AG-HPG10

Portable Memory Card Recorder (P2 Gear)

DX **DVCPRO** **DVCPRO 50** **DVCPRO HD**

Fast P2 Viewing, Backup and File Management for Field Acquisition.

The new AG-HPG10 P2 Gear is a compact, lightweight, battery-operated player and recording unit that lets you monitor, record, relay, and transfer P2 files in either HD or SD format.

Images are easily viewed on its built-in 3.5" LCD monitor, or on a larger monitor by digital or analog output connection. IEEE 1394 input also lets the P2 Gear backup your camera-recorder. IEEE 1394 and USB 2.0 interfaces both include host and device modes for transferring files to an external hard disk or nonlinear editor.

The P2 Gear will fit easily into your P2 workflow to further boost mobility and speed, and will let you apply P2's substantial solid-state and workflow advantages.

Plug & Play Convenience Comes to P2 Viewing

- With its two P2 card slots and LCD monitor, you have super-quick access to thumbnail displays and viewing of camera-recorded content.
- HD/SD-SDI output and component/composite output enable external monitoring and microwave feeds.
- Down-conversion (squeeze/letterbox/side cut) allows HD content to be viewed on an SD monitor.
- Multi-format, multi-codec, 50/60-Hz operation supports the HD/SD playback and recording* of the AG-HVX200.

*No recording possible (playback only) in 720pN (native) mode.

Versatile Backup Recording, File Copying, and More

- Records IEEE 1394 input onto P2 cards for camera-recorder backup.
- Copies P2 files onto an external hard disk via IEEE 1394 or USB 2.0 (host) interface.
- Uploads or downloads files to or from a PC-based nonlinear editor just like the P2 Drive, using the IEEE 1394 or USB 2.0 (device) interface.
- Repeat playback enables easy sales promotion or demonstration use.

Compact, Lightweight, Battery-Operated Mobility

- At about 1.1 kg (approx. 2 lbs) for the main unit, the compact P2 Gear is easily carried with one hand.
- Battery-operation boosts convenience (with a 5400-mAh battery pack).
- AC power can be supplied via the AC adaptor (included).
- Highly reliable, durable memory card recording means no-moving-parts reliability, without the concerns of a tape mechanism.
