

Husqvarna®

Snow Throwers

Chain Drive

A great value for the demanding consumer, the chain drive systems uniquely transfer power to the drive shaft via high strength roller chain. The chain drive system can also accommodate unforgiving conditions such as ice and debris, making sure you get the job done.

Hydro Drive

Hydro drives are sealed, maintenance free, smooth, quiet and very durable.

SnowKing Engine Features

 **120V Electric Starter**
Designed for cold weather operation

 **Easy Starting**
Premium ignition wire and premium spark plug

 **Easy to Use Controls**
Conveniently designed controls for ease of use in winter conditions

 **Extreme Weather Engineering**
Protects controls from freezing by directing water run off

 **Fuel Cap Tether Cord**
Prevents fuel cap from getting lost or dropped

 **Heater Box**
Designed to ensure necessary running temperatures during cold weather

SNOW
KING[®]

 **High Mount Oil Fill**
User friendly oil filling and checking

 **Oversized Fuel Cap**
Ergonomically designed for ease of use, even with heavy winter gloves

 **Oversized Recoil Grip**
Oversized grip handle for easy use with gloves or mittens and overmolded with rubber grip for comfort

 **Safety Key Pull Switch**
Standard safety key switch allows for quick engine shutdown

 **Special Overfill Fuel Tank**
Fuel tank designed to have run off away from engine controls and away from operator

Easy Start Feature

Easy Starting Package

Easy as 1-2-3

1. Plug in
2. Push in Key
3. Push in Start Button

*All 2011 Husqvarna units feature electric start.

Husqvarna Single Stage

Husqvarna Dual Stage Track Drive

Specifications are subject to change.

2011 Performance Series

The Husqvarna Performance Series snow throwers were developed with homeowners in mind who live in areas with moderate to heavy annual snowfall accumulation. With a heavy-duty auger housing and an aggressively serrated auger, you are ready for any storm mother nature delivers. Premium engines, precision controls and features focused on comfortable operation eliminate concerns about adverse weather conditions. Levers on the control panel adjust the direction and pitch of the snow discharge chute.

2011 Crown and Trac Series

Husqvarna dual-stage snow throwers are innovative, powerful and include more standard features than comparably priced competitive units. Premium dual-stage units take it one step further with a heavy-duty auger, a high-speed impeller and a standard halogen headlight for greater visibility in less than favorable conditions. Powerful Briggs "Endurance" engines on both lines provide the performance necessary for deeper snow drifts and greater transport speeds.
