

VR-100 VPN Router

A07-VR-100

- Up to 100 VPNs
- Firewall with Stateful Packet Inspection (SPI)
- QoS Management
- High performances for enterprise solution

The A07-VR-100 is an 8-port dual-WAN VPN Router which contains 2 WAN ports and 8 Ethernet 10/100 LAN ports and mainly supports small and medium size enterprise business network with a high security VPN. The router brings high-speed network security to enterprise businesses, remote users, service providers, and data centers. The Edge-Core VR-100 design combines firewall, VPN support, NAT, and powerful traffic management with Fast Ethernet connections to provide consistent network infrastructure security.

VR-100 VPN Router

TECHNICAL FEATURES

Physical Configuration

8 x 10/100 Ports (RJ-45)
1 x 10/100 Internet Port (RJ-45)
1 x 10/100 DMZ Port (RJ-45)
FLASH: 16 MB
SDRAM: 32 MB

Firewall Security

Firewall Throughput
IP Filtering
Port Filtering (TCP/UDP)
Denial of Service (DoS)
Stateful Packet Inspection (SPI)
Firewall Detection

VPN Support

IPSec VPN
VPN Throughput: 68 Mbps
VPN Tunnels: 100
Group VPNs: 2
VPN Tunnel Management
IKE: Pre-Shared keys
IPSec Encryption: DES/3DES
IPSec Authentication: MD5/SHA1
PMTU
View Log

WAN

Type: Dual-WAN
Load Balance: Auto
Link Backup
Network Service Detection
Protocol Binding

Networking

Concurrent Sessions: 20000
DMZ
DHCP Client/Server,dynamic IP, static IP
TCP/IP
IP Routing
PPPoE
NAT (ALG, port forwarding and port trigger)
DNS (Relay/DDNS)
ARP
ICMP
FTP/TFTP
Password for web access

Network Management

Web based management
SNMP v1/ v2c
Firmware upgrade through Web browser
Logging and Alarms of system activities

QoS (Quality of service): Port-based QoS

PRODUCT: VR-100 VPN Router
CODE: A07-VR-100
EAN CODE: 8026974008547
