

# New Frontier Plotmaster Food Plot Seeders

**4-, 6-, 8-foot Food Plot Seeders**

## PREPARE THE SEEDBED

Heavy-duty notched disks turn the hardest soils into soft seed beds.

For superb results as well as aggressive tillage in all types of soil conditions, all Food Plot Seeder models come standard with 3 different types of ground engagement tools:

- A Turning points help prepare seedbeds that need residue buried.
- B Chisel spikes are for dry or rocky soil applications.
- C The sweep is best for repeat food plots or loose soil.

### FP1204 4-foot

The 4-foot Food Plot Seeder can be attached to either your tractor's Cat. I 3-point hitch or your utility vehicle with the available single point electric conversion kit. This turns your utility vehicle or ATV into a planting machine, perfect for wooded food plots or remote, hard to reach areas.

# er. Pack. All with one tool.

## PLACE THE SEED

The seed brush (A) allows you to drop almost any kind of seed and will deliver seed, including grass seed and hard-to-plant seed blends, under varied conditions (Seed brush shown without protective shield. Always operate machine with seed brush shield in place). Adjustable scatter plates (B) allow you to set the angle of dispersion for accurate seed placement, reducing seed cost by placing seed only where you want it.

### FP1206 6-foot

Step up to the FP1206 to get a second row of S-tines for increased tillage action. Both the FP1206 and FP1208 have 18-inch notched disk blades.

## FINISH THE SOIL

Once the seed hits the ground, the flexible metal grating drag levels the soil and covers the seed for uniform soil contact. You can choose between three covering options. Drag only, drag with roller on top and roller only. The FP1206 and FP1208 feature a handle to easily flip the roller over.

### FP1208 8-foot

With a full 8-foot seeding width, you can cover ground quickly with the FP1208. Twelve notched disk blades and 9 S-tines give you maximum tillage and seedbed preparation.

**Rugged. Reliable. Ready.**

**The new Frontier Plotmaster Food Plot Seeder is a one-pass tilling and seeding machine.**

Heavy-duty notched disks and spring steel S-tines with plow tips give you perfectly tilled soil to plant your seeds. Once you have prepared the seedbed, a flip of a switch from your seat engages the Versa Seeder™ delivery system.

These versatile machines are available in 4-, 6-, and 8-foot models to work with 20- to 100-horsepower tractors and utility vehicles (FP1204 only). Simply put, the new Frontier Food Plot Seeder gets the job done faster and more efficiently.

For food plots and garden plots, hook one up to your tractor and all the planting help you'll ever need is right behind you.

**Best of all**, these Frontier tools are backed by John Deere, the most trusted name in farm, ranch, and landscape equipment. To help you choose the right Frontier Food Plot Seeder, talk to your local John Deere dealer, your exclusive source of Frontier Equipment.
