- Suction line heated for solid shortening
- Nickel plated steel wand assembly with non-heat conducting handle for returning filtered oil to frypot
- Filter starter kit: filtration powder sample, 25 sheets filter paper, clean-out rod, cleaning brush

Options & Accessories

Crumb tray

Specifications

Specifically designed to filter oil from any 50-lb Frymaster or Dean Fryer

Frymaster portable filters are easy to use and are specifically designed to extend oil life by filtering out sediment and oil breakdown products, extending oil life and contributing to the consistent production of great tasting fried foods.

Standard 12" x 18" (305 x 457 mm) Filter Magic® filter paper and Filter Magic powder are required to effectively filter 50 lbs. of oil in five minutes from start to finish.

Independent heat keeps the suction line open and free flowing when solid shortening is used. The pump filters from the bottom so there is minimal oil heel left after filtration.

The PF50R model comes with a reversible pump which can be used to both remove oil and refill any manufacturer's 50-lb fryer.
