

A fax, copier and printer in every department? **Yes.**

Every working day, more and more otherwise productive minutes slip away as your employees wait for the copier, or wait for the fax. But you can't afford to give every department its own copier and fax. Or ... can you?

As a matter of fact, now you can. Because, now, there's the Muratec MFX-2000 - a superb fax and digital copier. Its cover ("platen top") opens to let you easily fax or copy from books, ledgers or other three-dimensional objects. And, still better yet, it optionally also becomes a high-quality PC or LAN[†] printer.

MFX-2000

SPECIFICATIONS	Type	High-speed facsimile transmitter and receiver for home and office use
Phone Line	Normal Public Switched Telephone (PSTN) line or equivalent	
Modem	14,400 bps with fallback to 12,000, 9,600, 7,200, 4,800 and 2,400 bps per ITU-T, v.29 and v.27 ter.	
Compatibility	ITU-T Group 3	
Transmission Speed	6 seconds per page*	
Copier Type	Digital; scan-once/print-many	
First-Copy-Out Time	9.6 seconds	
Feeder Capacity	(20-pound bond) 50 letter-sized sheets	
Resolution	(in lpi, horizontal x vertical): Normal, 203 x 98; fine, 203 x 196; superfine, 203 x 392; Muratec-proprietary, 305 x 293	
Grayscale	64-level	
Printing Width	11.7" (ADF, letter-sized sheets)	
Scanning Width	11.6" (ADF, letter-sized sheets)	
Scanning Method	Flatbed CCD	
Printing Method	Dry, electrophotographic (laser) process	
Consumables Yield	Drum cartridge, 21,000-30,000 pages; toner cartridge, 5,500-7,000 pages.**	
Recording Paper Capacity	Standard: two 300-sheet cassettes, letter-, legal- or tabloid-sized sheets; optional third and fourth 300-sheet cassettes provide total possible capacity of 1,200 sheets	
Acceptable Document Size	(width x height): ADF, single sheet - 12.0" x 35.4" maximum, 4.7" x 3.9" minimum; ADF, two or more sheets - 11.7" x 16.5" maximum, 4.7" x 3.9" minimum; platen-top, 11.7" x 16.5" maximum, 4.7" x 3.9" minimum	
Weight	111.1 pounds	
Dimensions	(width x depth x height): 22.9" x 24.2" x 20.6"	
Power	120v ± 10%, 50-60 Hz	

FEATURES	High-volume plain-paper printing of fax messages and copies	ITU-T superfine transmission, Error Correction Mode (ECM)
	<ul style="list-style-type: none"> Uses ordinary paper in letter, legal or 11" x 17" sizes Standard capacity of 600 sheets (two 300-sheet cassettes) Accepts one or two optional cassettes to boost capacity to either 900 or 1,200 sheets Multipurpose single-sheet tray 	<ul style="list-style-type: none"> Automatic reduction of oversized fax documents Smoothing and 64-level grayscale

	<ul style="list-style-type: none"> High-reliability digital copying Scan-once/print-many method requires fewer moving parts 9.6-second first-copy-out time (FCOT) Reduction/enlargement - 50%-200% Up to 99 copies per original Sorting and stacking 	<ul style="list-style-type: none"> 192-number autodialer 72 one-touch numbers, 120 speed-dial numbers 70 delayed dialing commands 32 call groups EasyDial alphanumeric directory dialing
	<ul style="list-style-type: none"> Muratec TriAccess™ provides maximum access to machine Large graphical display for easy operation 50-page automatic document feeder Stacks transmitted and printed documents in original order Substantial memory, standard or optional*** Standard capacity, 238 pages Expandable to 558 pages 	<ul style="list-style-type: none"> Eight programmable multi-function keys Journals, reports and displays User-controlled confirmation stamp Page numbering ENERGY STAR™ compliance for energy efficiency Optional second phone line (33.6 Kbps modem) Gives you two fax machines in one device Allows simultaneous reception and transmission Optional Centronics™ parallel port and GDI software for PC printing Works with Microsoft® Windows® Up to 400 dpi quality Standalone or LAN† options Optional stand for greater convenience Allows easy storage of consumables Lets you move the unit easily if necessary
	<ul style="list-style-type: none"> High-speed operation 14.4 Kbps modem 1.4-second quick scan 15-ppm laser print engine 6-second transmission speed 	
	<ul style="list-style-type: none"> Broadcasting - up to 197 locations Relay broadcasting - initiation and "hub" activity Batch transmissions Saves up to 40 documents in up to 5 "batch boxes" 	

* Based on transmission of ITU-T Test Document 1 to a Muratec fax. Your transmission times will vary, but your Muratec fax machine always will provide the fastest transmission speeds possible under ITU-T guidelines and phone line conditions.

** Based on letter-sized sheets and 4% document coverage. In each case, lower figure is for two-page printing cycle, while higher figure is for continuous printing.

*** Based on ITU-T Test Document 1 stored at normal resolution.

Muratec
MFX-2000

Muratec America, Inc. • 6400 International Parkway, Suite 1500 • Plano, TX 75093. For more information on Muratec products and services, call (972) 364-3300 or visit our Web site at www.muratec.com • MK3069

The MFX-2000 has 64-level grayscale. So, even if it's a photo or some shaded art that you want to fax or copy, the crystal-clear results **won't** leave you stone-faced.

The large graphical display makes it easier to use even the most sophisticated features on your MFX-2000.

Faxing something besides a flat sheet – say, a page from a book or newspaper – once meant making a copy first and then faxing the copy. But, with the MFX-2000, just lift the cover and place your original on the glass, as on a regular copier. We also include a 50-page automatic document feeder for those times when flat is still OK.

It's legitimate to call just about any plain-paper fax machine a "fax/copier." But now, with the coming of the platen-top fax/copier, the "copier" side of that name gains an impressive new meaning. Now, it's easy to fax or copy something that doesn't fit into an automatic document feeder. Now, there's the Muratec MFX-2000.

*But the MFX-2000 is more than "just" a platen-top fax/copier. Boasting a huge expandable memory, 1.4-second quick scan, 15-ppm laser print engine, high-reliability digital copying with sorting, 50%-200% copy reduction, 9.6-second first-copy-out time, a 14.4 Kbps fax modem, 70 delayed fax commands, paper capacity up to 1,200 sheets, true 11" x 17" paper handling, 50-sheet document feeder and optional PC and LAN[†] printing, the Muratec MFX-2000 is an **outstanding** platen-top fax/copier.*

As great as it is right out of the box, the Muratec MFX-2000 can get even better. Because you can add higher-performance upgrades.

*The second-line option, which includes a second fax modem (and this one works at an even faster 33.6 Kbps), transforms your MFX-2000 into **two** faxes in one. Thus, your machine can actually conduct two communications at the same time, shattering your office's fax bottlenecks and boosting productivity.*

The MFX-2000's paper capacity easily grows from the standard 600 sheets to 900 or 1,200 sheets. Each 300-sheet cassette, standard or optional, holds letter-sized, legal-sized or 11" x 17" paper. Load different sizes and the MFX-2000 prints from the correct cassette automatically, based on the original.

You can upgrade the machine's memory from the standard 238-page capacity to a mammoth 558-page capacity. The more memory your MFX-2000 has, the more documents it can save for fast memory transmission, out-of-paper reception and more.

And the PC/LAN[†] printing option adds even more "multi" to this Muratec multifunctional machine. This includes a standard parallel port and Windows[®]-compatible GDI driver for easy setup.

The MFX-2000's standard printing paper capacity is 600 sheets – letter- or legal-sized, or even 11" x 17". Options let you boost capacity to 1,200 sheets and even add a space-saving stand.

A simple upgrade transforms your MFX-2000 into not only a great fax and copier but also a high-quality PC and LAN[†] printer for use with Microsoft[®] Windows[®].
