Please refer to **Diagram 1** to familiarize yourself with the components of the CC525.

PLACEMENT

With the cabinet positioned horizontally, place the CC525 as close to the screen as possible. This most often means it will need to be placed directly on top of or just below the television with the front of the cabinet as far forward as possible, preferably flush with the screen. It is perfectly safe to place the CC525 close to the television, as it is magnetically shielded. **(See Diagram 2)**

Diagram 2:
CC525 Placement

Vertically lining up the cabinet with the left and right speakers, while not necessary, will improve performance. Best results are achieved when the left, right and center channel speakers are all the same distance away from the listener. The front left and right speakers should be placed so that they form an equilateral triangle, with the listener at one point and each speaker at the other two. **(See Diagram 3)**

Attaching Self-Adhesive Pads

Once placement of the CC525 is determined, attach the enclosed pads to the underside corners of the unit.

WIRING

Attach the speaker cable to the speaker cable terminals on the back of the CC525, observing the proper polarity with your amplifier (+ to +, - to -). **(See Diagram 4)**
