

## WinModem USB V.92

### DESCRIPTION

**All the advantages of USB technology.  
WinModem USB V.92 and you're behind the times!**

WinModem USB V.92 is a performing and low consumption fax/modem carried out using the latest USB technology.

Your PC has an USB port? Do you know the operating speed is 12Mbps and you can connect up to 127 devices?

Get WinModem USB V.92 and you'll surf the Internet at a supersonic speed.

WinModem USB V.92 is a 56000 bps fax/modem that complies with V.92 and V.90 communication standards and can also send/receive fax up to 14400 bps.

All these functions in one device connected to the USB port of your PC.

Thanks to the CTR21 International Line Interface, WinModem USB V.92 can be used in any country using this standard.

The product is supplied with a send/receive fax software and with the drivers for Windows® XP/2000/ME/98. It is Flash upgradable.
