

BlueGATE

DESCRIPTION

**Low Cost Cablefree Internet Access.
PSTN Access Point/Modem for Home and Office
using Bluetooth Wireless.**

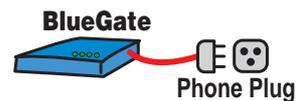

Providing a cableless Internet connection for any Bluetooth Data Device via the Public Switched Telephone Network the new BlueGATE provides a lowcost wireless solution for any room in a house or office within a 10 meter range.

Bluetooth equipped devices such as Notebook PC's and PDA's can access the Internet at up to 56Kbit/s without the inconvenience of cables or internal modem devices.

BlueGATE: The convenient and versatile Wireless solution.

With BlueGATE you have the same wireless functionalities of the Wireless Lan devices without the relating costs. You will have a wireless solution for the Internet access at a very competitive price.

Just connect a Bluetooth adapter (i.e. Palladio USB Bluetooth) and you will be on-line.

Easy Configuration.

BlueGATE does not require particular configurations. It is automatically detected by the Bluetooth device installed on your PC or PDA.

Just execute the Pairing inserting the PIN you find in the package and you're ready to connect to the Internet.

Create a profile for the Remote Access or modify the one you generally use, selecting the Bluetooth modem instead of your usual modem.
