

# Respirator Fit Testing Kits and Accessories

Convenient qualitative fit testing kits and quantitative fit test probes and adapters to make fit-testing as easy as possible. All qualitative kits include complimentary instructional video and CD-ROM on how to fit test. The quantitative accessories make for quick conversion of an AOSafety® air purifying or airline respirator to fit test mode for those workers who want to be tested in their own masks.

Fit Testing Kits  
and Accessories

# AOSafety® Respirator Fit Testing Kits and Accessories

All kits include training tools for showing you how to do the various fit tests—easy to follow video and CD-ROM! Also, all written instructions, including those for the test subjects, are in English, French and Spanish. Fit test solutions and other fit test kit components can be purchased separately.

## Isoamyl Acetate-For use with elastomeric respirators.

Kit includes all components necessary to conduct the test, packaged in a heavy gauge plastic, foam-padded carrying case. Just add paper towels! The unique flexible vinyl fit test tent has an easy-to-assemble frame that hangs on any door jamb for quick set-up. It fits the largest test subjects, yet disassembles and folds to fit flat in a clear carrying pouch which tucks away neatly inside the carrying case.

## Bitrex and Saccharin Fit Test Kits-For use with filtering facepieces or elastomeric respirators.

All items needed for the test are arranged in a foam-padded carrying case with vinyl handle. The head and shoulder fit-test hood is quick to don with a clear window and opening for inserting the nebulizer nozzle for the test. Saccharin and Bitrex kits are identical with the exception of the challenge agent.

AOSafety® Qualitative Fit Test Kits	
Product Code	Description
50007-00000	Isoamyl Acetate Fit Test Kit
50005-00000	Saccharin Fit Test Kit
50006-00000	Bitrex Fit Test Kit
