New Software Version
for FFD 3.5" Ultra Wide SCSI

Description

Software version 1.32 has been released for the FFD 3.5" Ultra Wide SCSI, which replaces software version 1.31. Major changes include:

- Execution of each Sanitize requirement in one command/interrupt
- Faster Security Erase and Sanitize procedures
- "Strong" Erase (erase operation repeated up to 16 times)
- Additional Sanitize procedure based on IRIG-06 requirements

Ordering Information

The ordering information is as follows:

Product	Capacity (MB)	Updated Ordering Information

FFD 3.5" Ultra Wide SCSI	All capacities	FFD35US-CCCCC-T-Pxx
		
		CCCCC: Indicates disk capacity
		T: Indicates operating temperature range:
		       Blank: Commercial 0°C to +70°C
		       N: Enhanced -25°C to +75°C
		       X: Extended -40°C to +85°C
		Pxx: Indicates the connector number:
		       P86: 68 pin connector
		       P80: 80 pin connector

Reason for Change

The additional data security features make FFD 3.5" Ultra Wide SCSI even more secure, and suitable for a broader range of applications.

Availability

FFD 3.5" Ultra Wide SCSI with software version 1.32 will be shipped from June 2003. Customers that prefer the previous version for new ordered units should notify M-Systems, and special ordering information will be provided.

How to Contact Us

Please contact your M-Systems representative or visit the FFD web page on the M-Systems website (www.m-sys.com) for any further information or assistance.
