Roland®

Portable & Versatile Roland FP Digital Pianos are Ready for Any Gig, Any Musical Style, Any Environment

Equipped with great sounds and intelligent features that can make you sound like a solo concert pianist or an entire ensemble, the FP series is your ticket to a dynamic and exciting musical world.

Digital Piano
FP-7

Attractive black finish
Authentic piano sound and touch for a realistic
playing experience

FP-4-WH

Digital Piano
FP-4

Portable and Stylish, the new FP-4 sounds and feels
like a real piano with modern features that will
bring your room to life.

FP-4-BK

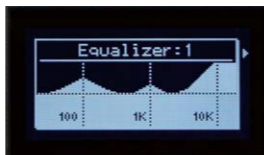

Enjoy an Authentic Piano-Playing Experience, with Sound and Touch that Reacts Naturally and Dynamically

- FP-7 and FP-4 contain Roland's finest 88-key multi-sampled piano sound engine, with each and every key of a full concert grand painstakingly reproduced.
- 128-voice polyphony ensures that your notes will sustain fully and naturally, regardless of how fast or densely you play.
- The FP-7 features Roland's new PHA II (Progressive Hammer Action II) keyboard that responds naturally from pianissimo to fortissimo. The touch of the FP-7 can be adjusted in 100 incremental steps.
- The FP-4 is equipped with the new PHA alpha II, a hammer-action keyboard with excellent finger response and sensitivity.
- All of the intricate sound details of a real piano have been captured in the FP-7, including hammer and damper noise, and string and key-off resonance. The FP-7 lets you adjust the virtual degree of grand-piano lid, and includes hammer response, the Duplex Scale system, and user micro tuning.
- In addition to its grand piano sound, dozens of other great instrument sounds are built into the FP-4 and FP-7. Digital effects are also provided, including a 4-band digital equalizer to customize the sounds to your preference.
- Equipped with convenient built-in speaker systems, Roland's new FP-series pianos deliver rich, sparkling sound without requiring additional speakers or amplifiers to be connected. The FP-7, in particular, is designed to fill both small and large spaces with its vibrant output from built-in speakers.

The Perfect Balance of Advanced Design and Classic Performance

- Newly designed compact, lightweight body. The top panel and easy-to-access control buttons provide an uncluttered, classy appearance. The FP-7 is available in black; the FP-4 is available in black or white.
- The FP-4's clean translucent white color finishes are a perfect blend for even the most elegant and sophisticated environments.
- The FP-7 is equipped with a large graphic LCD for easy operation.
- A pair of headphone jacks are provided for duets or late-night practice sessions.
- A music rest is included for convenient placement of music books and manuscript paper.
- The custom-made piano stand (sold separately) includes a hook for headphones.

Portable Design Fits Well in Any Musical Environment

- The stylish, slim design allows the FP pianos to be placed in practically any environment, no matter how limited space may be.
- The FP custom piano stand (sold separately) can be removed for easy transport. From the home to the studio to the stage, you can take your FP with you wherever you go.
- FP-series digital pianos can also be used with keyboard stands such as Roland's V-Stand (sold separately).

Wide Variety of Connections to Expand Your Musical Options

- To import and export data, the FP-7 is equipped with an External Memory Connector. Connect a USB memory stick, or an off-the-shelf USB CD drive.
- The FP-7 features a Mix In Jack, which enables you to connect a portable digital audio player and enjoy playing along with your favorite songs.

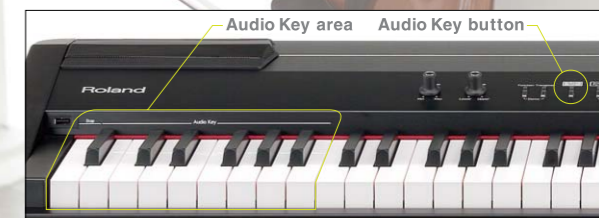

Connect to a PC via USB for Advanced Song Creation

- Connect your FP-series piano to a computer using the USB (MIDI) connector for enhanced song creation and recording.

Great Features for Lessons and Live Performance Alike

- With 80 types of Session Partner accompaniment patterns (each with two variations), the FP series give you the experience of playing along with a full band.
- The built-in recorder lets you record your playing for playback, for evaluation, and for sharing with others. Up to 99 songs can be saved onboard.
- The Audio Key is a new FP-7 feature that lets you easily play back additional audio material using the keyboard. Play along with vocals or live performances such as those found on the included sample data CD. Audio Key lets you assign audio files directly from USB memory to specific keys on the keyboard for playback during your performance. Imagine adding "live" background vocals to your song as you play, for example. Your audience will be amazed!

Digital Piano FP-7
