Using the Favorite Channel Key

Your *One For All® Easy 4* is equipped with a favorite channel key (**FAV CH**). You can set up the **FAV CH** key with a list of up to 10 of your favorite channels for either your TV, VCR, Cable Box, Satellite or DSS. Please note, the **FAV CH** key can only be set up for one device key (**TV**, **VCR/LD** or **CBL/SAT**) at a time. You cannot set up a favorite channel list for another device key until you have cleared the **FAV CH** key of your original list.

1

Press the device key (**TV**, **VCR/LD**, or **CBL/SAT**) for the home entertainment component that will contain your favorite channel list.

2

Press and hold **SETUP** until *One For All® Easy 4's* red light blinks twice. Release **SETUP** and press **9-9-6**.

3

Enter the channel number of the first channel you would like to add to your favorite channel list. Then press **SETUP**.

- If you are entering a single digit channel number, you must press **0** first.
- If you are entering a channel that is three digits long, such as **103**, you do not have to press **SETUP** after you have entered the channel number.
- If your original remote control required you to use an ENTER key to change channels, press **ENTER** instead of **SETUP** after entering your channel number. For example, if you want to add TV channel "4" to your favorite channel list, you would: Press **TV**, then press and hold **SETUP** until the *One For All® Easy 4's* red light blinks twice, then release **SETUP** and press **9-9-6.** Press **0-4**, followed by **ENTER**. Then, add your second channel, followed by **ENTER**, and continue adding your favorite channels until you have added the 10 channels you desire in your favorite channel list.

Troubleshooting

Problem	Solution
Red light not blinking when you press a key?	Replace the batteries with four (4) new AAA alkaline batteries.
The red light blinks when you press a key but you receive no response from your home entertainment component ?	Make sure you are aiming your *One For All® Easy 4* at your home entertainment component and that you are within 15 feet of the component you are trying to operate before using your remote.
The *One For All® Easy 4* does not operate your home entertainment component or is not performing commands properly?	Try all the codes listed for your home entertainment component in the "Set-Up Codes" section. Many set-up codes may allow for partial functionality, however, only one set-up code will operate your home entertainment component properly. **Make sure that all of the components you are setting up are able to be operated with an infrared remote control.**
Problems programming a TV/VCR combo?	Use the VCR set-up codes for your brand. Some combo units may require both a TV code to control volume and a VCR code for full operation.
VCR not recording?	As a safety feature on the *One For All® Easy 4*, you must press the **REC** key twice.
No volume when in the Cable mode or when operating a second TV or TV/VCR combination?	Press and hold **SETUP** until the *One For All® Easy 4's* red light blinks twice. Release **SETUP** and enter **9-9-3** followed by **VOL +**.
Channel +/- and RECALL not working for your RCA TV?	Due to RCA design (1983-1987), only the original remote control will operate these functions. However, using the **FAV CH** key will allow you to run through a list of up to 10 of your favorite channels.
Problems changing channels?	If your original remote control required a **ENTER** keystroke when changing channels, press the **ENTER** key on the *One For All® Easy 4* after you enter the channel number.
Keypad scrambled?	Press and hold **SETUP** until the *One For All® Easy 4's* red light blinks twice. Release **SETUP** and enter **9-6-9**.
