- Number of Video / FM Audio / Flying Erase Heads: 2 / 0 / 0
- Play: +1, Repeat
- Still Features: Standard
- Index Related Functions: Next / Previous Index Search
- Head Cleaning: Automatic
- Tape Length Recognition: Automatic
- Tape Counter: Linear Relative (h.m.s), Tape Position Indicator, Time Left (h.m)
- Winding / Rewinding Time (E180): <65 sec.

Programming

- Number of Events: 8/year
- Programming Mode: One Touch Recording, Manual Timer
- Record Control & Transmitter Identification: PDC, VPS (not for /39)
- Record Link: External 1

General

- Voltage: 198 - 264 V
- Frequency: 50Hz
- Standby Power Cons.: <5 W
- Backup Presets: 1yr
- Backup Clock - Calendar - Timer Event: 1mn
- Packaging - W x D x H in mm: 438 x 432 x 459
- Equipment Supplied: Batteries for RC

Product Highlights

• SMART Picture

Smart Picture puts you in control and gives you the chance to adjust the picture quality to your personal taste.

You can adapt the picture rendition to the quality of tape used or the tape content itself. You can, for instance, filter out the noise of a poor rental tape or increase the details on a high quality recording.

• SMART Clock

The Teletext contains an extremely precise time information. Your TV-VCR Combi knows that and during the installation, it automatically reads out this precious information. You can then use your Combi as the clock reference in your home, as the time is readjusted every day. You don't even have to worry about changing from summer to wintertime.

• 2 Tuners Record & View

A TV-Video Combi equipped with 2 separate tuners allows me to tune one tuner to the programme I want to record and the other one to the programme I want to see. I can zap without influencing what's being recorded on tape.

• Record Link

„Record link“ is the answer if you want to record a programme from your satellite receiver or any other external device when you are not at home. To prepare for a recording only the timer of the satellite receiver needs to be programmed. The TV-Video Combi will automatically detect the activation of the satellite receiver via the Scart cable connection and will start recording simultaneously. If the receiver gets deactivated again, the recording will also stop.

• New Turbo Drive deck

The new Turbo Drive deck offers:

Speed

65-second ultra fast rewind speed.

Reliability

To guarantee an optimum reliability, the heads are automatically cleaned each time a cassette is inserted or ejected.

Intelligence

The Tape Position Indicator, in wind and re-wind situations, displays the accurate position of the tape on the screen and indicates progress by means of a moving/blinking arrow. At any time, you can follow the tape movement on the screen.
