

## Wireless Remote Transmitter

## User's Manual

### Enclosed you will find

- (1) Wall Mount Control
- Double-Sided Tape / Screws (for mounting)
- 12V A23 Battery (installed)

### The GE Smart Remote Plus advantage

Any transmitter in the GE Smart Remote Plus product line is capable of controlling every receiver—the ultimate in home convenience. Control any number of light fixtures or appliances from up to 150ft\* away by choosing the transmitter and receiver combination that best suits your needs.

### Expanding your system

The GE Smart Remote Plus devices operate on any of 8 user-settable channels. The channels are easy to set / adjust – with the simple turn of a knob. Set up your GE SmartHome™ by purchasing as many transmitters and receivers as you need. The following table is just one example of how you can configure your Smart Remote Plus system:

Area	CH	Transmitters	Receivers
Bedroom	1	Bedside - Wall Mount Control Entrance - Wall Mount Control	(2) Bedside Lamps - (2) Socket Adapters Corner Torchere - Indoor Outlet Adapter Overhead Light Fixture - Wall Switch Entertainment System - Indoor Outlet Adapter

	7		Christmas Lights - Outdoor Outlet Adapter Yard Santa - Outdoor Outlet Adapter
Kitchen	8	Entrance - Wall Mount Control	Coffee Maker - Indoor Outlet Adapter

### Operating Instructions

1. Find the slot labeled HOUSE CODE on the back of the unit.
2. Set the HOUSE CODE to any one of the following settings:

**NOTE:** Make sure ALL your GE Smart Remote Plus devices have the same HOUSE CODE setting. The transmitters WILL NOT control the receivers if they have different HOUSE CODE settings.

**IMPORTANT!** HOUSE CODES help eliminate interference (devices randomly turn on / off). If you experience interference, change the HOUSE CODE on all your GE Smart Remote Plus transmitters and receivers to a different setting.

3. Set the CHANNEL by using the knob on front as shown.

**NOTE:** If you set your Wall Mount Control to CHANNEL 1, the unit can control any receiver set to CHANNEL 1. If you set your Wall Mount Control to CHANNEL 2, the unit can control any receiver set to CHANNEL 2 ... and so on.

**IMPORTANT!** A transmitter will control a receiver ONLY if they have the same HOUSE CODE and CHANNEL settings.

4. Mounting

**NOTE:** Mounting the Wall Mount Control on masonry or metal walls may degrade the functional range.

#### Tape Mounting

- A. Make sure surfaces are free of dust, oil and other substances that could affect adhesion.
- B. Attach the double-sided tape to back of the Wall Mount Control housing.
- C. Press the tape firmly to the mounting surface.

#### Screw Mounting

- A. Using a slotted screwdriver, remove the faceplate of the Wall Mount Control.
- B. Place the detached back plate where desired and mark screw locations.
- C. Insert the mounting screws into the back plate holes and screw into place.
- D. Replace the Wall Mount Control faceplate.

5. Use the toggle button to activate the Wall Mount Control (ON/OFF operation). Make sure to press firmly and for a minimum of 1 second for best results. An indicator lights RED when a signal is sent.

6. Using any of the receivers set to the same CHANNEL and HOUSE CODE, test the installation by using the ON and OFF buttons.

If your unit does not work properly or if you want additional assistance, please call 1-800-443-4924.

We would be happy to answer ALL of your questions. Visit us on the web at [www.GESmartHome.com](http://www.GESmartHome.com) to download application notes, manuals and to find out more about the GE SmartHome™ product line!

### Specifications

Battery Type ..... Use ONLY A23 (12V) Alkaline

**NOTE:** The functional range will decrease as the battery wears out so make sure to replace the battery every 6 months for best results.

\*Functional range may be adversely affected by one or more of the following factors: weather, radio frequency interference, low transmitter battery and obstructions between the transmitter and receiver.

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and;
2. This device must accept any interference received, including interference that may cause undesired operation.

**CAUTION:** Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
