B5 Series  
All-in-One Desktop PC

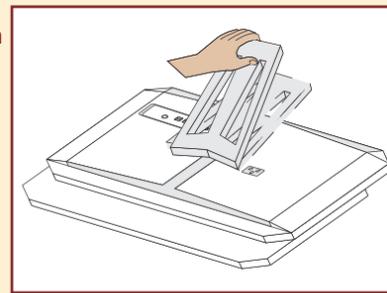

ideacentre

## Initial setup instructions

1) Adjust the angle for the best viewing experience. It can be rotated between 15 degrees and 35 degrees from the vertical position.

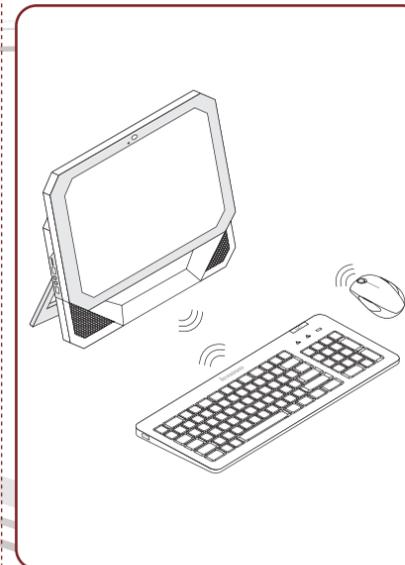

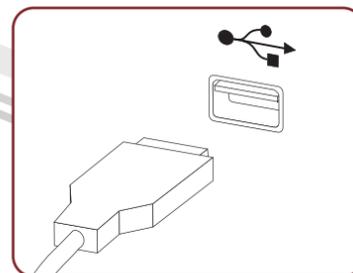

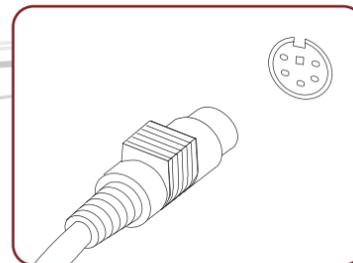

The computer stand must remain installed at all times to ensure maximum system stability. Make sure the angle of the computer is at least 15 degrees from the vertical position; otherwise the computer will be unstable and could fall over. To open the computer stand, refer to the illustration:

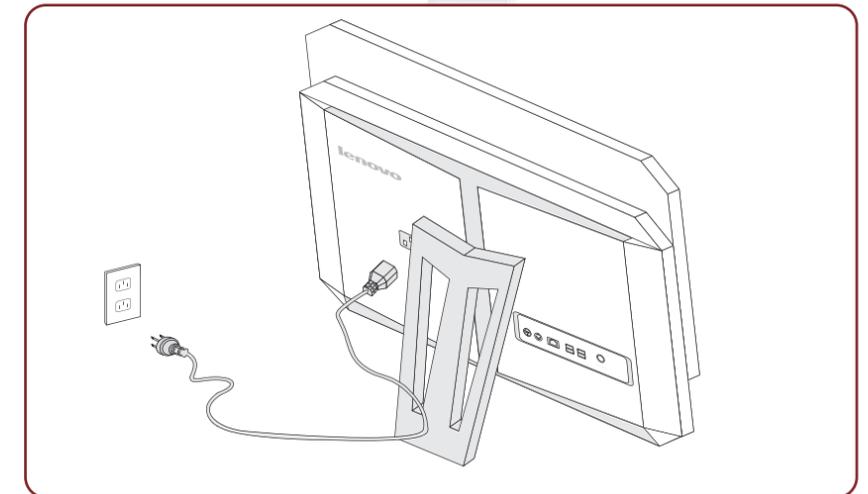

2) If the computer is configured with a wired keyboard and mouse, connect the keyboard and mouse cables to the appropriate keyboard (PS/2 connector) and mouse connectors (USB connector).

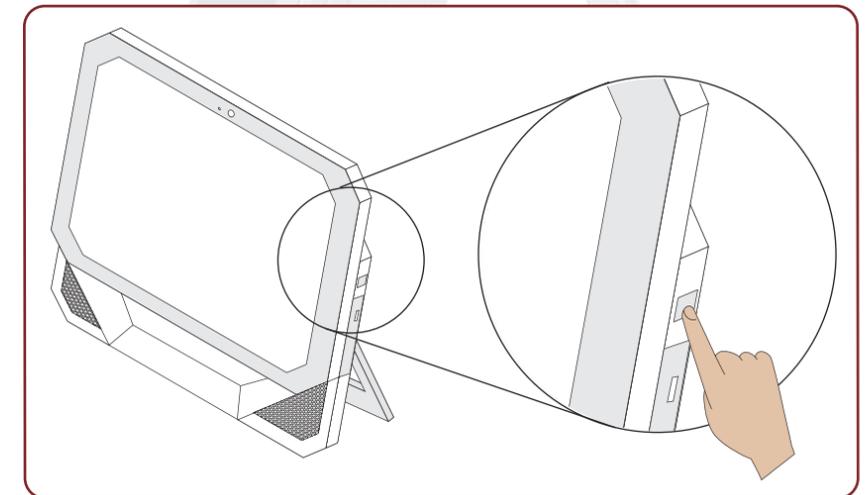

If the computer is configured with a wireless keyboard and mouse, setup the keyboard and mouse wireless connection. (For more details refer to the back of this poster).

3) Connect the power cord to the computer and the electrical outlet as shown below.

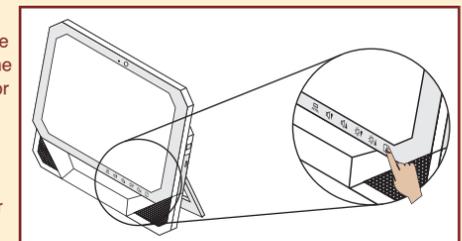

4) Press the power button on the side of the computer to turn it on.

## Touch buttons

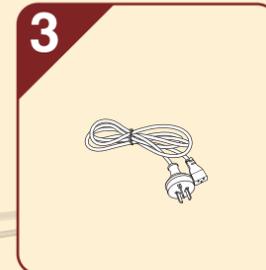

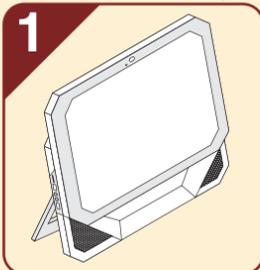

The buttons located at the bottom-right-side of the screen are touch buttons. Press on any of the buttons **ONCE** to turn the indicator light ON to activate them. The buttons remain active while the indicator light is ON. Now, press on any of the buttons to change settings as desired. The indicator light turns off automatically after 10 seconds of inactivity.

## Unpack

1. Computer 2. Mouse 3. Power cord 4. Keyboard 5. User manual 6. Remote control (Selected models only)

Version: 1.1

## Wireless keyboard and mouse configuration

### Method A

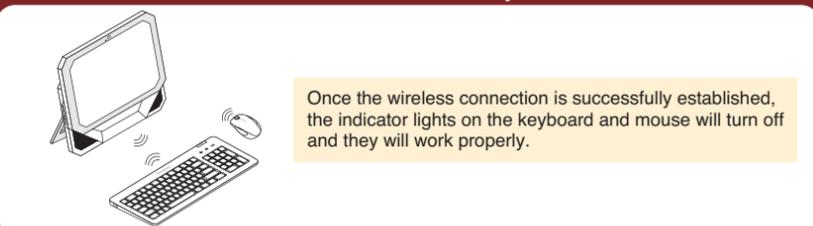

#### 1. Install the batteries.

#### 3. Press the wireless connect button.

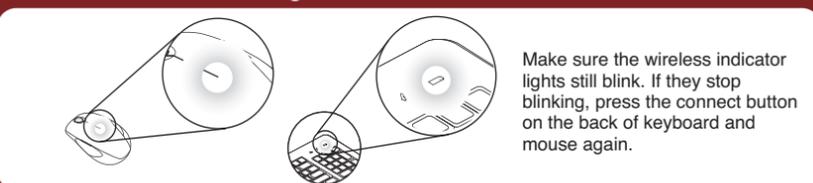

#### 5. Establish the wireless connection automatically.

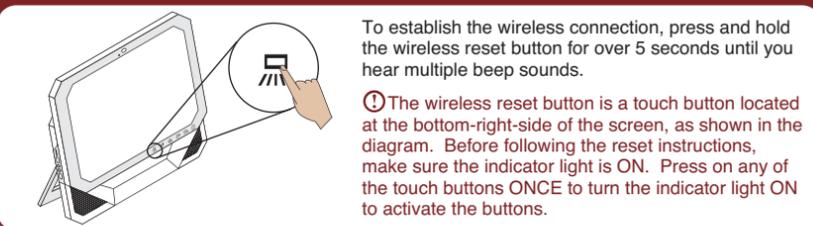

⚠ If the wireless keyboard and mouse fail to connect according to method A, follow method B:

### Method B

#### 1. Make sure the indicator lights blink.

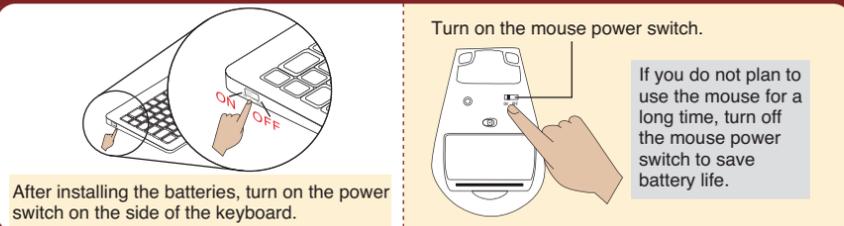

#### 2. Press the wireless reset button until wireless connection established.

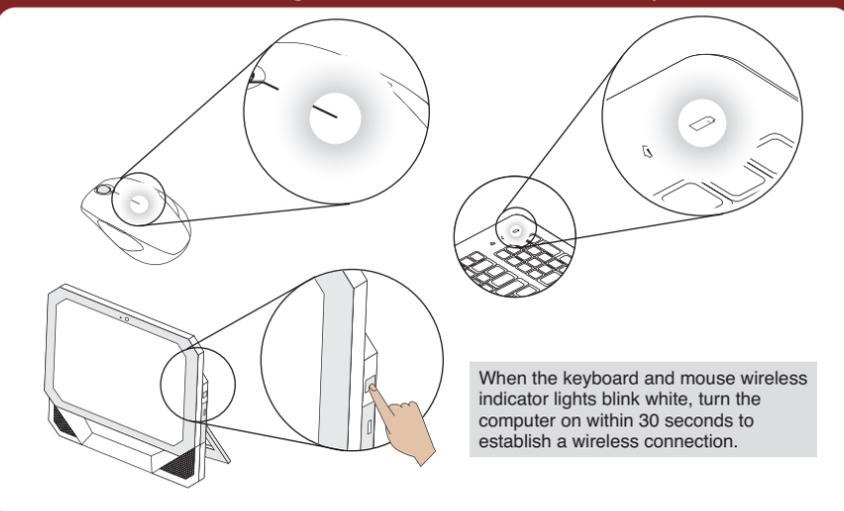

⚠ If connection is not established successfully, refer to "Wireless keyboard and mouse instructions" in the User Guide.

#### 2. Turn on the power switch.

#### 4. Make sure the indicator lights blink and then turn on the computer.

#### Notes:

- 1) When establishing a wireless connection, it is recommended to keep the distance from the keyboard/mouse to the computer less than 25 cm (10 inches)
- 2) The effective working distance of the wireless keyboard and mouse is 10 m (33 feet) (depending on the computer's working environment).

#### If the wireless device does not work, do the following:

1. Be sure there is no physical obstacle between the wireless device and the computer.
2. Restart the computer, and verify that the system devices are functional.
3. Repeat the procedure for establishing a Bluetooth connection.
4. Replace the batteries.
5. Do not place the computer under a metal surface or table.
6. Make sure there are no electronic devices close by, such as speakers, remote controls of electronic toys or mobiles, which might create high electromagnetic fields that could interrupt the wireless connection.
7. Place the keyboard, mouse and remote control the right way up.
8. Remove the batteries from the keyboard, mouse and remote control if you do not plan to use them for a long time.
9. If the batteries in the keyboard, mouse or remote control leak, clean the battery compartments as soon as possible and insert new batteries.
10. Use batteries of good quality to ensure the proper functioning of the remote control.
11. When battery power becomes low, the battery indicator light on the keyboard will change from orange to red.
