**VACUUM CLEANER
ASPIRATEUR**

- Expansion`pipe / Tuyau extensible
- Floor Nozzle / Brosse
- Turbine Brush / Brosse de turbine

HOUSEHOLD USE ONLY
USAGE MENAGER SEULEMENT

Thank you for your purchase of the Sanyo Vacuum Cleaner.
Please read these instructions carefully before using.

A FEW PRECAUTIONS

1. Operating without the filter in place will allow dust to enter the motor and could damage the vacuum cleaner.
2. Keep the vacuum cleaner away from stoves and other heat sources. Heat can deform and discolor the plastic parts of the unit.
3. Keep the vacuum cleaner free of insecticides. Do not wipe with benzine, thinner, petrol or other oils which might cause discoloration or cracking. To clean the body and hose, dampen a cloth with a mild detergent and wipe clean.
4. Blocking the suction inlet or allowing the dust to clog the hose will decrease the efficiency of the motor.
5. Never try to vacuum the following objects. They may damage the unit or cause a fire.
 - * Wet things, mud, soil, and fluids
 - * Burning cigarettes
 - * Needles and razor blades
 - * Inflammable materials such as gasoline and thinner
6. The following kinds of treatment shorten hose life:
 - * Bending hose at an acute angle when storing
 - * Pulling the hose with excessive force
 - * Placing heavy objects on, or stepping on the hose
7. Pull out the plug from the power source after use. Grasp the plug – not the cord – when pulling out the plug. Pulling on the cord may lead to shortcircuiting.
8. Long and continuous use causes the exhaust air and the body of the vacuum cleaner to become warm. This, however, does not denote malfunction.
9. When vacuuming places that are very dusty, and also when vacuuming regularly, empty the dust compartment before it becomes completely filled. Frequent emptying lengthens the life of the motor and maintains strong suction power.
10. If the supply cord of this appliance is damaged, it must only be replaced by a repair shop appointed by the manufacturer, because special purpose tool are required.
11. Do not allow it to be used as a toy. Close attention is necessary when used by or near children or infirm persons.

CARE OF FILTER / ENTRETIEN DU FILTRE

Cloth bag (Cloth Bag Type only)

- A severely soiled or clogged filter should be thoroughly washed with fresh tepid water. A neutral detergent could be used if required.

1. Washing 2. Drying

Sac en tissu (type sac en tissu uniquement)

- Si le filtre est très sale ou s'il est bouché, il faut le laver bien à fond à l'eau claire tiède. Si nécessaire, utiliser aussi un détergent neutre.

1. Nettoyage 2. Séchage

Filter

- Remove the filter and rinse it with water.
(Caution)
Never insert the cloth bag or filter into the vacuum cleaner unless it is completely dry.

Filtre

- Retirer le filtre et le rincer à l'eau.
(Attention)
Ne jamais insérer le sac en papier ou en tissu, ou le filtre dans l'aspirateur s'il n'est pas tout à fait sec.

CARE OF TURBINE BRUSH / ENTRETIEN DE LA BROSSE DE TURBINE

- Before caring for the turbine brush, be sure to turn OFF the switch of the unit and disconnect the plug from the outlet.
If needles, pins or waste paper get stuck in the suction inlet, remove them after going through the above procedure.
Trying to remove them during operation is dangerous.
- Avant d'entreprendre les travaux d'entretien de la brosse de turbine, veiller à mettre l'interrupteur d'alimentation de l'aspirateur sur la position d'arrêt et à débrancher la fiche d'alimentation de la prise.
Si des aiguilles, des épingle ou des morceaux de papier sont coincés dans l'orifice d'aspiration, les retirer après avoir effectué la procédure indiquée ci-dessus.
Il est dangereux d'essayer de les retirer pendant que l'aspirateur fonctionne.

CARE AND MAINTENANCE

If you have a problem with your vacuum cleaner, consult the handy guide below. If the vacuum cleaner is malfunctioning, do not operate it. Contact your dealer or the nearest Sanyo Service Center.

Problem	Possible cause	Possible solution
(1) Cleaner won't run.	1. Not firmly plugged in. 2. No voltage in wall outlet.	1. Plug unit in firmly. 2. Check fuse or breaker.
(2) Suction does not increase after cleaning out the dirt.	1. Filter dirty. 2. Clogged floor nozzle or hose.	1. Clean out the filter. 2. Clean out floor nozzle or hose.
(3) Cord doesn't fully rewind.	1. Cord twisted or uneven.	1. Pull out cord and rewind.
(4) Turbine brush won't turn. (Turbine brush only)	1. The switch lever for the turbine brush is set to "Floor". 2. A large piece of dust is clogged in the turbine brush. 3. The POWER CONTROL is set to "MIN".	1. Set the switch lever on "Rug". 2. Remove the large piece of dust clogged in the turbine brush. 3. Set the POWER CONTROL to "MAX".
