

HP recommends Windows Vista® Home Premium.

- A compelling 19-inch wide display with integrated speakers gives you a whole new PC experience. Use the
  touchscreen or the stylus to navigate through your entertainment or photos and even write notes or draw pictures
  on screen
- Create silkscreen-quality disc labels direct from your PC with LightScribe: Just burn, flip, burn.
- A large 500 GB hard drive gives you room to store all your digital media, while a TV tuner and remote control make this a total entertainment hub. The portable pocket media drive lets you store your media and take your personal playlist with you
- Use the display tilted for touchscreen, straighten to watch TV and slide it up for working. A slim keyboard can be stored away inside the chassis, while an integrated webcam and microphones let you use messaging and VoIP services to stay connected

Totally original design concept for a PC - sleek, stylish and elegant, this is a PC you won't want to hide away. Just one power cord for the whole unit makes it easy to install in any room and keeps your home clutter free

## HP TouchSmart IQ790.ukPC
