Printer Server PX

DESCRIPTION

The compact solution to share the LAN printer!

The new small sized Digicom Printer Server PX directly connects to the printer parallel port so that the printer can be shared by all the PCs of the LAN, independently by the Operating System.

With Printer Server PX you will be able to easily share your color printers or the printers equipped with a parallel port.
 It is a suitable solution for all the applications of Office Printer Sharing as it is supplied with complete drivers and supports the most popular print modes.

Printer Server PX supports Windows® XP, 2000, ME, 98, 95, NT and MAC® OS.
