

# Dual Temp Faucet

product specifications

hot/cold drinking water faucet

Everpure Designer Dual Temperature hot/cold drinking water faucets deliver cold or ambient filtered water and near boiling instant hot water from a single spout. Exclusively designed to be used with the Everpure Solaria™ Instant Hot Water Dispenser and other vented instant hot systems, these faucets are equipped with a built-in safety feature with spring loaded shut off to prevent accidents. The cold side may be connected to the Everpure Polaria™ Water Chiller for refreshingly chilled drinking water or just simply enjoy ambient filtered water from any Everpure Drinking Water System. The Everpure Dual Temperature faucet features solid stainless steel construction and is available in two beautiful finishes. They are lead-free and feature a ceramic disc type valve for smooth functionality and lasting durability. Blue and red indicators on handles distinguish hot and cold sides.

Polished Stainless Steel

Everpure Designer Hot/Cold Drinking Water Faucets feature:

- > Sleek dual handle design
- > Solid Stainless Steel construction in two beautiful finishes
- > Spring loaded "hot" shut off valve safety feature
- > Insulated heat-resistant spout
- > Exclusively designed to be used with vented instant hot systems
- > 0.5 GPM flow
- > Lead-free
- > Ceramic disc type valve
- > Aerator tip provides even, clear stream of filtered water
- > RO compatible with the use of a separate air gap

## For commercial grade water filtration

### It's water filtration you can trust

The same commercial quality that makes Everpure the overwhelming choice for water filtration in restaurants is also available for your home. Everpure's exclusive precoat filtration technology combines Micro-Pure and a unique pleated filter membrane to reduce particles as small as 0.5 microns. This highly engineered design offers the largest filtering surface area, longer life and consistent performance.

### the pure solution

Our products polish water to premium quality so that water is sparkling and free of unwanted tastes and odors. You'll taste the difference in every sip and everything made with water will taste better, too.

### the convenient solution

Everpure systems are easily installed using common household tools. Our systems mount under your sink and are plumbed to a separate filter faucet. And cartridge replacement is easy, too — just like changing a light bulb.

Brushed Stainless Steel

### Everpure Dual Temperature Drinking Water Faucets are engineered to be used with:

- Any Everpure Drinking Water Filtration system or Reverse Osmosis System and
- Everpure Solaria™ Instant Hot Dispenser, model CGHE-1 and
- Everpure Polaria™ Water Chiller, model CGCL-1
