

TXB46 / TXB75

A stand for better videos

The Softpan3 was designed for ultimate Camcorder performance. Featuring a 2-way fluid head with bubble level, the Softpan3 lets you pan and tilt smoothly in one single action. The center post is also tension – adjustable to allow for smooth camera elevation without the jitters. And if you want to catch some action away from the tripod, just detach the quick release mounting platform and take the camcorder without the rest of the tripod.

Note: The extended height of TXB46 is 56.5”
