8 Digit Display Calculator

### **FEATURES**

**Large, 8-Digit Display** – big, easy-to-read LCD numbers.

**Four Function Memory** – includes addition, subtraction, recall, and clear.

**Dual Solar/Battery Power** – built-in solar panel extends battery life by powering the calculator in the light.

**Automatic Power Off** – saves battery power by turning off the calculator if it is left unused for about 7 min.

## **OPERATING THE CALCULATOR**

ON/C Key — Power ON / Clear LCD / Clear Entry. Power OFF after a few minutes if no button is pressed. If a result is too big to show in the LCD, the calculator stops and displays E. Press ON/C to continue.

+/- **Key** - Press to change the displayed number from positive (+) to negative (-) or from negative (-) to positive (+).**MINUS** - is displayed when the value is negative.

## **PERFORMING CALCULATIONS**

**Addition (+)** Example: 6 + 7 = 13 Press [6] [+] [7] [=] 13

**Subtraction (–)** Example: 10 - 4 = 6 Press [1] [0] [–] [4] [=] 6

**Multiplication (x)** *Example:* 7 x 5 = 35 Press [7] [x] [5] [=] *35* 

**Division (÷)** Example:  $14 \div 7 = 2$  Press [1] [4] [÷] [7] [=] 2

#### **MEMORY FUNCTIONS**

[M+] Press to add the displayed number to memory. **MEMORY** is displayed.

[M-] Press to subtract the currently displayed number from memory.

**[MRC]** Press once to display the number stored in the memory and twice to reset the memory to 0.

#### Percentages (%)

Calculate 6% of 200.

Press [2] [0] [0] [x] [6] [%] 12

Add 6% tax to a \$20 purchase.

Press [2] [0] [+] [6] [%] 21.2

Calculate 20% discount from \$150.

Press [1] [5] [0] [x] [2] [0] [%] 30

### **REPLACING THE BATTERY**

- 1. Remove the two screws on the rear panel. Using a flat edge, pry open the rear panel.
- 2. Slide out the old battery. Insert the new battery with the + side up.
- 3. Replace the rear panel.

# **CARE AND MAINTENANCE**

- Keep the calculator dry. If it gets wet, dry it before use.
- Do not use harsh solvents or detergents to clean the unit.
- Do not drop or strike the calculator.
