1. System Requirements

- Personal computer, laptop, desktop, or IBM compatible with Pentium 166 MHz minimum, and with an active USB (Universal Serial Bus) port.
- Windows 98 SE / ME / 2000 / XP, CD ROM drive, color monitor, mouse and keyboard.
- Color printer for printing color pictures.
- For transferring still images via the Internet, or for video conferencing, your computer must have modem and communication software for Internet connection.

2. Package Contents

Make sure that all of the items shown below are included with your VQ5020.

3. Quick Start

CAUTION

Please install the camera driver before using your camera with a PC. Best way to transfer picture to PC is using the PC-DISK (Mass Storage) mode to copy all your pictures.

• Getting Ready

1. Slide open the battery compartment cover.
2. Load the batteries into the camera.
3. Slide close the battery compartment cover.
4. Load the SD card (Optional) into the camera.

• Taking a Picture

1. Turn on the camera.
2. Slide the **Function** switch to . (Capture Status)
3. Point the camera at the subject, use the TFT to compose the picture.
4. Hold the camera still, gently press the shutter button to take a picture.

- **Reviewing a Picture**

1. Turn on the camera.
2. Slide the **Function** switch to  (Playback status).
3. Push the joystick up or down to scroll through the pictures or videos on the TFT.

- **Deleting a Picture**

1. Turn on the camera.
2. Slide the **Function** switch to  (Playback Status).
3. Push the joystick up or down to display the picture you want to delete.
4. Press the **DELETE** button to turn on the menu, and then push the joystick up or down to select **[DeleteOne]** on the screen. Press the **joystick** button to confirm.

Digital Interface:

USB 1.1

Video Output:

TV out in NTSC / PAL

DIGITAL ZOOM

During shooting, user can push the joystick left or right to zoom in and zoom out.

Display Button

When in capture and video status, press the joystick and the information on the TFT will be switched off. Press the joystick again the TFT will be turned off. Press the joystick the third time, the TFT and the information will on at the same time.

Menu Button

You can turn the menu ON or OFF by pressing the **Menu** button. As menu turn on, the items appear, Push the joystick up or down to select the item, and then press the joystick to enter the submenu. Push the joystick up or down to select the item and press the joystick to confirm.

5. Display Information

Note: If the  icon appears on the LCD when you take pictures in dark conditions. Please keep your hands steady, otherwise you may capture a blur picture.

6. Getting Started

• Installing Camera Batteries:

1. Slide open the battery compartment cover.
2. Insert batteries. Be sure to load batteries with + and – terminals as shown on the camera.
3. Slide close the battery compartment cover.

• Inserting SD Card (Optional):

The VQ5020 offers two options for storing pictures and videos:

Internal Memory - Store pictures and videos in the 16 MB internal memory.

SD Card - Optional SD cards provide removable, reusable storage for pictures and videos. Store as many pictures as you like, depending on the size of the card.

CAUTION:

- The card can only be inserted one way; forcing it may damage the camera or card. Do not insert or remove a card when power is on.

To insert an SD card:

1. Turn the camera off.
2. Position the card as shown. Push the card into the slot until it hooks up.
3. To remove the card gently push the card until it get released from the hooking mechanism. After it has popped out pull it out completely.

Note: 1. If the SD card is present in the camera, and then the picture/video will save in the SD card. If no card is installed, the camera uses internal memory.

2. If the “MEMORY FULL” warning message appears on the TFT, it means the SD card or internal memory is full. Please remove the memory and insert a new one or move/store all the pictures/videos in memory to your computer.

• **Turning On the Camera:**

1. Press the **Power** button on as shown in the illustration.
2. Buzzer will beep and indicator lamp will light. The TFT will be turned on.
3. Press the **Power** button again to shut down the camera.

• **Setting the Date, Time and Date Stamp:**

You should set the Date and Time when you first use your VQ5020 or the battery is removed for an extended time (approximately 120 Seconds). Use the following procedure to change the date and time setting.

1. Slide the **Function** switch to  (Capture Status).
2. Press the **MENU** button to turn on function menu. Push the joystick up or down to select [**Advance**] item, and then press the joystick to enter the advanced menu.
3. Press the joystick up or down to select [**Date Time**], and then press the joystick to enter the submenu.

4. Press the joystick up or down to adjust the date and time. Press the joystick left or right to adjust to the next setting.
5. When finished, press the **MENU** button to exit the menu.

Use the Date Stamp setting to imprint the date on your pictures.

1. In the Date Time Setting menu. Make sure the camera clock is set to the correct date.
2. Push the joystick left or right to select [**Date stamp**] option.
3. Press the joystick to switch the Date stamp function to on (tick on) or off (tick off).
4. Press the **MENU** button to exit the menu.

• **Power Saving:**

The camera will automatically power off approximately 3 minutes after you do not perform any operation.

When this function is disabled, the power is not turned off automatically.

7. Taking Pictures

• Taking a Picture

1. Turn on the camera.
2. The TFT will display image and symbols.
3. Slide the **Function** switch to  (Capture Status).
4. The TFT will display  (Snapshot Mode). If icon is different, Press the joystick down until the icon appears on the TFT.
5. Point the camera at the subject, use the TFT to compose the image. (If turn the switch to **Macro**  , you can take picture as close as 19.5cm; If turn the switch to **Portrait**  , you can take picture as close as 0.95m to 1.95m.)
6. Holding the camera still, gently press the **Shutter** button to take the picture.

Note: How to take a good shot? After pressing down shutter button, keep your hand steady for 2 seconds to get best result.

• Taking Continuous Pictures

1. Make sure the **Function** switch is set to  (Capture Status)
2. Press the joystick down until  appears on the TFT. (Continuous Mode)
3. Point the camera at the subject, use the TFT to compose the image.
4. Holding the camera still, gently press the shutter button to take the pictures

Note: Flash is deactivated at this mode. You will see the icon  on the TFT.

• Using Digital Zoom

The Digital Zoom provides up to 4X magnification of your pictures. You may notice a decrease in printed image quality when using Digital Zoom.

1. Make sure the **Function** switch is set to  Use the TFT to frame your subject.

2.  (▶) Button: The subject will be enlarged.

 (◀) Button: The subject will be reduced.

Push the joystick Right to zoom in. Keep the button pressed for continuous magnification. The TFT displays the zoomed image and the magnification level.

3. Push the joystick left to zoom out.

4. Press the **Shutter** button to take the picture.

- Note:**
1. The image will appear grainier as the image is digitally zoomed.
 2. Digital Zoom is automatically turned off when the camera is turned off.

• Using Flash Light

When you take pictures at night, indoors, or outdoors in heavy shadows, you can use the flash. Press the joystick up repeatedly to scroll through the flash options. The flash icon that is displayed on the TFT is the active option.

Off—flash never fires. (Default)

Auto Flash—flash fires when the lighting conditions require it.

Force Flash—flash fires every time when you take pictures, regardless of the lighting conditions.

- ⓪ **Red-eye**—flash fires once so the subject’s eyes become accustomed to the flash, then fires again when the picture is taken. The Red-eye option remains in effect until you change it.

- Note:** 1. All flash options revert to Off when the camera is turned off.
2. Flash is off during continuous mode and video mode.
3. This setting remains until you change it.

• **Setting Picture Quality**

Use the Quality setting to select a picture resolution:

1. Make sure the **Function** switch is set to  , and then press the **MENU** button.
2. Push the joystick up or down to select [**Size**] and then press the joystick.
3. Select an option with ▲ or ▼:
 - L 12Mpix** — for enlarged picture size; produces higher picture resolution and larger file size.
 - M 5Mpix** — for standard picture size; produces normal picture resolution and middle file size.
 - S 3Mpix** — for small picture size; pictures are of lower resolution and file size is smaller.
4. Press the joystick to confirm.

- Note:** 1. This setting remains until you change it.
2. Movies can be shot with the QVGA (320 x 240) or VGA (640 x 480) resolution.

• **Adjusting the Exposure**

Set the exposure value (EV value) manually to compensate for certain lighting conditions including: backlighting, indirect lighting, and dark backgrounds.

1. Make sure the **Function** switch is set to  , then press the **MENU** button.
2. Push the joystick up or down to select **[EV]** and press the joystick button.
3. Push the joystick up or down to change the exposure value:-2.0 EV ~+2.0 EV.
4. Press the joystick button to confirm.

• **Taking the picture in Self-timer mode**

The Self Timer creates a default delay between the time you press the **Shutter** button and the time the picture is taken. This setting is ideal when you want to include yourself in the picture.

1. Make sure the **Function** switch is set to  .
2. Push the joystick down until  appears on the TFT. (Self-Timer Mode)
3. Place the camera on a flat surface or use a tripod.
4. Compose the picture, then press the Shutter button all the way down.
5. The red Self Timer light, located on the front of the camera, blinks for 10 seconds before the picture is taken.

8. Taking Videos

• Taking a Video

1. Turn on the camera.
2. The TFT will display image and symbols.
3. Slide the **Function** switch to  (Video Status). And you will see the icon  appears on the TFT.
5. Frame your subject on the TFT, and then press the **Shutter** button to take the video.
6. Press the **Shutter** button again to stop recording.

- Note:** 1. During recording, user can press the ◀ / ▶ button to zoom in/out.
2. The video resolution is QVGA (320 x240) and VGA (640 X 480).
3. You can select video resolution use the [Size].

9. Reviewing Pictures and Videos

• Reviewing Pictures and Videos

1. Turn on the camera.
2. Slide the **Function** switch to  (Playback status).
The last picture or video is displayed.
3. Push the joystick up or down to select the picture or video (If  appears on the TFT panel) you want to review.
4. Press the joystick to start to playback the video.
5. During the playback, press the joystick pause/resume the video playing.

Note: You can push the joystick left or right to enlarge or reduce picture.
(Videos cannot be enlarged)

• Viewing Thumbnail

View thumbnail at once on the TFT (Index View) so that you can search the picture quickly.

1. Make sure the **Function** switch is setting to , and then press the **MENU** button.
2. Push the joystick up or down to select **View** on the screen and press the joystick button.
3. Push the joystick up or down to select  (**[Thumbnail]**) and press the joystick button.
4. Six picture thumbnails appear on the TFT.
5. Push the joystick left or right to select the previous or the next picture, push the joystick up or down to enter the next page. Press the joystick on the picture you want to see in the whole screen.

• Using Slide Show

Use the Slide Show feature to sequentially display your pictures and videos on the camera TFT, on a television screen, or on any external display device equipped with a video input.

1. Make sure the **Function** switch is set to , and then press the **MENU** button.
2. Push the joystick up or down to select **[View]** on the screen and press the joystick.
3. Push the joystick up or down to select  **[Slide Show]** and then press the joystick.
4. Each picture and video thumbnail is displayed once, in the order in which you took them.
5. After slide show finished, It's auto out of Slide Show function and then show last picture in playback mode.

Note: If you want to run the slide show on a television, connect the video cable to the video-out port on the camera and the video-in port on the television. Ensure that the Video Out setting is correctly set to NTSC or PAL.

• Magnifying Pictures

Use the Magnify feature to zoom in to different areas of the picture.

1. Make sure the **Function** switch is set to .
2. Push the joystick up or down to select the picture you want to enlarge, and then press the **MENU** button.

3. Push the joystick up or down to select  **[Zoom]** on the screen and press the joystick.
4. The frame (approximate location of the magnified area) appears on the TFT. Push the joystick to select location of the magnified area and press the joystick.
5. The picture is displayed at 2X magnification. Push the joystick to navigate to different parts of the picture.
6. Press the joystick button to redisplay the picture at the original size.

Note: Videos cannot be enlarged.

• **Selecting Pictures for Printing (DPOF Print Settings)**

1. Make sure the **Function** switch is set to .
2. Push the joystick up or down to select the picture you want to print, then press the **MENU** button.
3. Push the joystick up or down to select  **[Print]** on the screen and press the joystick.

4. For setting images one by one:

Push the joystick up or down to select  (**[Print One]**), and then press the joystick to set current picture for printing with DPOF.

• **For setting all images on the SD card:**

Select  (**[Print All]**) to set all pictures for printing with DPOF.

5. The checkmark  appears on the TFT.
6. You can use the DPOF print settings to print with an optional direct print function compliant printer. (Refer to your printer User's Guide for details.)

Note: The DPOF printing feature support SD card only.

10. Deleting Pictures and Videos

Delete item allow user to delete current or all the stored images from the internal memory or SD card.

• Deleting Single Picture or Video

1. Turn on the camera.
2. The TFT will display image and symbols.
3. Slide the **Function** switch to  (Playback Status).
4. Push the joystick up or down to select the picture or video you want to delete, and then press the **DELETE** button to turn the menu on.
5. Push the joystick up or down to select  (**[DeleteOne]**), and then press the joystick to delete the picture or video.

• Deleting All Pictures and Videos

1. Make sure the **Function** switch is set to , and then press the **DELETE** button.
2. Push the joystick up or down to select  (**[DeleteAll]**), and then press the **joystick** button to delete all pictures or videos.
3. Then the **“NO PICTURE”** warning message appears on the TFT.

- Note:**
1. If all files (Photos and videos) are erased, the message “No Picture” appears on the TFT.
 2. Files that are erased cannot be recovered. Make sure you have selected the images you want to erase.

- **Formatting Internal Memory or SD Card**

1. Make sure the **Function** switch is set to , then press the **DELETE** button.
2. Push the joystick up or down to select  (**[Format]**), and then press the joystick to format Internal Memory or SD card.
3. Then the “**NO PICTURE**” warning message appears on the TFT.

Note: Formatting memory permanently erases the contents of memory. Photos and video cannot be recovered from memory after formatting. Transfer any files that you want to keep to a computer before formatting memory.

11. Customizing Your VQ5020 Settings

Capture Function Menu

When user slide the **Function** switch to  (Capture Status). Press the **MENU** button can turn ON/OFF function menu. Push the joystick up or down to select items, press the joystick to enter the submenu, and then push the joystick up or down to change the current selected setting. Press the joystick to confirm. Push the joystick left to return to main menu, press the **Menu** button to cancel the setting and return to capture status.

[White Bal]: (White Balance)

When the white balance is set to match the light source, the VQ5020 can take picture more accurately.

	Cancel One	Select "Cancel One" to cancel print setting of current picture.
	Cancel All	Select "Cancel All" to cancel print setting of all pictures.

[Zoom]:

In Zoom item, push the joystick up, down, left or right to select the area of interest, and then press the joystick to enlarge zoom area to whole screen. Press the joystick to cancel the Zoom.

	Zoom	Select "Zoom" to magnify different parts of the pictures.
---	-------------	---

12. Installing Your Camera Driver and Software

• Installing Driver

1. Turn on the computer.
2. Insert installation CD into the CD-ROM drive and the installation CD menu will appear.
3. When you see the following screen, choose **“Camera Driver”**.
4. Follow the on-screen instructions.
5. Restart the computer.

For Windows 2000/XP only:

During installation of the driver or software, computer may display the message: **“The software you are going to install doesn’t contain the Microsoft signature, and may not work correctly.**

Do you want to continue? Y / N”

Please select Y to continue the installation.

• Installing Software

1. Insert installation CD into the CD-ROM drive and the installation CD menu should appear.
2. When you see the following screen, choose **“Arcsoft Software”** to install the software.
3. Follow the instructions on screen.
4. Installed software will automatically create **“VideoImpression 2”** or **“PhotoImpression 5”** logo on your desktop.

13. Uninstalling Software

Following instruction will guide you to uninstall (remove) software from computer.

• Uninstalling Software

1. Click "Start" from the task bar and choose "Settings" -> "Control Panel". (For Windows XP: "Start" -> "Control Panels")
2. Double click "Add/Remove Programs".
3. Select the program to be uninstalled: "ArcSoft Software Suite".
4. Click on "Remove Program" (For Windows 2000/XP: Change /Remove") and then "OK".

• Uninstall Camera's Driver

1. Click "Start" from the task bar and choose "Settings" -> "Control Panel". (For Windows XP: "Start" -> "Control Panels").
2. Double click "Add/Remove Programs".
3. Select the program to be uninstalled "Digital MultiCam II Digital Camera" and "Digital MultiCam II Video Camera".
4. Click on "Remove Program" (For Windows 2000/XP: "Change /Remove") and then "OK".

14. Mass storage & Direct Print

1. Mass storage: You can download the pictures in the camera to your computer.

2. Direct Print: You can print directly to USB port printer.

You need:

- Camera with batteries
- USB port printer
- USB cable included with your camera
- Slide the **Function** switch to  (Playback Status).
- Connect USB Cable with printer and digital camera. Turn on your camera.
- The pop up menu will appear and allowing selection of Mass Storage or Direct Print function. Push the joystick to select the function you want to set:

 	Press the joystick to enter Mass storage mode. The “Mass Storage” message appears on the LCD monitor. (<i>see next page</i>)
 	Press the joystick to enter Direct Print menu. The last picture is displayed on the LCD monitor.

- Push the joystick up or down to select the picture you want to print, then push the joystick left or right to choose a printing option.

- Fixed : "4 x 6" or "5 x 7".

- Print : Printing picture

Press the **joystick** to switch or confirm the item.

- Turn off the camera and printer.

- Disconnect the USB cable from the camera and the printer.

Note: You must install your camera driver.

15. Downloading Images to Your Computer

For Windows 98/me customers:

Please install camera drive before connecting.

1. Turn the camera and computer on, then connect the camera to the computer with the included USB cable, and then slide the **Function** switch to  (Playback Status)
2. "USB Mass Storage drive" appears on the computer screen.

For Windows XP:

A dialogue box with options appears as shown on the Right side.

The options are Play, Find/Fix/Share Images.

Open folders to view files, take no action,

Copy images to a folder on my computer,

View a slide show of images, and etc.

Please select one of them and click on "OK".

For Windows 2000/me/98:

Double click on "My computer", and then double click on Removable Disk (i:) in the DCIM files. (All the photos and videos are stored here).

3. Press "Ctrl+A" on the keyboard to choose all the photos/videos, then press "Ctrl+C" to copy photos, and then open a file in the computer, press "Ctrl+V" to paste the photos.

16. ArcSoft PhotoImpression 5

ArcSoft PhotoImpression 5 is a complete digital image editing application designed with real people in mind. Easy-to-use “Getting Start” guides, user-friendly UI, complete image editing functionality, give users wonderful experience to organizing, viewing, enhancing, editing, printing and sharing photos.

Click “Start” → “Program” → “ArcSoft Software Suite” → “PhotoImpression 5” to launch PhotoImpression 5 or double click PhotoImpression 5 icon on the desktop and you will see a window as the screenshot above.

Select the picture source. For example: Click “Folder”  for acquiring photos from your computer. Select the file path. You can start editing them.

Function Menu
Function Tab

Browse Pane

View Mode

1. **Get Photo** – Choose how to view or acquire photos.
2. **Enhance** – Crop, brighten, rotate, resize and modify photos.
3. **Create** – Add clip art, special effects, frames and more.
4. **Project** – Make calendars, photo books and greeting cards.
5. **Print** – Print multiple images per page and multiple pages at one time.
6. **Send** – Email photos or upload them to online photo sharing accounts.

Note: For more detailed information, please refer to the **Help** of the program.

17. ArcSoft Video Impression 2

ArcSoft VideoImpression 2 creates home movies and slide shows by combining existing videos, still images, exciting scene transitions, and multiple audio tracks. Though simple to use, the program provides intense and broad video editing and export options perfect for owners of digital still cameras, desktop and digital video cameras, and camcorders.

Click “Start”→ “Program”→ “ArcSoft Software Suite“→ “VideoImpression 2” to launch VideoImpression 2 or double click VideoImpression 2 icon on the desktop and you will see a window as the screenshot above.

Open a Project – Let you browse the project files in the VideoImpression system folder. By “project,” we mean to say a file that contains all of the settings and each individual component on the Storyboard. When you

save your work as a project, you can go back and swap components, add and remove them, alter audio, etc.

Create a Video – Create a new video project. You can retrieve media materials from the device connected or choose media files from system folder. You can choose video materials from your photo album as well.

Create a Slide Show – Create a slide show project. You can retrieve media materials from the device connected or choose media files from system folder. You can choose slide show materials from your photo album as well. If the box “Always show this wizard when VideoImpression starts.” at the bottom of the wizard is checked, the wizard will appear each time you run the program. If you'd like to skip the wizard the next time, uncheck the box. Select the item you desire and the picture and videos you need then you will enter the editing interface as below.

You can use the six steps in the Function Menu to create video clips and slide shows.

1. **Media** - Select the videos and images that will comprise your final movie or slide show.
2. **Edit** - Modify video and image color and adjust the duration of each movie component. Only available for video projects.
3. **Effects** - Add neat special effect transitions between each component, or apply a pre-made theme.
4. **Text** - Place animated text on any movie component. Only available for video projects.
5. **Narrate** - Record audio directly from the program and add it to your movie.
6. **Produce** - Combine all components to create your final video; save it in a variety of ways or email it to friends.

The Storyboard - The backbone of the creation process, it's where you assemble your movie.

The Player - Preview and modify your movies in this area.

Working with Albums - Albums let you organize your media for easy access.

Note: For more detailed information, please refer to the **Help** of the program.

18.Using the Camera in PC-Cam mode

The VQ5020 offers two USB modes: Removable Disk and PC Camera.

Note: Please install camera drive before you can use the camera in PC-Cam mode.

Setting Up PC-Cam

1. Turn the camera power on and slide the **Function** switch to  (Capture status).
2. Connect the camera and the computer use the USB cable.
3. There are many methods to view your image in PC-Cam mode if you have Video software. For example:

A. Click NetMeeting→Start Video. 

B. About Arcsoft software:

- a. PhotoImpression 5: Click “file” on the function menu→ Click “Get photo” → an icon  on the browse pane as shown on the right → “Live”.

- b. VideoImpression 2: Click Create a new video→Get from Album→Capture Video. 

19. Checking the Connection of Your Camera

For Windows 98/Me only

Double click “My Computer” icon -> Control Panel -> System -> Device -> Manager -> Imaging Device; when you see “Digital MultiCam II Digital Camera” and “Digital MultiCam II Video Camera” that means now the camera is installed.

For Windows 2000/Xp only

Double click “My Computer” icon (Windows 2000) or go to Start button and select “My Computer” (Windows XP) -> Control Panel -> System -> Hardware -> Device Manager -> Imaging Device; when you see “Digital MultiCam II Digital Camera” and “Digital MultiCam II Video Camera” that means now the camera is installed.

20. Internet Video Conferencing

To run a video conference with another person, you and the other person must have the computer station configured with web camera, microphone, speakers, modem and have access to the Internet.

You have to download video conference software, purchased or free, such as basic software like I-phone, Microsoft NetMeeting, or Yahoo Messenger.

As example: to download Windows NetMeeting, go to www.microsoft.com search for NetMeeting and follow the download procedure.

Starting NetMeeting, you have to follow the simple set up procedure on the computer screen, enter your personal information and adjust the microphone volume. Here's how video conferencing works:

To receive video:

1. Call someone you want to see/hear.
2. On the **Tools** menu, point to **Video**, and then click **Receive**.

If you have a video camera, you can send video to the person you are calling.

To send video

1. Call someone you want to see/hear.
2. Click the **Start Video** button.

Note:

1. You can also send video by clicking the **Tools** menu, pointing to **Video**, and then clicking **Send**. After starting the video, the button changes to **Stop Video**. To stop the video, click the **Stop Video** button again.
2. For software support, or detailed information how to work with PhotoImpression or VideoImpression – contact www.ArcSoft.com

Specifications

Image Sensor Output	CMOS 2592 x 1944 Pixels (5.0M Pixels)
Lens Specification	Fixed focus lens, F 3.0, Focal length = 8.6 mm
Focus Range	Macro 🐦 : 20 cm, Portrait 🧑 : 1m ~ 2m, Landscape 🏔️ : 2m ~ Infinity
Lens composition	5G(Include IR)(TBD)
Optical Zoom	None
Preview digital zoom	4X
Playback digital zoom	4X
Viewfinder	None
Flash Strobe	IGBT (Force On, Force Off, Red Eye Reduction and Auto)
Flash light distance	0.5 ~ 1.5m
White Balance	Automatic / Daylight / Cloudy / Fluorescent Lamp / Tungsten Lamp
Exposure metering	Center weighted
Exposure compensation	Automatic / Manual (-2EV to +2EV in 1/2 EV steps)
Image Play	Single Image, Thumbnails, Slide Show, Movie Clip
Shutter Speed	1/2 ~ 1/1500 Sec
ISO Speed	ISO Auto
Still image format	JPEG (DCF, Exif2.1)
Still image size	12M --- 4000 x 3000 Pixel; 5M --- 2592 x 1944 Pixel; 3M --- 2048 x 1536 Pixel
Movie Format	AVI(Motion JPEG) with digital zoom recording
Movie Size(with Audio)	QVGA 320 x 240 Pixels Up to 50 sec (30 fps); VGA 640 x 480 Pixels Up to 20sec (20 fps)
Audio	Yes (Buzzer)
Microphone	Yes
RTC (Real-Time Clock)	Yes
Display	2.5" LTPS LCD
RTC (Real-Time Clock)	Yes
PC Interface	USB 1.1
TV interface	NTSC/PAL
Storage	Built-in 16MB Flash Memory + SD Card Slot (Card Not Included)
Battery	AAA 1.5V Alkaline/Re-chargeable Batteries x 2 (not included)
O / S	Microsoft Windows 98 SE / 2000 / ME / XP
Dimension (WxHxD)	89mmx56mmx24.5mm
Bundled Software	ArcSoft PhotoImpression 5 and ArcSoft VideoImpression 2

FAQ

Q1: If I do not use batteries, can I use an USB cord and Adaptor and still take pictures with my VQ5020?

A1: No, when taking pictures, it is important that you use batteries. Also, you have to remember to charge the batteries before operating your camera.

Q2: I am not very familiar with VQ5020 and usually my pictures turn out blurred. Is there any way I can better focus my camera?

A2: Yes, please locate the Macro Switch on the camera lens. Switch it to the Landscape (▲) setting unless taking close-up pictures in which case, you must switch to the Macro (🌸) setting.

Note: If the pointer is found anywhere in between these two symbols, it will adversely affect the focus. Also, ensuring there is enough lighting and that your hands are steady for one second after you press the Shutter Button will help with the focus.

Q3: I have noticed that the pictures I have taken are all very dark. How can I make these pictures lighter? Should I use the flash often?

A3: Avoid taking pictures in places with little lighting. When it is cloudy, please use other means to create more light before taking pictures. We recommend using the flash function during nighttime. During the day, the flash may be too strong and the picture may come out too bright, thus use it only during the night.

Q4: After I am done taking a picture, it takes a while for the picture to come up on the TFT . Is there something wrong with my camera?

A4: No, with the camera, if you select a larger picture size, it will take longer for it to come up on the TFT. So if you want to speed things up, please select a smaller picture size. (M picture size is recommend)

Troubleshooting

Problem	Source	Solution
The camera is not running	The power is not on	<ul style="list-style-type: none"> • Press the Power button to turn the camera on.
	The batteries were not inserted properly	<ul style="list-style-type: none"> • The correct direction to insert the AAA batteries is indicated on the camera.
	Batteries are depleted	<ul style="list-style-type: none"> • Replace with unused alkaline or fully recharged batteries (two AAA-size batteries).
	The battery cover is not closed properly	<ul style="list-style-type: none"> • Close the cover correctly and securely.
The camera is not taking pictures.	The camera is in the Playback Function mode	<ul style="list-style-type: none"> • Slide the function switch to Capture Function mode.
	The flash is charging	<ul style="list-style-type: none"> • Wait until the flash charges. You can press the shutter button when the indicator glows a steady orange.
	The SD card or internal memory is already full	<ul style="list-style-type: none"> • Obtain a new SD card and insert it. • Download images to your computer, and then erase them from the card or format to free up more space.
	The SD card is not formatted correctly	<ul style="list-style-type: none"> • Ask SD card manufacturer for assistance.

Problem	Source	Solution
Picture is not clear	The lens is dirty	<ul style="list-style-type: none"> • Clean the lens.
The pictures are blurred	Hands were not steady when taking the picture	<ul style="list-style-type: none"> • Ensure hands are steady when taking picture and remain steady one second after clicking the Shutter button.
	The picture subject was not in the focus range of the camera	<ul style="list-style-type: none"> • Keep a minimum distance of 1.2 meter between the picture subject and the camera lens to stay in the focus range of the camera.
The flash doesn't fire	The flash mode is set to Off	<ul style="list-style-type: none"> • Set the flash to any other mode except Off.
The computer cannot communicate with the camera	Camera power is off	<ul style="list-style-type: none"> • Turn on the camera.
	USB cable is not securely connected	<ul style="list-style-type: none"> • Connect cable to camera and computer port.
	Driver is not installed (for Windows 98 user)	<ul style="list-style-type: none"> • Install the camera driver.
The PC Camera doesn't work	Camera power is off	<ul style="list-style-type: none"> • Turn on the camera.
	USB cable is not securely connected	<ul style="list-style-type: none"> • Connect cable to camera and computer port.
	Driver is not installed	<ul style="list-style-type: none"> • Install the camera driver.
