

Signal Booster Installation Guide

To install the Signal Booster, perform the following steps and refer to the drawing below:

1. Connect the cable from your cable service provider or antenna (cable in) to the Signal Input on the Signal Booster. *(In typical installations, the input cable is already connected to the television or VCR. Disconnect this cable and connect it to the Signal Input on the Signal Booster).*
2. Connect the Signal Output on the Signal Booster to the television or VCR input using the supplied 6 foot coaxial cable.
3. Use the other 6 foot coaxial cable to connect the ac adapter to the Power 12 Vdc connector on the Signal Booster.
4. Plug the ac adapter into a convenient wall outlet. The lighted, green LED confirms that power is correctly applied.

You can mount the Signal Booster to any suitable indoor surface using the screws provided, or it may lay flat.
