

## 3G Wireless USB/PCMCIA Cellular Router

Create your own personal *HotSpot* to allow multiple users to share internet access

Are you still using "dial up" for an internet connection? Do you live in an area where Hi-Speed Cable or DSL are not an option? Would you like to create your own Wifi Hotspot anywhere? Aluratek introduces its new 3G/4G Cellular Modem Routers to allow you to get Hi-Speed internet Access anywhere you get a cellular signal. Simply insert your cellular 3G/4G modem air card into the router and you are all set.

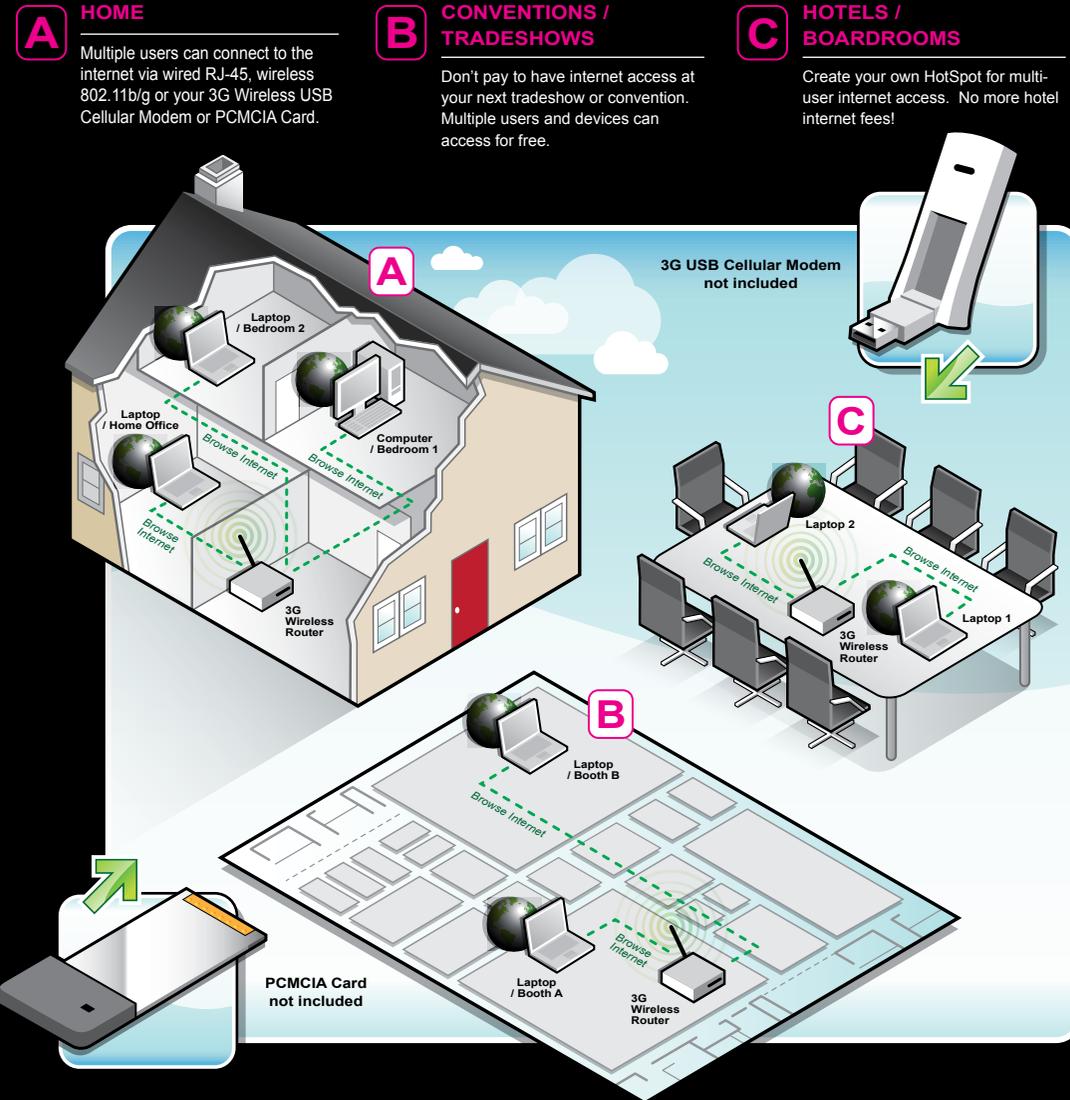

This is a perfect solution for setting up mobile work stations, providing internet access for cross country trips in a car/van/RV, First Responders creating an instant network, Conventions and tradeshow or traveling in groups and sharing a hotel floor and having internet access, boaters, and many others.
