.

Danmark

Advarsel! — Dette produkt er også beregnet til et IT-strømforsyningssystem med en fase-til-fase spænding på 230 V.

Nordic Grounded Socket Cautions

English

Caution — The appliance must be connected to a grounded socket.

Norge

Advarsel — Apparatet må tilkopes jordet stikkontakt.

Sverige

Varning — Apparaten skall anslutas till jordat uttag.

Suomi

Varoitus — Laite on liittää suojamaadoituskoskettimilla varustettuun pistorasiaan.

Preface

This installation guide describes how to install and remove the single and dual port Sun StorageTek™ 8 Gigabit (Gb) Fibre Channel (FC) PCI-Express module host bus adapter (HBA). It also explains how to install the driver and any other utilities required by the HBA. The document is written for technicians, system administrators, application service providers (ASPs), and users who have advanced experience troubleshooting and replacing hardware.

Before You Read This Book

Before you install and use the HBA as described in this document, read and understand the following documents.

- *SunVTS 6.X Users Guide*
- *SunVTS 6.X Reference Manual*

You can find these documents by performing a search at <http://docs.sun.com>.

How This Book Is Organized

[Chapter 1](#) provides an overview of the product and lists the various operating systems, host platforms, switches, and storage systems, that support the HBA.

[Chapter 2](#) describes how to install and remove the HBA.

[Chapter 3](#) describes how to install any software and utilities that are required by the HBA.

[Chapter 4](#) contains known issues with the HBA.

Using UNIX Commands

This document might not contain information about basic UNIX® commands and procedures such as shutting down the system, booting the system, and configuring devices. Refer to the following for this information:

- Software documentation that you received with your system
- Solaris™ Operating System documentation, which is at:

<http://docs.sun.com>

Shell Prompts

Shell	Prompt

Sun StorageTek™ 8 Gb FC PCI-Express HBA, Emulex Installation Guide, part number
820-5465-12

HBA Overview

This chapter provides a basic overview of the single and dual port Sun StorageTek™ 8 Gb Fibre Channel (FC) PCI-Express host bus adapter (HBA), Emulex (referred to as Sun StorageTek 8 Gb FC PCI-Express HBA in this document), which uses Emulex technology. This chapter also describes the various operating systems, host platforms, storage, and infrastructure configurations that support the HBA and lists the HBA environmental requirements.

This chapter contains the following topics:

- “[Kit Contents](#)” on page 1
 - “[HBA Features and Specifications](#)” on page 2
 - “[System Interoperability](#)” on page 4
 - “[Operating System and Technology Requirements](#)” on page 3
 - “[System Interoperability](#)” on page 4
 - “[Environmental Requirements](#)” on page 7
-

Kit Contents

- Sun StorageTek 8 Gb FC PCI-Express HBA, Emulex
- Extra PCI full-size bracket
- *Accessing Documentation* document (part number: 820-2299-xx)
- P002403-05A China RoHS Material disclosure

HBA Features and Specifications

The Sun StorageTek 8 Gb FC PCI-Express HBA, Emulex (single port: SG-XPCIE1FC-EM8-Z, dual port: SG-XPCIE2FC-EM8-Z) consists of a single-wide, FC bus expansion board. The board interfaces a four- or eight-lane PCI-Express bus, with the four or eight lanes supporting one or two Fibre Channel (FC) optical media ports. Each independent FC port operates at 8 Gbit/sec and features 8/4/2 autonegotiation.

See [TABLE 1-1](#) for a list of the HBA features.

TABLE 1-1 HBA Features and Specifications

Feature	Description
PCI connector	x8
PCI signaling environment	PCI Express x8 (8 active lanes)
PCI lane usage	x8 lanes
PCI transfer rate (maximum)	PCI Express Generation One (GT/s) x8 PCI Express Generation Two (5.0 GT/s) x8
Number of FC ports	One (single port) or Two (dual port)
Number of devices supported	126 devices per FC loop; 510 devices in Fabric mode
FC bus type (external)	Fiber-optic media, short-wave, multi-mode fiber (400-M5- SN-S)
FC transfer rate	400 MBps per port maximum, half-duplex 800 MBps per port maximum, full-duplex
FC topologies	Switched fabric (N-Port), arbitrated loop (NL-Port), and point-to-point (N-Port)
RAM	1.5 MB, parity protected, per port
BIOS ROM (FC)	One 4-MB (dual-port) or 2-MB (single-port) flash ROM
NVRAM	One 2-KB EEPROM per port
External connectors	One Small-Form Factor Pluggable (SFP) multimode optic with LC-style connectors per port

TABLE 1-1 HBA Features and Specifications

Feature (<i>Continued</i>)	Description (<i>Continued</i>)
Maximum FC cable length	2 Gb/s: 500 meters using 50/125 µm core OM3 fiber 300 meters using 50/125 µm core OM2 fiber 150 meters using 62.5/125 µm core OM1 fiber
	4 Gb/s: 380 meters using 50/125 µm core OM3 fiber 150 meters using 50/125 µm core OM2 fiber 70 meters using 62.5/125 µm core OM1 fiber
	8 Gb/s: 150 meters using 50/125 µm core OM3 fiber 50 meters using 50/125 µm core OM2 fiber 21 meters using 62.5/125 µm core OM1 fiber
LED indicators	Two LEDs per port (yellow and green) on the front panel as status indicators.
Maximum power consumption	13.3W (dual port), 10.1W (signal port)
Form Factor	Low-profile MD2 form factor

Operating System and Technology Requirements

The HBA requires the OS and technology levels listed in [TABLE 1-2](#).

TABLE 1-2 Supported Operating System/Technology Versions

Operating System/Technology	Supported Versions
Solaris 10 OS for the x64 and x86 (32-bit and 64-bit) platforms (Supports MPXIO)	<ul style="list-style-type: none">• Solaris 10 8/07 (all updates)
Solaris 10 OS for the SPARC (64-bit) platform (Supports MPXIO)	<ul style="list-style-type: none">• Solaris 10 (all updates)
Linux OS	<ul style="list-style-type: none">• Red Hat Enterprise Linux 4.6 (32-bit and 64-bit), U5• Red Hat Enterprise Linux 5.1 (32-bit and 64-bit), U1• SUSE Linux Enterprise Server 9 (32-bit and 64-bit), SP4• SUSE Linux Enterprise Server 10 (32-bit and 64-bit), SP1

TABLE 1-2 Supported Operating System/Technology Versions (*Continued*)

Operating System/Technology	Supported Versions
Microsoft Windows OS Enterprise and Standard Editions WHQL Certified, MS Windows MPIO	<ul style="list-style-type: none">Windows Server 2003 SP1 32-bit, x64Windows Server 2003 SP2 32-bit, x64Windows Server 2003 SP1/R2 32-bit, x64Windows Server 2003 SP2/R2 32-bit, x64
Microsoft Windows OS Enterprise and Standard Editions WHQL Certified, MS Windows MPIO	<ul style="list-style-type: none">Windows Server 2008 32-bit, x64
VMware Technology	<ul style="list-style-type: none">ESX Server 3.5 u2

System Interoperability

This section provides information about selected platforms and storage that are compatible with the heterogeneous FC network design of the HBA. This section contains the following topics:

- “[Host Platform Support](#)” on page 4
- “[Storage Support](#)” on page 5
- “[Quantum S4 tape drive](#)” on page 6

Host Platform Support

The HBA is supported by the platforms listed in [TABLE 1-3](#).

TABLE 1-3 Platform Support

Platform	Supported OS/Technology
Sun SPARC Servers	
Sun SPARC Enterprise T2000	Solaris
Sun SPARC Enterprise T5120	Solaris
Sun SPARC Enterprise T5140	Solaris
Sun SPARC Enterprise T5220	Solaris
Sun SPARC Enterprise T5240	Solaris
Sun SPARC Enterprise T5440	Solaris

TABLE 1-3 Platform Support (*Continued*)

Platform (<i>Continued</i>)	Supported OS/Technology (<i>Continued</i>)
Sun SPARC Enterprise M4000	Solaris
Sun SPARC Enterprise M5000	Solaris
Sun SPARC Enterprise M8000	Solaris
Sun SPARC Enterprise M9000-32	Solaris
Sun SPARC Enterprise M9000-64	Solaris
Sun Fire™ V445	Solaris
Sun Fire V245	Solaris
Sun Ultra U45	Solaris
Sun x64 AMD Servers	
Sun Fire X4100M2	Solaris, Windows, Linux, VMware
Sun Fire X4200M2	Solaris, Windows, Linux, VMware
Sun Fire X4600	Solaris, Windows, Linux, VMware
Sun Fire X4600M2	Solaris, Windows, Linux, VMware
Sun Fire X4440	Solaris, Windows, Linux, VMware
Sun Fire X4240	Solaris, Windows, Linux, VMware
Sun Fire X4140	Solaris, Windows, Linux, VMware
Sun Fire X2100M2	Solaris, Windows, Linux, VMware
Sun Fire X2200M2	Solaris, Windows, Linux, VMware
Sun x64 Intel Servers	
Sun Fire X4150	Solaris, Windows, Linux, VMware
Sun Fire X4450	Solaris, Windows, Linux, VMware

The host system must have at least one PCI-Express 8-lane slot to support the HBA.

Storage Support

This section lists the arrays and tape storage supported by the HBA. This section contains the following topics:

- “[Array Support](#)” on page 6
- “[System Support](#)” on page 6
- “[Tape Storage Support](#)” on page 6
- “[Quantum S4 tape drive](#)” on page 6

Array Support

The HBA is supported by the following arrays:

- Sun StorageTek 2540
- Sun StorageTek 6140
- Sun StorageTek 6540

System Support

The HBA is supported by the following systems:

- Sun StorageTek 9990
- Sun StorageTek 9980/9985
- Sun StorageTek 9970

Tape Storage Support

The HBA is supported by the following tape storage:

- Sun StorageTek SL48 tape library
- Sun StorageTek SL24 tape autoloader
- Sun StorageTek SL500 modular library
- Sun StorageTek SL1400 tape library
- Sun StorageTek SL3000 tape library
- Sun StorageTek L8500 modular library
- Sun StorageTek Virtual Tape Library (VTL): VTL Value and VTL Plus
- Sun StorageTek T10000A and T10000B
- Sun StorageTek T9840C, and T9840D tape drives
- Sun StorageTek T9940B tape drive
- IBM and HP LT03 tape drives
- IBM and HP LT04 tape drives
- Quantum S4 tape drive

Switch Support

The HBA is supported with the following Fibre Channel switches:

- Brocade DCX backbone switch

- Brocade 200E switch
- Brocade 300 switch
- Brocade SW4100 switch
- Brocade SW4900 switch
- Brocade SW5000 switch
- Brocade SW5100 switch
- Brocade SW5300 switch
- Brocade SW7500 switch
- Cisco MDS9124 24-port multilayer fabric switch
- Cisco MDS 9134 multilayer fabric switch
- Cisco MDS 9140 multilayer fabric switch
- Cisco MDS 9216A multilayer fabric switch
- Cisco MDS 9216i multilayer fabric switch
- Cisco MDS 9222i multiservice modular switch
- Cisco MDS 9509 multilayer director
- Cisco MDS 9513 multilayer director
- McData Mi10K director
- McData 6140 director
- QLogic 9000
- QLogic 5800

The HBA is supported by all 1-Gb Ethernet switches.

Environmental Requirements

The HBA environmental requirements are listed in [TABLE 1-4](#).

TABLE 1-4 HBA Environmental Requirements

Specification	Operating	Non-Operating
Temperature	0° to 55°C, non-condensing	-40°C to 70°C, non-condensing
Airflow	150 lfm	n/a
Humidity	10% to 90% RH, non-condensing, 27°C max wet bulb	93% RH, nonconducting, 38°C max wet bulb

TABLE 1-4 HBA Environmental Requirements

Specification	Operating	Non-Operating
Altitude	3200m	12,200m
Vibration	0.20G in all axes swept for 5-500 Hz sine	1.0G in all axes 5-500-5 Hz sine
Shock	5G, 11 ms half-sine	30G, 11 ms half-sine

Hardware Installation and Removal

This chapter describes the tasks required to install and remove the HBA. Refer to your system installation or service manual for detailed instructions.

This chapter contains the following topics:

- “[Observing ESD and Handling Precautions](#)” on page 9
 - “[Installing the Hardware](#)” on page 10
 - “[Testing the Installation](#)” on page 17
 - “[Replacing the SFP+ Unit on the HBA](#)” on page 24
 - “[Removing the Hardware](#)” on page 24
-

Observing ESD and Handling Precautions

Caution – Damage to the HBA can occur as the result of careless handling or electrostatic discharge (ESD). Always handle the HBA with care to avoid damage to electrostatic sensitive components.

To minimize the possibility of ESD-related damage, use both a workstation antistatic mat and an ESD wrist strap. You can get an ESD wrist strap from any reputable electronics store or from Sun as part number #250-1007. Observe the following precautions to avoid ESD-related problems:

- Leave the HBA in its antistatic bag until you are ready to install it in the system.
- Always use a properly fitted and grounded wrist strap or other suitable ESD protection when handling the HBA, and observe proper ESD grounding techniques.

-
- Hold the HBA by the edge of the PCB, not by the connectors.
 - Place the HBA on a properly grounded antistatic work surface pad when it is out of its protective antistatic bag.

Installing the Hardware

The hardware installation process involves the following general steps, as described in these sections:

- “[To Install the HBA](#)” on page 10
- “[To Connect the Optical Cable](#)” on page 14
- “[To Apply Power](#)” on page 15
- “[To Verify Proper Installation \(for the Solaris OS\)](#)” on page 17
- “[To Verify Attached Storage \(for the Solaris OS\)](#)” on page 21

▼ To Install the HBA

The HBA comes with a low-profile PCIe bracket installed. A standard bracket is included in the box with the HBA. The low-profile mounting bracket is shorter than the standard bracket; approximately 3.11 in. (7.9 cm) compared to 4.75 in. (12.06 cm). If you need to change the bracket for HBA installation, you must first remove the optical transceiver (two transceivers on the two-port adapter) from its housing. This procedure covers how to install the HBA and, if necessary, how to remove the transceiver and change the bracket safely.

The HBA uses different types of transceivers. This procedure shows an example of one type.

1. **Attach an antistatic strap (refer to “[Observing ESD and Handling Precautions](#)” on page 9).**
2. **Refer to your system installation or service manual to determine an appropriate PCI-Express slot in which to install the HBA.**
3. **Shut down, power off, and unplug the system.**
4. **Remove the system case.**
5. **Remove the blank panel from an empty PCI-Express slot.**
6. **(Optional) Perform the following steps to replace the PCI bracket.**

- a. Remove the transceiver from its cage assembly (see [FIGURE 2-2](#)) by pulling the bail (handle) out and down to release the latch and gently pull the transceiver out of its housing.

Do not force it. After the latch is released, the transceiver slides out easily..

Caution – This is a delicate operation—take care not to damage the transceiver.

FIGURE 2-1 Optical Transceiver

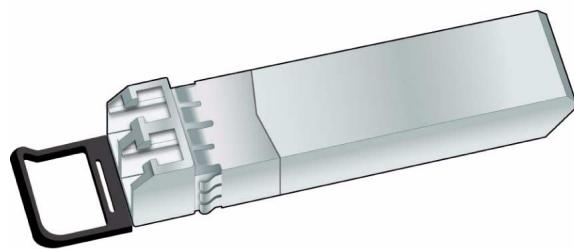

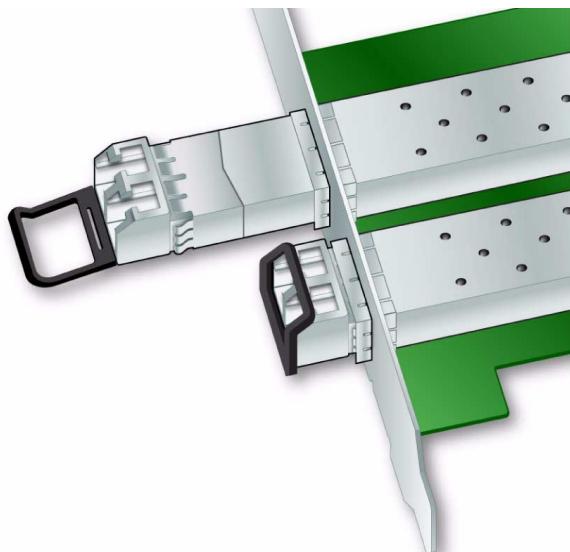

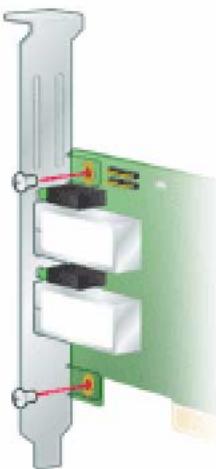

FIGURE 2-2 A Partly Extracted Optical Transceiver and an Optical Transciever That is Latched In Place

- b. Observing ESD precautions, store the transceiver in an ESD-safe place.**
- c. Remove the mounting bracket screws from the top of the HBA.**

FIGURE 2-3 Removing the Bracket Mounting Screws

- d. Remove the bracket and store it for future use.**
- e. Align the new mounting bracket tabs with the holes in the HBA.**

Caution – Be careful not to push the bracket past the transceiver housing's grounding tabs.

Make sure the LEDs are properly aligned with the holes in the bracket.

- f. Re-install the screws that attach the HBA to the bracket.**
 - g. Re-install the transceiver by sliding it into the housing.**
When the latch engages, it clicks.
 - h. Push the bail back into place.**
- 7. Insert the HBA into the empty PCI-Express 8-lane slot and press firmly until the adapter is seated.**
 - 8. Secure the mounting bracket of the HBA to the case with the panel screw or clip.**

9. Replace the computer case and tighten the case screws.

The HBA is now installed in the computer and is ready for media attachment.

▼ To Connect the Optical Cable

Note – The HBA does not allow normal data transmission on an optical link unless it is connected to another similar or compatible Fibre Channel product (that is, multimode to multimode).

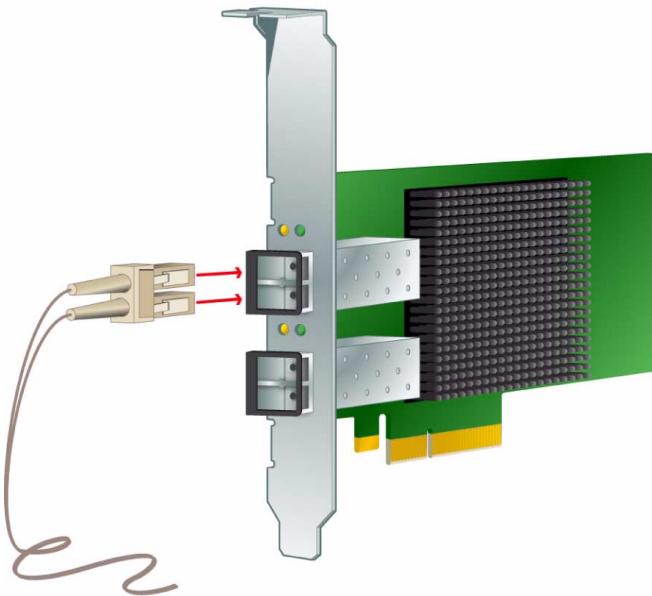

Use multimode fiber-optic cable, intended for short-wave lasers, that adheres to the specifications in [TABLE 2-1](#).

TABLE 2-1 Optical Cable Specifications

Fiber-Optic Cable	Maximum Length	Minimum Length	Connector
OM3 - Multimode 50/125 micron fiber (2000 MHz*km bandwidth cable)	2.125 Gb/s: 0.5m - 500m 4.25 Gb/s: 0.5m - 380m 8.5 Gb/s 0.5m - 150m	.5 meters	LC
OM2 - Multimode 50/125 micron fiber (500 MHz*km bandwidth cable)	2.125 Gb/s: 0.5m – 300m 4.25 Gb/s: 0.5m – 150m 8.5 Gb/s 0.5m – 50m	.5 meters	LC
OM1 - Multimode 62.5/125 micron fiber (200 MHz*km bandwidth cable)	2.125 Gb/s: 0.5m – 150m 4.25 Gb/s: 0.5m – 70m 8.5 Gb/s 0.5m – 21m	.5 meters	LC

1. Connect the fiber-optic cable to an LC connector on the HBA (see [FIGURE 2-4](#)).

FIGURE 2-4 Attaching the Optical Cable

2. Connect the other end of the cable to the FC device.

After the optical cable is connected to the HBA, you can power on the system.

▼ To Apply Power

1. Verify that the HBA is securely installed in the system.
2. Verify that the correct fiber-optic cable is attached.
3. Refer to your system installation or service manual to determine how to power on the system.

▼ (LED) Status

Yellow and green LEDs can be seen through openings in the mounting bracket of the HBA. Each port has a corresponding set of yellow and green LEDs (see [FIGURE 2-5](#)).

FIGURE 2-5 LEDs

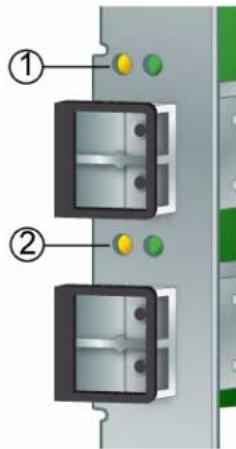

Figure Legend

-
- 1** Port 0 LEDs
 - 2** Port 1 LEDs

Testing the Installation

This section contains the following topics:

- “To Verify Proper Installation (for the Solaris OS)” on page 17
- “To Verify Attached Storage (for the Solaris OS)” on page 21

▼ To Verify Proper Installation (for the Solaris OS)

1. Use the `show-devs` command at the `ok` prompt to list the installed devices.

The HBA can be identified in the output by looking for the `SUNW,em1xs@n` and `SUNW,em1xs@n,1` node names, where `n` is usually a single-digit number from 0 to 9. In this example, there are two dual port (SG-XPCIE2FC-EM8-Z) and one single port (SG-XPCIE1FC-EM8-Z) HBAs installed.

```

2. To positively identify the port as a Sun StorageTek 8 Gb FC port, use the **cd** command to change to the **SUNW,emlxse@n** directories, and use the **.properties** command.

In this example, the **.properties** command output displays the properties of the two ports in a dual port HBA.

```
ok cd /pci@780/pci@0/pci@8/SUNW,emlxS@0

▼ To Verify Attached Storage (for the Solaris OS)

- If online storage is connected to the HBA, use the `apply show-children` command to list the attached storage.

Note – You might need to use the `reset-all` command before using the `apply show-children` command.

In the example that follows, four SANS with 14 to 16 drives each and an FC tape drive are attached to the two ports or a dual-port HBA.

```

Replacing the SFP+ Unit on the HBA

The Small Form Factor Pluggable (SFP+) optics unit on this card is considered a part of the card, NOT as a separate field replaceable unit (FRU). Therefore, in the event that the SFP+ unit malfunctions, you must return the entire card in order to receive a replacement SFP+ unit. Always return any malfunctioning card with the SFP+ unit attached. For information about removing the card from a system in order to return it, see [“To Remove the HBA Hardware” on page 24](#).

Removing the Hardware

The following procedures describe how to remove the HBA. Refer to your system installation or service manual for detailed HBA adapter removal instructions.

The hardware removal process involves these general steps:

- 1. Halting the operating system and removing power from the server blade, or computer.**
- 2. Removing the HBA hardware.**

▼ To Remove the HBA Hardware

- 1. Use an ESD strap (refer to [“Observing ESD and Handling Precautions” on page 9](#)).**
- 2. Refer to your system documentation to shut down, power off, and unplug the system.**
- 3. Disconnect all cables.**
- 4. Unscrew the case screws and remove the system case.**
- 5. Remove the mounting bracket of the HBA from the system by unscrewing the panel screw or removing the clip, whichever is being used.**

You can now remove the HBA.

HBA Software Installation

After you have completed the hardware installation and powered on the system, follow the instructions in this chapter for your operating system to install the HBA driver and any other utilities that are required.

This chapter contains the following topics:

- “Driver Software for the Solaris OS” on page 25
 - “Installing Software For the Red Hat and SUSE Linux OSes” on page 26
 - “Installing Software For the Windows Server 2003 or Windows Server 2008 OS” on page 27
 - “Configuration and Diagnostic Utilities” on page 28
-

Driver Software for the Solaris OS

The HBA driver for the Solaris OS is included with the Solaris 10 1/06 (s10u1) OS release. No additional patches or packages are required to support the HBA on minimum supported versions of the Solaris 10 OS for x64/x86 systems.

Solaris Diagnostic Support

Diagnostic support for the HBA is included in the SunVTS™ software beginning with version 6.3. The SunVTS software is included with the Solaris 10 11/06 (s10u3) OS release, and is also available for download at:

<http://www.sun.com/oem/products/vts>

The emlxtest utility, which is included in the SunVTS software, supports the following functions:

- Connectivity verification
 - Firmware version and checksum test
 - Self-test
 - Loopback tests
 - External
 - Internal, single-bit
 - Internal, 10-bit
 - Mailbox
-

Installing Software For the Red Hat and SUSE Linux OSes

No updates are required to support the HBA on minimum supported versions of Linux.

For diagnostic support, you might need to rebuild the Linux driver. Before rebuilding the drivers for Linux, you must have the required Linux OS installed on the hard disk. The driver and utilities are available for download at the Emulex support site for Sun Microsystems.

▼ To Install the HBA Software For the Linux OS

1. Go to the Emulex support site for Sun Microsystems at:
<http://www.emulex.com/sun/support/index.jsp>
2. Locate the Sun StorageTek section, and click the model number (SG-XPCIE1FC-EM8-Z) for the HBA you want to install.
3. Locate the Linux Driver section, and click Download to copy the driver files to a local file system.
4. Click Download to copy the management utilities to a local file system.
5. Click Manual to copy the PDF manual, and then follow the installation and configuration procedures.
6. Click PDF Manual to download installation, configuration, and troubleshooting information.

7. Install the driver for Linux as described in the Emulex Driver and Utilities for Linux User Manual.
8. Install the management utilities as described in the Emulex driver and utilities documentation.

▼ To Install the HBA Software For the VMware Technology

You must obtain the drivers from VMware.

1. Go to the Emulex support site for Sun Microsystems at:
<http://www.emulex.com/sun/support/index.jsp>
 2. Locate the VMware section, and click the model number (SG-XPCIE1FC-EM8-Z) for the HBA you want to install.
 3. Click Download to copy the management utilities to a local file system.
 4. Click Manual to copy the PDF manual, and then follow the installation and configuration procedures.
 5. Click PDF Manual to download installation, configuration, and troubleshooting information.
 6. Obtain the driver from VMware and install the driver as described in the VMware documentation.
 7. Install the management utilities as described in the Emulex driver and utilities documentation.
-

Installing Software For the Windows Server 2003 or Windows Server 2008 OS

The HBA driver and applications kits for the Windows Server 2003 or Windows Server 2008 OS is available for download at the Emulex support site for Sun Microsystems.

▼ To Install the Software For the Windows Server 2003 or Windows Server 2008 OS

1. Go to the Emulex support site for Sun Microsystems at:
<http://www.emulex.com/sun/support/index.jsp>
 2. Locate the driver section for Windows.
 3. Download the Driver Kit by clicking Download.
 4. Click PDF Manual to download the installation guide for the Windows OS.
 5. Install the driver and management utilities for the Windows OS as described in the installation guide.
-

Configuration and Diagnostic Utilities

Use the HBAnywhere utility or the lputil command-line interface (CLI) utility to configure the HBA. These utilities are available for Linux and Windows OSes and provide support for the following functions:

- Discover local and remote hosts, HBAs, targets, and LUNs
- Reset HBAs
- Set HBA driver parameters
- Update firmware
- Enable or disable the system BIOS
- Run diagnostic tests on HBAs
- Manage out-of-band HBAs
- Manage local and in-band remote HBAs

For more information about the HBAnyware and lputil utilities, download their user manuals from the Emulex support site for Sun Microsystems.

Known Issues

This chapter contains any known issues with the HBA.

Reboot Fails on the SPARC Enterprise M8000 System (6728135)

On the SPARC Enterprise M8000 system, if you use the stmsboot command to provide dual paths to the boot device, on occasion the boot device is not found and the reboot does not succeed.

At the console, the following message will be printed:

Can't open boot device

Workaround: When this occurs, retry the boot operation. The system will now reboot as expected.
