### NOTES ON HANDLING THE OPTICAL PICK-UP BLOCK OR BASE UNIT

The laser diode in the optical pick-up block may suffer electrostatic break-down because of the potential difference generated by the charged electrostatic load, etc. on clothing and the human body.

During repair, pay attention to electrostatic break-down and also use the procedure in the printed matter which is included in the repair parts.

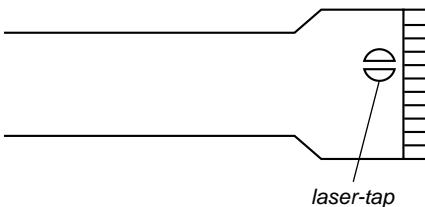

The flexible board is easily damaged and should be handled with care.

### NOTES ON LASER DIODE EMISSION CHECK

Never look into the laser diode emission from right above when checking it for adjustment. It is feared that you will lose your sight.

### NOTES ON HANDLING THE OPTICAL PICK-UP BLOCK (KMS-241C/J1NP).

The laser diode in the optical pick-up block may suffer electrostatic break-down easily. When handling it, perform soldering bridge to the laser-tap on the flexible board. Also perform measures against electrostatic break-down sufficiently before the operation. The flexible board is easily damaged and should be handled with care.

**OPTICAL PICK-UP FLEXIBLE BOARD**

#### Notes on chip component replacement

- Never reuse a disconnected chip component.
- Notice that the minus side of a tantalum capacitor may be damaged by heat.

#### Flexible Circuit Board Repairing

- Keep the temperature of the soldering iron around 270 °C during repairing.
- Do not touch the soldering iron on the same conductor of the circuit board (within 3 times).
- Be careful not to apply force on the conductor when soldering or unsoldering.

#### CAUTION

Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

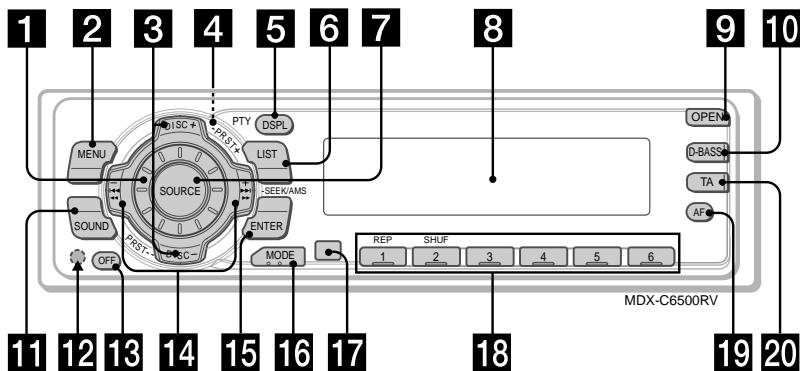

#### SAFETY-RELATED COMPONENT WARNING!!

**COMPONENTS IDENTIFIED BY MARK ▲ OR DOTTED LINE WITH MARK ▲ ON THE SCHEMATIC DIAGRAMS AND IN THE PARTS LIST ARE CRITICAL TO SAFE OPERATION. REPLACE THESE COMPONENTS WITH SONY PARTS WHOSE PART NUMBERS APPEAR AS SHOWN IN THIS MANUAL OR IN SUPPLEMENTS PUBLISHED BY SONY.**

# Connections

## Cautions

- This unit is designed for negative ground 12 V DC operation only.
- Be careful not to pinch any wires between the screw and the body of the car, or this unit, or between any moving parts such as the seat railing, etc.
- Connect the power connecting cord ② to the unit and speakers before connecting it to the auxiliary power connector.
- Run all ground wires to a common ground point.
- Connect the yellow cord to a free car circuit rated higher than the unit's fuse rating. If you connect this unit in combination with other stereo components, the car circuit they are connected to must be rated higher than the sum of the individual components' fuse rating. If there are no car circuits rated as high as the unit's fuse rating, connect the unit directly to the battery. If no car circuits are available for connecting this unit, connect the unit to a car circuit rated higher than the unit's fuse rating in such a way that if the unit blows its fuse, no other circuits will be cut off.

# Conexiones

## Precauciones

- Esta unidad ha sido diseñada para alimentarse con 12 V CC, negativo a masa, solamente.
- Tenga cuidado de no atrapar ningún cable entre algún tornillo y la carrocería del automóvil o esta unidad o entre las partes móviles, como por ejemplo los raíles del asiento, etc.
- Conecte el cable de conexión de alimentación ② a la unidad y los altavoces antes de conectarlo al conector de alimentación auxiliar.
- Conecte todos los conductores de puesta a masa a un punto común.
- Conecte el cable amarillo a un circuito libre del automóvil de potencia nominal superior a del fusible de la unidad. Si conecta esta unidad en combinación con otros componentes estéreo, la potencia nominal del circuito del automóvil a los que dichos componentes están conectados debe ser superior a la suma de la potencia nominal del fusible de los componentes. Si no existen circuitos de automóvil de potencia nominal tan alta como la del fusible de la unidad, conecte ésta directamente a la batería. Si no hay circuitos de automóvil disponibles para conectar esta unidad, conecte la misma a un circuito de automóvil de potencia nominal superior a del fusible de la unidad de forma que no se desactiven otros circuitos si el fusible de dicha unidad se funde.

# Anslutning

## Säkerhetsföreskrifter

- Denna bilstereo är endast avsedd för anslutning till ett negativt jordat, 12 V batteri.
- Vår nog med att inga kablar klämmer mellan någon skruv eller att de blir klämpta mellan rörliga delar som tex. bänkstödet.
- Anslut strömkabeln ② till enheten och högtalarna innan du sätter den till den yttersta strömlänslingen.
- Dra samtidigt jordledningar till en och samma jordningspunkt.
- Anslut den gula kabeln till ledig bilkrets med en högre ampera utseende. Om du sätter kopplar enheten till andra stereokomponenter måste den bilkrets de kopplas till ha en högre ampera än summan av de enskilda delarnas amperstrykta. Om det inte finns några bilkretsar med en så hög amperstrykta som enheten ska du ansluta enheten direkt till batteriet. Om inga bilkretsar finns för anslutning till enheten ska du istället anslut till en bilkrets med en högre ampera än enhetens stryka så att inga andra säkringar går om enheten säkring smälter.

# Ligações

## Advertência

- Este aparelho foi concebido para funcionar somente com corrente contínua de 12 V com negativo à massa.
- Tenha cuidado para que os fios não fiquem entalados entre os parafusos e a carroceria do automóvel ou a caixa do aparelho nem entre as peças móveis, por exemplo, as calhas dos bancos, etc.
- Ligue o cabo de alimentação de corrente ao aparelho e aos alto-falantes antes de ligar ao conector de corrente auxiliar.
- Ligue todos os fios de terra a um ponto de massa comum.
- Ligue o cabo amarelo a um circuito eléctrico livre do automóvel, cuja tensão seja superior a dos fusíveis do aparelho. Se ligar este aparelho em série com outros componentes estéreo, a tensão do circuito eléctrico do automóvel onde os ligar tem de ser superior à soma das tensões dos fusíveis de todos os componentes individuais. Se não houver nenhum circuito eléctrico do automóvel com uma tensão mais elevada como a dos fusíveis do aparelho, ligue-o diretamente à bateria. Se não estiver disponível nenhum circuito eléctrico do automóvel para ligação deste aparelho, ligue-o a um circuito eléctrico do automóvel com uma potência nominal superior a dos fusíveis do aparelho, de tal modo que se o aparelho rebentar os fusíveis respetivos, nenhum outro circuito seja cortado.

# Подсоединение

## Предостережения

- Данная автомагнитола предназначена для подключения только к 12-вольтному аккумулятору постоянного тока с заземлением минуса на массу.
- Следите за тем, чтобы не засунуть, какие-либо провода между винтом и корпусом автомобилей или магнитолы либо между подвижными частями в салоне автомобиля, например, передним сиденьем и металлическими направляющими рельсами под ним.
- Подсоедините в шнур питания ② сначала к магнитоле и громкоговорителям, а уже потом - к контактам внешнего источника питания.
- Подведите все провода заземления к одной и той же точке заземления.
- Подсоедините жгут проводов с способной к электротяге в автомобиле с большой силой тока там, на которую рассчитан предохранитель-магнитолы. Если Вы подсоедините эту магнитолу в соединении с другими компонентами стереосистемы, сумма тока в электротяге автомобилей, к которой они подключены, должна быть больше суммы значений силы тока, на которую рассчитаны предохранители отдельных компонентов. В случае отсутствия в автомобиле контура со столь же высокой силой тока, как та, на которую рассчитан предохранитель-магнитолы, подсоедините магнитолу напрямую к аккумулятору. В случае если в автомобиле нет свободных электротяг для подсоединения магнитолы, подсоедините ее к автомобилев электротяге с силой тока выше того значения, на которое рассчитан предохранитель магнитолы, таким образом, чтобы если он перегорит, другие цепи не прервались.

## Notes of connection example

### Notes on the control and power supply leads

- The power aerial lead (blue) supplies +12 V DC when you turn on the tuner or when you activate the AP (Alternative Frequency), TA (Traffic Announcement) function.
- A power aerial without a relay box cannot be used with this unit.
- When your car has built-in FM/MW/LW aerial in the rear/side glass, it is necessary to connect the power aerial control lead (blue) to the power terminal of the existing aerial booster. For details, consult your dealer.

### Warning

If you have a power aerial without a relay box, connecting the unit with the supplied power connecting cord ② may damage the aerial.

### Memory hold connection

When the yellow power input lead is connected, power will always be supplied to the memory circuit even when the ignition switch is turned off.

### Notes on speaker connection

- Before connecting the speakers, turn the unit off.
- Use speakers with an impedance of 4 to 8 ohms, and with adequate power handling capacities. Otherwise, the speakers may be damaged.
- Do not connect the terminals of the speaker system to the car chassis, and do not connect the terminals of the right speaker with those of the left speaker.
- Do not attempt to connect the speakers in parallel.
- Do not connect any active speakers (with built-in amplifiers) to the speaker terminals of the unit. Doing so may damage the active speakers. Therefore, be sure to connect passive speakers to these terminals.

### Warning when installing in a car without ACC (accessory) position on the ignition key switch

Be sure to press ④ on the unit for two seconds to turn off the clock display after turning off the engine. When you press ④ only momentarily, the clock display does not turn off and this causes battery wear.

## Notas de ejemplo de conexiones

### Notas sobre los cables de control y de suministro de alimentación

- El conductor (azul) de control de la antena motorizada suministra +12 V CC al encender el sintonizador o al activar la función AP (Frecuencias alternativas) o TA (Anuncio de tráfico).
- Con esta unidad no podrá utilizarse una antena motorizada sin caja de relé.
- Si el automóvil dispone de una antena de FM/MW/LW incorporada en el cristal trasero/lateral, será necesario conectar el cable de control de antena motorizada (azul) o el cable de entrada de alimentación auxiliar (rojo) al terminal de alimentación del amplificador de antena existente. Para obtener información detallada, consulte a su proveedor.

### Advertencia

Si dispone de una antena motorizada sin dispositivo de relé, la conexión de esta unidad con el cable de conexión de alimentación ② suministrado puede dañar la antena.

### Conexión para protección de la memoria

Si conecta el conductor de entrada amarillo, el circuito de la memoria recibirá siempre alimentación, incluso aunque ponga la llave de encendido en la posición de apagado.

### Notas sobre la conexión de los altavoces

- Antes de conectar los altavoces, desconecte la alimentación de la unidad.
- Utilice altavoces con una impedancia de 4 a 8 ohmios, y con la potencia máxima admisible adecuada, ya que de lo contrario podría dañarlos.
- No conecte los terminales del sistema de altavoces al chasis del automóvil, ni los del altavoz izquierdo a los del derecho.
- No intente conectar los altavoces en paralelo.
- No conecte altavoces activos (con amplificadores incorporados) a los terminales de altavoces de la unidad. Si lo hiciera, podría dañar tales altavoces.

### Advertencia sobre la instalación en un automóvil que no dispone de posición ACC (accesorios) en el interruptor de la llave de encendido

Asegúrese de pulsar ④ en la unidad durante dos segundos para desactivar la indicación del reloj después de apagar el motor. Si pulsa ④ sólo momentáneamente, la indicación del reloj no se desactivará y esto causará el desgaste de la batería.

## Att observera angående anslutningsexemplen

### LEDningarna för styrning och strömförslösning

- Motorantennens strökkabel (blå) levererar +12 V DC när du slår på radien och när du aktiverar antennens funktioner AP (alternativ frekvens) eller TA (trafikannonseringen).
- Ett motorantennens aktivitetsströmkabel kan inte anslutas till denna bilstereo.
- Om bilen har en FM/MW/LW-antenn i baksidan/bak- eller sidofönstret måste du ansluta motorantennens strökkabel (blå) till strömkabeln för tillbehör (röd) till strömturbinerna på den befintliga antennförstärkaren. Ditt återstående kabel med en högströmssäkring ska du ansluta till den befintliga antennförstärkaren.

### Varning

Om du har en motorantenn utan relékabel antennen skadas om du ansluter enheten med den medföljande strömkabeln ④.

### Anslutning för minnesstöd

När du ansluter den gula ledningen strömkabeln förslöjs minnesstöden med strömkabelna tiden, även när ihållsels släps ifrån.

### Att observera angående högtalarnas anslutning

- Slå av bilstereo innan du ansluter högtalarna.
- Anslut enlast högtalare, vars impedans varierar från 4 till 8 ohm och som har tillräcklig effektdelsträngskapacitet för att skydda högtalarna mot skador.
- Anslut inte något av högtalarna till bänks chassi. Anslut inte heller uttagen på höger högtalare till uttagen på vänster högtalare.
- Anslut inte högtalarna parallellt.
- Anslut inte aktiva högtalare (med inbyggd slutspel) till bilstereos högtalarruttag, eftersom det kan skada de aktiva högtalarna. Var noga med att bara ansluta passiva högtalare till dessa uttag.

### Var försiktig när du gör installationen i en bil

tändningslåset saknar tillbehörläsläge (ACC). Glöm inte att stänga av klockvisningen när du har stängt av motorn. Du stänger den genom att trycka på ④ på enheten under två sekunder. Om du bara trycker på ④ ett kort ögonblick släcker inte klockan tuckenfönster, vilket leder till att batteriet läddas ur.

### Aviso sobre a instalação num automóvel sem posição ACC (acessórios) na chave de ignição

Carregue em ④ no aparelho durante dois segundos para desligar o relógio depois de desligar o motor. Se carregar em ④ menos de dois segundos, o visor do relógio não se apaga e o que provoca o desgaste da bateria.

## Notas sobre o exemplo de ligação

### Notas sobre os fios de controlo e o cabo de alimentação

- O fio de controlo da antena eléctrica (azul) fornece +12 V CC quando ligar o sintonizador ou quando activar a função AP (Frequências alternativas), TA (Informações sobre o trânsito).
- Com este aparelho, não pode utilizar uma antena eléctrica sem relé.
- Se o automóvel tiver uma antena FM/MW/LW integrada no vidro traseiro/lateral, é necessário ligar o fio de controlo da antena eléctrica (azul) ou o cabo de alimentação para acessórios (vermelho) ao terminal eléctrico do amplificador de sinal de antena existente. Para mais informações, consulte o seu agente.

### Atenção

Se a antena eléctrica não tiver uma caixa de relé, o facto de ligar este aparelho ou o cabo de alimentação ④ fornecido, pode provocar danos na antena.

### Ligação para alimentação contínua da memória

Quando o fio amarelo de entrada de alimentação for ligado, os circuitos de memória ficarão com alimentação contínua, mesmo se a chave de ignição estiver desligada.

### Notas sobre a ligação dos alto-falantes

- Antes de ligar os alto-falantes, desligue o aparelho.
- Utilize alto-falantes com impedância de 4 a 8 ohm e com capacidade admissível de potência adequada. Caso contrário, os alto-falantes poderão sofrer avaria.
- Não ligue os terminais do sistema de alto-falantes no chassis do automóvel e não ligue os terminais do alto-falante direito aos terminais do alto-falante esquerdo.
- Não tente ligar os alto-falantes em paralelo.
- Não ligue nenhum sistema de alto-falantes ativos (com amplificadores incorporados) aos terminais dos alto-falantes do aparelho. Se o fizer, podeavar o sistema de alto-falantes ativos. Portanto, não se esqueça de ligar os alto-falantes passivos a estes terminais.

### Notas sobre a instalação num automóvel sem posição ACC (acessórios) na chave de ignição

Carregue em ④ no aparelho durante dois segundos para desligar o relógio depois de desligar o motor. Se carregar em ④ menos de dois segundos, o visor do relógio não se apaga e o que provoca o desgaste da bateria.

## Примечания к примеру подсоединения

### Примечания к проводам управления и электропитания

- По (синему) проводу питания антенны с электрическим приводом осуществляется подача постоянного тока напряжением +12 вольт при включении Вами радиоприемника или задействовании функции АР (альтернативные частоты), ТА (дорожные сообщения).
- Электропривод антенны, не снабженный релейным блоком, с данным магнитолой использовать нельзя.

В случае если Ваш автомобиль оснащен УКВСВЧ антенной, встроенной в заднее боковое стекло, необходимо подсоединить провод управления электроприводом антенны (синий) или дополнительный провод питания на автомобилев электротяге (красный) к гнезду питания на автомобилев питательном усилителе.

### Предостережение

Если Вы используете электроприводную антенну без релейного блока, подсоединение данной магнитолы подразумевает присоединение шнурка питания (синий) или дополнительный провод питается на автомобилев питательном усилителе.

### Подсоединение для поддержки памяти

Когда к магнитоле подсоединен желтый электрический провод, блок памяти будет постоянно получать питание, даже при выключенном зажигании.

### Подсоединение громкоговорителей

- Прежде чем подсоединить громкоговорители, выключите магнитолу.
- Используйте громкоговорители с полным сопротивлением 4-8 Ом, обладающие способностью принимать досгточно мощный сигнал. В противном случае они могут быть повреждены.

• По подсоединеному контакту гнездо громкоговорителя к шасси автомобиля и на соединительной гнезды правого громкоговорителя с гнездами левого.

• Не пытайтесь подсоединять громкоговорители параллельно.

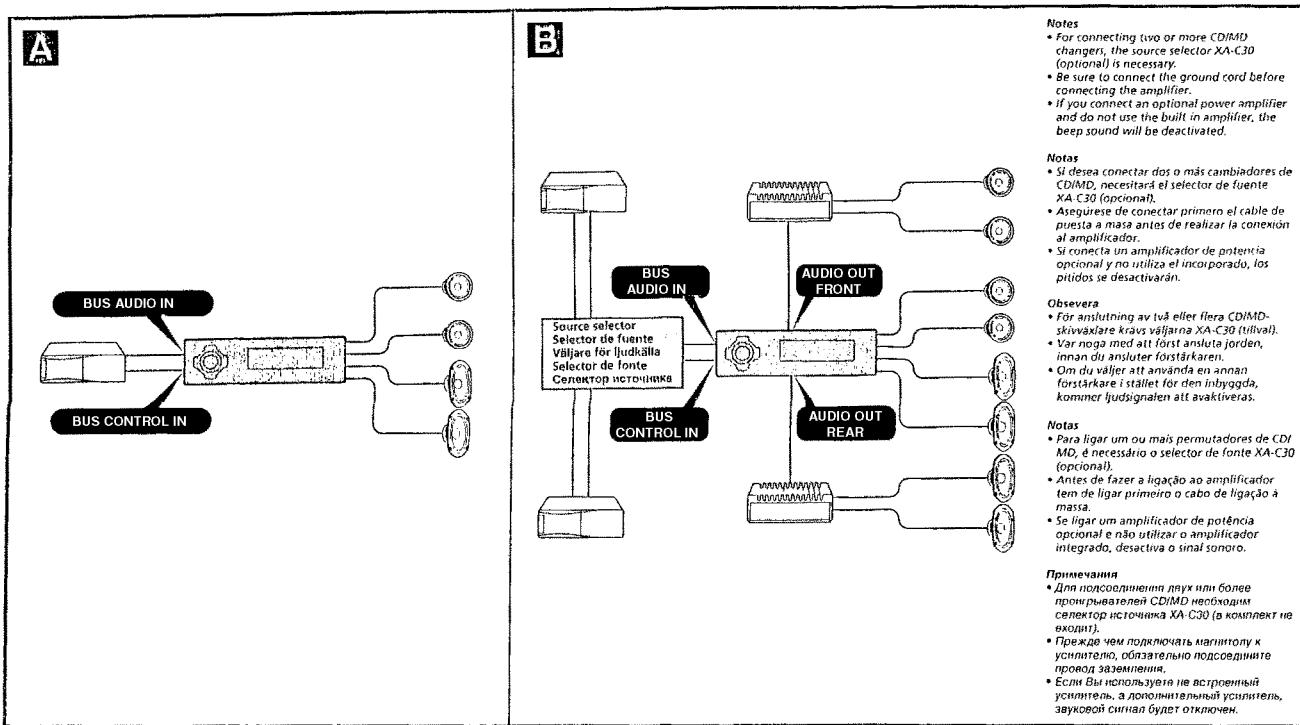

- Не подсоединяйте к магнитоле громкоговорители, которые не были активны (встроенные громкоговорители), поскольку это может привести к повреждению последних.

Убедитесь в том, что подсоединеные громкоговорители относятся к пассивному типу.

### Предостережение относительно аппаратуры, установленной в автомобиле, замок зажигания в котором не имеет отдельного положения (ACC) для отключения подсоединеной аппаратуры.

После выключения двигателя не забывайте нажимать на две секунды кнопку ④ на приемнике, чтобы отключить циферблatt часов. При слишком коротком нажатии ④ циферблatt не отключается, что может привести к разрядке аккумуляторной батареи.

## Power connection diagram

Auxiliary power connector may vary depending on the car. Check your car's auxiliary power connector diagram to make sure the connections match correctly. There are three basic types (illustrated below). You may need to switch the positions of the red and yellow leads in the car stereo's power connecting cord. After matching the connections and switched power supply leads correctly, connect the unit to the car's power supply. If you have any questions and problems connecting your unit that are not covered in this manual, please consult the car dealer.

## Diagrama de conexión de alimentación

El conector de alimentación auxiliar puede variar en función del automóvil. Compruebe el diagrama del conector de alimentación auxiliar del automóvil para asegurarse de que las conexiones coinciden correctamente. Existen tres tipos básicos (ilustrados a continuación). Es posible que sea necesario cambiar las posiciones de los cables rojo y amarillo del cable de conexión de alimentación del sistema estéreo del automóvil. Después de hacer coincidir correctamente las conexiones y los cables de alimentación comutada, conecte la unidad al suministro de alimentación del automóvil. Si desea realizar alguna consulta o solucionar algún problema referentes a la conexión de la unidad que no aparezcan en este manual, consulte con el concesionario automovilístico.

## Strömanslutningsschema

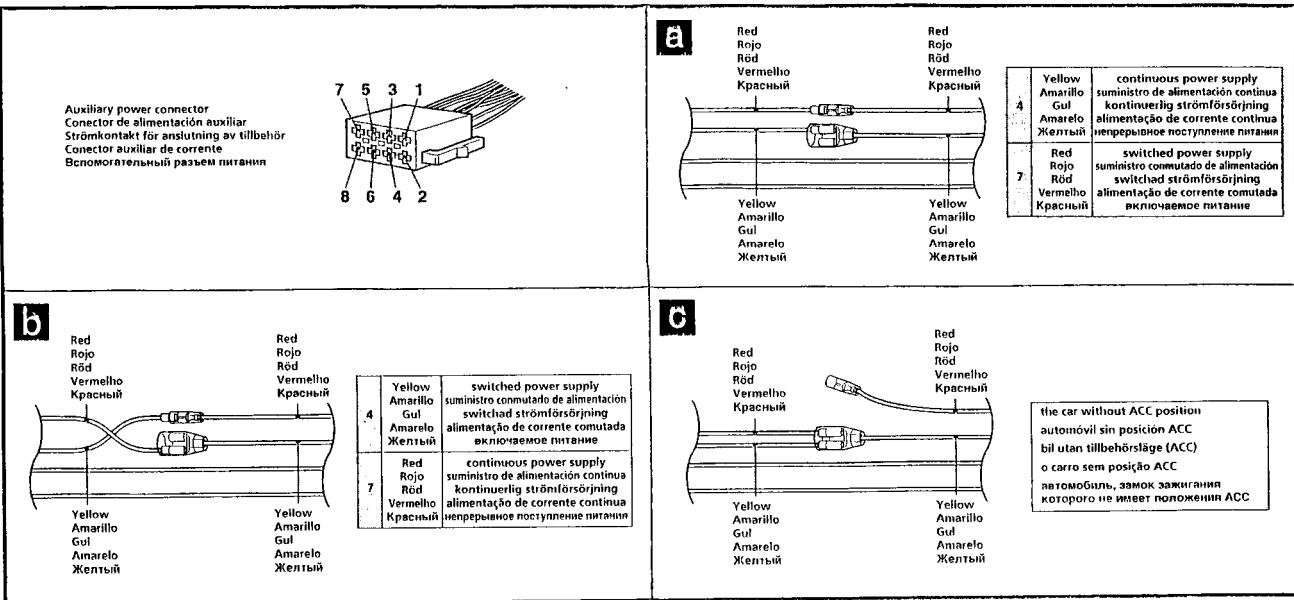

Kontakten för anslutning av tillbehör varierar från bil till bil. Kontrollera hur bilens anslutningskontakt är konstruerad så att du ansluter på rätt sätt. Det finns tre grundläggande typer (visas nedan). Du kan eventuellt behöva växla plats mellan de röda och gula ledningarna i bilstereoens strömkabel. Passa ihop ledningarna korrekt och anslut sedan enten till bilens strömanslutning. Om du får problem eller har frågor som inte besvaras i den här bruksanvisningen kan du kontakta Bilälsforsäljaren.

## Diagrama de ligação de corrente

O conector auxiliar de corrente pode variar de carro para carro. Verifique o diagrama do conector auxiliar de corrente para se certificar de que as ligações estão bem feitas. Existem três tipos de conectores (ilustrados abaixo). É possível que tenha de trocar as posições dos fios vermelho e amarelo do cabo de alimentação do autorádio. Depois de fazer a correspondência correcta entre as ligações e os calos de alimentação comutada, ligue o aparelho à fonte de alimentação do carro. Se houver alguma dúvida ou problema relacionado com o aparelho que não esteja incluído neste manual, consulte o concessionário.

## Схема подключения питания

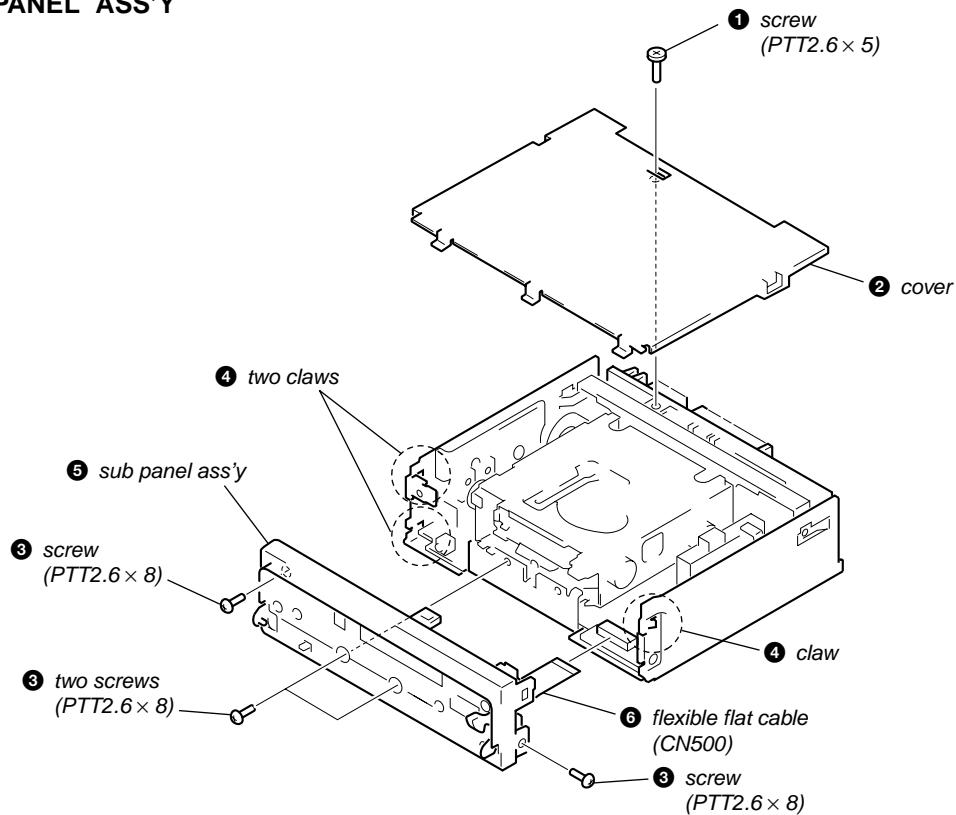

В разных автомобилях могут использоваться разные разъемы вспомогательного питания. Для того чтобы убедиться в правильности подсоединения, обязательно сверьтесь со схемой разъема подключения вспомогательного питания Вашего автомобиля. Есть три основных типа (как показано на рисунке ниже). Возможно, при подключении Вам придется поменять местами красный и желтый провода соединительного кабеля питания стереосистемы. После проверки соответствия разводки разъемов автомобильного электропитания и проводов питания машины обратитесь в магазин или к автомобильному консультанту. Если у Вас возникли какие-либо вопросы или проблемы, связанные с подключением магнитолы, которые не рассматриваются в настоящем руководстве, обратитесь за советом к дилеру автомобильной фирмы.
