

AT-AR750S-DP

Secure VPN Router

AT-AR750S-DP

2 x WAN 10/100Base-T ports 5 x LAN 10/100Base-T ports 2 x PICs

I x Asynchronous console / Modem port Dual hot-swappable AC or DC redundant power supplies

Secure Modular Routing Solution

Designed with the needs of medium enterprises and Telco customers in mind, the AT-AR750S-DP offers significant advances in processing performance, Quality of Service, routing, remote connectivity and security.

Extensive VPN Cabability

The AT-AR750S-DP provides extensive IPSec-based VPN capability, allowing the interconnection of offices, remote tele-workers, and other users who require secure access to a corporate network. The AT-AR750S-DP comes complete with integrated hardware acceleration, which maximises encryption throughput and removes the need to purchase a hardware upgrade package. The AT-AR750S-DP is compatible with industry standard IPSec VPN clients.

Security

In addition to hardware-based encryption, the AT-AR750S-DP comes with other advanced security features such as traffic filtering with event logging. Traffic filtering uses the source and destination address, port, protocol and TCP packet type to provide control over traffic that passes through the AT-AR750S-DP. A Stateful Inspection firewall provides an increased level of security and complements the packet filtering function. HTTP and SMTP proxies on the AT-AR750S-DP provide improved control over web and mail communications.

Quality of Service

Allied Telesis' QoS implementation enables the AT-AR750S-DP to dynamically identify high priority voice, video and application traffic, so that appropriate service levels can be

maintained in congested networks. Advanced QoS allows voice, video, and data traffic to have QoS applied within individual IPSec tunnels, over GRE, as well as IPv6 to IPv4 tunnels.

Performance

The AT-AR750S-DP provides superior performance over other secure VPN routers in this market space. While most secure routers have Stateful Firewalls with NAT, QoS, and IPsec VPN termination capability, very few can perform all three functions and still provide excellent performance with the mixed packed sizes seen in real networks. The AT-AR750S-DP has been designed to meet real network needs.

Stateful Firewall inspection, NAT and QoS: >50Mbps @ 64 byte packets

Stateful Firewall inspection, NAT, QoS, IPsec VPN (with AES 256 bit encryption): >35Mbps @ 72 byte packets

The AT-AR750S-DP can achieve up to 195 Mbps IPsec throughput with bidirectional traffic.

This level of performance enables secure siteto-site VPNs over multiple WAN interfaces while still firewalling the local network across multiple LAN ports.

Reliability

Dual hot-swappable AC or -48V DC redundant power supplies packaged in the IRU rack mount chassis, provide the ultimate in space saving, reliability and resiliency. The AR750-DP can operate on just one PSU if required. These features, combined with front-to-back cooling, make the AT-AR750S-DP perfect for the high-density rack environment where space is at a premium.

Comphrehensive Management and Configuration

The AT-AR750S-DP comes with a comprehensive suite of management features and is also compatible with SNMP-based management packages. Allied Telesis' SNMP support extends

Key Features

Hardware

- 2 x 10/100Base-T WAN interfaces
- 2 x Port Interface Cards (PICs)
- $^{\circ}$ 5 x 10/100Base-T switched LAN ports
- I x Asynchronous port / Modem Port
- DMZ port: configurable on any of the WAN/LAN ports
- Dual hot-swappable AC or DC redundant power supplies
- RoHS compliant

Security

- IP Filtering
- · Stateful Inspection Firewall
- 802.1x
- Authentication: RADIUS, TACACS, MD5, PAP, CHAP

VPN/Encryption

- NAT-
- · AES, DES, 3DES encryption
- 5,000 configured IPsec VPN tunnels (250 active tunnels)
- HW accelerated IPsec VPN >35Mbps@72byte packets (with AES 256 bit encryption)
- · Up to 195 Mbps IPsec throughput with large packets

Manageability

- Web based GUI
- · CLI management
- SNMPv3
- IP QoS

Extensive routing support, including:

- RIPvI and v2
- OSPFvI and v2
- GRE, L2TP • IPX
- IPX
- VRRP
- BGP-4 optional
- IPv6 optional
- RIPng optional

Multicast routing protocols, including:

- PIM-DM, PIM-SM
- DVMRP
- IGMPv2
- IGMP Snooping
- PIM6
- MLD
- IPv6 Multicast optional

Support for traditional network protocols, including:

- X.25
- Frame Relay

Allied Telesis www.alliedtelesis.com

AT-AR750S-DP | Secure VPN Router

to SNMPv3 to provide secure management. An extensive command set is available via the Command Line Interface (CLI), and a browser-based Graphical User Interface (GUI) is also provided to simplify the configuration and management of the routers. The GUI provides access to default set-ups in key management areas and provides access to regional settings.

WAN Load Balancing

The AT-AR750S-DP'WAN Load Balancer enables the router to combine bandwidth from multiple WAN connections for increased throughput, redundancy and reliable WAN connectivity. When a router simultaneously connects to multiple WAN networks, the WAN load balancer will distribute the traffic based on any one of a number of selectable balancing algorithms. A typical example would be a router that has two Internet connections each exchanging data to remote sites via different Internet providers. In this case an outage limited to one network will not result in a loss of connectivity to these sites.

About Allied Telesis

Allied Telesis is part of the Allied Telesis Group. Founded in 1987, the company is a global provider of secure Ethernet/IP access solutions and an industry leader in the deployment of IP Triple Play networks over copper and fiber access infrastructure. Our POTS-to-10G iMAP integrated Multiservice Access Platform and iMG intelligent Multiservice Gateways, in conjunction with advanced switching, routing and WDM-based transport solutions, enable public and private network operators and service providers of all sizes to deploy scalable, carrier-grade networks for the cost-effective delivery of packet-based voice, video and data services. Visit us online at www.alliedtelesis.com.

Service and Support

Allied Telesis provides value-added support services for its customers under its Net.Cover programs. For more information on Net.Cover support programs available in your area, contact your Allied Telesis sales representative or visit our website: www.alliedtelesis.com
