

JVC GR-DVL167

Create with this JVC GR-DVL167 high-band digital video camera. In this supreme device the slim and nifty design is combined with the high functionality. Auto White Balance adjusts for different indoor light sources so that colors appear natural. Manual White Balance is useful when shooting under various types of lighting. Digital Image Stabilizer helps eliminate camera shake. Snapshot mode freezes an image, frames it with a white border (like a still photograph) or a drop-shadow, and even adds an accompanying camera shutter sound effect. Iris Lock function allows the iris to be locked so that after focusing on a close subject, even when the subject moves away, the image will not darken. Use it when shooting a moving subject, when zooming, when the subject changes its distance (thus its size in the LCD monitor or the viewfinder), or when you want to lock the brightness level.
