This Philips digital baby monitor system, using DECT technology, ensures absolutely no interference from other systems and lets you get on with your work or simply relax by yourself or with friends. By clipping the ultra-compact Parent unit onto your belt you can easily move around the house and still always hear your baby, secure in the knowledge that your baby is sleeping soundly or playing happily. Ease of use due to Single Point Control: Control the system from where you are!

Zero Interference

100% Digital DECT 'cordless telephone technology' guarantees you hear only your baby and no distracting noise or the neighbour's child!

120 Channels

It continuously searches for and automatically selects a channel that is free from other baby monitors, taxis, police radios or anything else.

Privacy guaranteed

The unique and secure one-to-one connection means no one can eavesdrop on you.

Single-Point Control

You can remotely adjust the volume and sound sensitivity of the baby unit using simple controls on your parent unit.

Dect System Check

The continuous 100% digital two-way system check shows that you have contact and sounds an alarm if the contact is broken, so there's no need for a ticking clock to check if it is working.

Sound Level Lights

Even if the parent unit's volume is turned down you can still 'see' how loud your baby's sounds are.

Talk-back

Reassure your baby with the soothing tones of your voice without having to go upstairs.

Family Intercom

When your child gets older, you can still use the baby monitor as a two-way intercom so there's no need to shout the house down!

Night-light

A warm glowing light to make your baby feel secure.

Rechargeable batteries

Enjoy the convenience and savings of rechargeable batteries and a charging base for the parent unit.

Compact parent unit

Fits comfortably in your shirt or jacket pocket, or hangs on its handy belt-clip.

Wide operating range

You can move freely in and around your house within a range of around 50 metres indoors and up to 300 metres in ideal open-air conditions.

Adjustable sound sensitivity

Set the baby unit's sound sensitivity level to pick up the sounds you want to hear.

Two AC power adapters included

You can run both the baby unit and parent unit on mains power to save on batteries. Rechargeable batteries for Parent unit included. Baby unit batteries optional.

Battery back up

You can use the baby unit on batteries and on the mains. In case of mains failure it will automatically switch over to batteries (if batteries are installed).

Extra small antenna

Looks great and gives you all the range you need.

Charging base included

For quick and easy charging of the batteries.
