- Advanced Fades
- Instant Zoom

CC4352

Specifications

- **Dimensions:** 8 $\frac{1}{2}$ " H, 4 $\frac{3}{4}$ " W, 13 $\frac{1}{8}$ " D
- **Approx. Shipping Weight:** 8.5 Lbs.

Camera

- **AutoShot™**
RCA AutoShot Camcorders were specifically designed with ease of use in mind. Let the following RCA AutoShot features take the guesswork out of your video recordings.
 - Auto Focus — Provides fast and accurate automatic focusing from super-close-up to distant shots.
 - Auto Shutter Speed — Automatically selects the optimum shutter speed for the lighting condition.
 - Auto White Balance — Automatically adjusts for various lighting conditions to provide natural color representation.
 - Auto Iris — Allows the camcorder to automatically adjust the amount of light that is let in through the lens to compensate for extremes in lighting conditions.
- **3" LCD ColorView™ Screen**
The large, high-resolution 3" ColorView™ Screen provides for TV-like viewing while recording or during playback. The display screen rotates 270° which allows for self-recording with the camcorder lens and display screen both facing you.
- **72X Digital Zoom**
Zoom beyond the conventional 16X optical system to digitally double the zoom range to 72X. The one-button power zoom operation produces smooth, professional looking transitions from wide-angle scenes to close-up shots.
- **Program AE (Automatic Exposure)**
Automatically selects the shutter speed and adjusts the iris according to the shutter speed. The AE indicator for the shutter speed selected (between 1/60th and 1/4,000th of a second) appears in the viewfinder.
- **Macro Focus**
Allows close-up recording of images or small objects such as flowers or insects, or making title frames for videos.
- **Low Light Operation**
Don't let low light situations limit your recording. With light sensitivity of less than 1.0 Lux, the advanced image sensor can record viewable pictures in dimly lit conditions.

Video System

- **DSP3-Digital Signal Processing**
More accurate and consistent colors and improved picture clarity are the result of new integrated circuit technology. Reduces noise and increases resolution by digitally processing the camera signal.
- **Edit Search**
Provides the capability to precisely position the tape for the start of a new recording segment without having to switch out of the Record/Pause camera mode.

Special Features

- **Digital Special Effects**
Enhance your video using any of these digital effects: 16 x 9 Recording Mode, Half-Mirror, Mosaic, Negative/Positive, and 160X Zoom.
- **2-Line/1-Page Titler**
Two-line, one-page titler, with simple character generator, gives a professional touch to home videos. Information about the recorded subject can be recorded on the tape with neat, crisp letters and numbers.
- **Advanced Fades**
Choose from White, Black & White, Yellow, Blue, Green, Zoom, and Wipe Fades to add that professional touch to scene transitions between taped segments.
- **Instant Zoom**
With the press of a button, Instant Zoom electronically magnifies the scene 1.5:1 to quickly move closer to the action being recorded.
- **Time/Date/Auto Date Recording**
Date and time can be recorded on the tape so you will always remember when those special moments took place. Utilize the Auto Date feature if the time and date are only desired on the first few seconds of your recording.
- **Quick Connect Audio and Video Jacks**
Your camcorder is equipped with RCA-type jacks that allow for quick connection of RCA-type cables to the jacks on your VCR or TV for playback of your recordings.
- **Built-In Speaker**
Allows the user to listen to recorded audio during playback of taped material.

Accessories

- **1-Hour Rechargeable Battery**
- **AC Adapter/Charger**
- **DC Output Cable**
- **Shoulder Strap**

Plus

- **Limited Warranty**
See RCA dealer for complete details.
