## talk organize connect

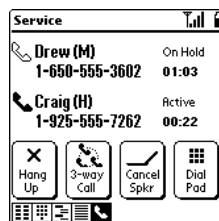

The Handspring™ Treo™ communicator is the one device that does it all. Now you can have your phone, email, SMS text messaging, wireless web, and Palm OS® organizer all in one indispensable—and very compact—device.

Treo 180 with thumb keyboard

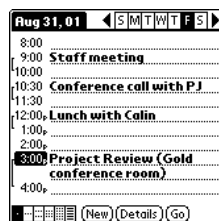

Treo 180g with Graffiti writing area

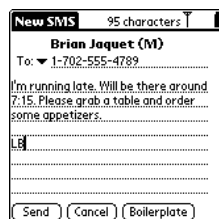

### Treo is your mobile phone

The Handspring Treo communicator is a dual-band world phone with all the features you've come to expect, such as speed dial, three-way calling and call history. Plus, it has extra features like full integration with the built-in PhoneBook so you can dial direct from your contact list, Instant Lookup to easily search for contacts by names or initials, a personal speakerphone and more.

### Treo is a Palm OS organizer

With 16 MB of memory and the fastest Palm OS processor, the rechargeable Treo communicator has it all—Date Book Plus, PhoneBook (an improved Address Book), To Do List, Memo Pad and more. Plus, you can choose from thousands of existing Palm OS applications and use HotSync® to backup, update, and transfer data between Treo and your desktop.

### Treo is a wireless messaging device

Read and send email from virtually anywhere. Connect to your business and personal accounts with the included POP3 email application. If your message is short, you can send an SMS text message to other mobile phone users in your network or even to an email address.

### Treo browses the web

Now you can access the web from just about everywhere. Every Treo communicator comes with Blazer™—the award-winning wireless web browser—so you can access virtually any web site, not just those sites optimized for mobile access. Get directions, confirm your flight, check the weather—and see it all on Treo's organizer-sized screen.

### Treo fits in your pocket

The Handspring Treo communicator is smaller than any other Palm OS handheld and packed with features, without compromising functionality or ease of use. The Treo 180, with a built-in keyboard, makes one-handed access easy and thumb typing fast. The Treo 180g features the popular Graffiti® handwriting recognition software.

## Treo™ features

### full-featured mobile phone

- Call management features include large number dial pad, speed dial, three-way calling, call history, direct dial from your PhoneBook, caller ID and call waiting.
- Instantly find anyone in your PhoneBook with just a few keystrokes. Type the first initial and the first few letters of the last name.
- Use the personal speakerphone to talk and listen hands-free.
- Dual-band world phone with automatic network selection can be used in Europe and Asia on GSM 900 networks and in the US on GSM 1900 networks.

### powerful Palm OS® organizer

- Includes all the classic organizer applications—Date Book Plus, To Do List, Memo Pad, Advanced Calculator and CityTime world clock—plus a few new ones, like Instant Lookup and a new and improved PhoneBook.
- 100% Palm OS compatible: runs the popular Palm OS so it's compatible with over 11,000 existing applications. Plus, beam information between other Palm-Powered devices and transfer data from your current Palm OS device to your new Treo communicator with ease.
- Treo comes with a USB HotSync® cable so you can instantly backup, update and exchange information between your communicator and desktop computer.
- Treo also comes with a rechargeable battery, 16 MB of memory and the fastest Palm OS processor.

### wireless messaging

- Send short SMS (Short Message Service) text messages to other SMS-enabled phones or any email address. Messages can be up to 160 characters in length.
- Create SMS messages in an instant with shortcuts like saved recipient lists, boilerplate text and signature preferences.
- Send and receive email using the included email application to connect to your business and personal email accounts (POP3-compatible).

### web browsing

- With wireless data services enabled and an ISP account, connect to the Internet with Blazer, the built-in web browser.
- With Blazer, web pages load an average of four times faster than with similar web browsers. You can even create bookmarks and cache pages for easy access.
- Access virtually any web site—not just those optimized for mobile access. Blazer supports multiple Web and wireless standards: HTML, WML, HDML, cHTML (i-mode) and XHTML.
- Blazer incorporates 128-bit SSL encryption technology to ensure that visiting any site on your Treo communicator is as secure as browsing from your desktop.
