WatchGuard® SOHO

BROADBAND INTERNET SHARING

FIREWALL SECURITY AND VPN

EASY INSTALLATION

OFFICE NETWORKING

LIVESECURITY™ SERVICE

Broadband Internet Security for the Small Office, Home Office or Telecommuter

INTERNET SECURITY AND VPN. Today, complete Internet security goes beyond a firewall. In addition to dynamic stateful packet filtering technologies, the WatchGuard® SOHO provides network address translation (NAT), content filtering, web reporting, and the WatchGuard LiveSecurity™ Service.

If you also need a simple secure way to exchange information with other offices or partners via the Internet, Virtual Private Network (VPN) is available as an option or as part of the WatchGuard SOHO|tc–a convenient bundle of the WatchGuard SOHO and IPSec VPN.

EASY TO USE. The WatchGuard SOHO, a security-dedicated hardware appliance, networks your computers together and allows them to share one broadband connection. It comes with a 10 user license (upgradeable to 50 users) and supports all leading operating systems. Our WatchGuard SOHO is also easy to use. Just plug it in between your cable, DSL or ISDN router and your network to exchange email and share files, printers and other peripherals–while you conveniently manage it from your browser.

TECHNOLOGIES, INC.

Firewall Protection

INTERNET

Cable or DSL Modem, T1/E1 and ISDN Routers

WatchGuard® **SOHO**

KEY BENEFITS

- **Internet Security:** Protect all of your networked computers with dynamic stateful packet filtering firewall technology. Create filter rules based on port and protocol for both inbound and outbound traffic.

- **Broadband Internet Sharing:** Share your single cable, DSL or ISDN high-speed Internet connection to save the cost of multiple connections.

- **LiveSecurity™ Service:** Receive software updates and technical support. Renewed annually, the first year subscription is included.

- **Network 10 Computers:** Network up to 10 computers together (upgradeable to 50) to exchange e-mail and files, and to share a broadband Internet connection, printers, and other peripherals.

- **VPN:** Establish a private, encrypted communication tunnel with another location with the WatchGuard SOHO|tc. This feature is optional with the WatchGuard SOHO and may be added at anytime.

- **Easy Installation:** This plug-and-play security-dedicated hardware device configures easily using any standard browser.

- **WebBlocker Option:** Enhance productivity by filtering or blocking Web site privileges. This feature may be added at any time.

PACKAGE INCLUDES

- WatchGuard SOHO Model WG2500
- AC Adapter
- 1 Ethernet Cable with RJ45 Connections
- Installation Guide
- VPN License Key for SOHO | tc

TECHNICAL SPECIFICATIONS

COMPONENT	TECHNOLOGY AND PROTOCOLS SUPPORTED
LiveSecurity™ Service	
Authentication	• Web site login
Code Signing	• MD5
Management	
Browsers	• Internet Explorer 4 and 5
	• Netscape Navigator® 4.5 and 4.7
Operating System	• Supports all leading platforms including: Windows® 95/98/NT 4.0, Apple Macintosh®, Linux®, UNIX®
WatchGuard Security Suite	
Firewall	
Dynamic Stateful Packet Filtering	• All static-port TCP/IP services
Other Services	• DHCP, PPPoE, ICQ, Real® Audio/Video, NetMeeting, Intel® Video Phone, and SOCKS5®
Network Address Translation	
Dynamic NAT	• Dynamic port-to-internal host mapping
Static NAT	• Static port-to-IP address mapping
Branch Office VPN	*Included with SOHO|tc, optional with SOHO*
IPSec Tunnel	• Encapsulating Security Payload (ESP)
	• MD5-HMAC 128-bit authentication algorithm
	• SHA1-HMAC 160-bit authentication algorithm
	• DES-CBC 56-bit encryption
	• 3DES-CBC 168-bit encryption
	• Internet Key Exchange (IKE) protocol
Remote User VPN	
PPTP Tunnel	• PPTP pass-through
Web Access Control	*Optional with SOHO and SOHO|tc*
	• 14 defined Web site categories
	• Block web access based on URL categories
Firebox™ SOHO	• VxWorks
	• WAN: 1 RJ45 10BaseT Ethernet interface
	• LAN: 4 RJ45 10BaseT Ethernet interface
	• Toshiba TMRP3907 CPU
	• 4 MB SDRAM
	• 1 MB Flash Memory
	• 6.5″ W x 1.0″ H x 6.1″ D
	• 10 ounces
