LED indicators

The various colors that might display in the LED Indicator area are summarized here.

LED Status	Status
Solid green	Battery is fully charged
Solid red	Battery is charging or the phone is using ActiveSync to synchronize with a PC
Flashing blue	Bluetooth mode set to "On" or "Visible" mode
Flashing red	There are unread SMS or E-mail or missed calls

Step-by-step setup of phone

Install and Charge battery

The battery must be fully charged before you use your phone for the first time. The battery can be charged with the phone is turned on or turned off.

Open the cover and remove the battery

1. Hold the phone with one hand and the device facing down, use your thumb to press the back cover of the phone and slide it open towards the bottom of the phone.
2. Remove the battery by lifting it up from the bottom end as shown in the illustration.

Install the battery

1. Align the exposed metal contacts on the edge of the battery with the prongs in the body of the phone and gently push the bottom of the battery into place.
2. Slide the cover on the phone.

SIM and miniSD card

Insert the SIM card

1. Pull the SIM card tray out as shown in the illustration
2. Insert the SIM card onto the tray with its gold-plated contacts facing upwards. The cut-out edge of the SIM card should be placed to the top right of the SIM card tray.
3. Push the SIM card tray back into the device

Inserting a miniSD card

Use only mini Secure Digital (miniSD) cards in your SPL's memory card slot. You can install the storage card to store images, video clips, music and other data in your phone.

1. Follow the instructions on the previous page for removing the back cover and battery.
2. Slide the miniSD card into the holder, with the gold-plated contacts facing upwards and pushed in first.
3. Push the card down into the device. You will hear a 'click' sound when it is locked in place.

Switching your phone on and off

Turning on your phone

The power button location is indicated in page 4. Press and hold the power button for several seconds to switch on and off your phone.

Install ActiveSync

If you use Outlook on your desktop or notebook PC, you can synchronize E-mail, contacts, calendar, and other data between your phone and your PC, keeping information up to date in both devices.

Installing ActiveSync on your PC

1. Insert the Getting Started CD into the CD drive of your PC.
2. Follow the instructions on the installation wizard screen to install ActiveSync.
3. Connect the Sync cable to the phone and plug it into your PC's USB port to synchronize.
4. When PC detects a USB connection, ActiveSync Synchronization Setup Wizard will start. Follow the instructions on the screen and select items you wish to synchronize.

Make a phone call

1. **Ensuring SIM card is installed and the battery is fully charged.**
2. **Enter the phone number by dialing number on the keypad and press the TALK button (indicated in page 2).**

Ending a call

Press the END button to finish the call

Web browsing

Your i-mate™ SPL comes with Microsoft® Internet Explorer Mobile built in, so you can view Web and WAP pages while you are on the move.

To launch it, go to
Start > Internet Explorer

Alternatively, you can press the Explorer key on your keypad, indicated on page 4.

You can go straight to a Favorite stored on your device, go to Menu > Favorites and select a web site. Alternatively you can visit a site by going to Menu > Address Bar and entering the web address.

You must set your device up for data connections and this is explained fully in the 'Getting Connected' section of your user manual. You must also ensure that your cellular account is set up with a data plan. Contact your service provider to make sure this is already activated.

Camera and Video Recorder

Camera

Your Smartphone is equipped with a digital camera that can record both still pictures and moving images.

To capture a picture:

You may either press the Camera key (see page 2) or from the Home Screen go to Start > Camera.

In the middle of screen you will see the current image being seen by the camera. To capture the image, press the Left Soft Key labeled 'Capture' or press the Camera key on the side of the device. You will hear a shutter sound and the picture will be saved.

Capturing a video

You can start the Video Recorder function by going to Start > Camera and then press Menu > Mode > Video

Press the 'Capture' menu option to start recording. Press the 'Stop Capture' key to stop.

- The maximum length of video capture is determined by the amount of free memory of the device, or the storage card to which you are saving.

Pictures and videos

You can view pictures stored in your phone or storage card using the Pictures and Videos application.

From here you can also select a picture to set as wallpaper for your Home Screen or you may send the picture to others.

Previewing pictures

To start the program, go to Start > Pictures and Videos

After you enter Pictures and videos, it will show on screen the preview of all pictures stored on both your phone and memory card.

- Click on any picture to zoom in on one picture.
- On the preview screen, press navigation keys to preview previous/next picture in turn.

Securing your phone

There are 3 ways to secure your i-mate™ SPL and we recommend you activate these to protect your device:

SIM PIN

Just like a standard mobile phone, you can activate a Personal Identity Number for your SIM card. This number must be entered each time the telephone is switched on.

To Enable the SIM PIN

From the Home Screen, go to Start > Settings > Security > Enable SIM PIN

You will be asked to enter the current SIM PIN code. If you have never set the PIN code before, your SIM card will have a default setting and you can find this code from your Service Provider.

To Disable the SIM PIN

From the Home Screen, go to Start > Settings > Security > Enable SIM PIN
You will be asked to enter the current SIM PIN code. Your SIM card will have a default setting and you can find this from your Service Provider.

Device Lock

The device lock can be set to secure itself after a period of inactivity. After the device has been left idle for a period of time that you set, the device will prompt you to enter a password.

To Enable Device Lock

From the Home Screen, go to Start > Settings > Security > Device Lock
Enter the period of time after which the device will lock itself, and then choose which type of password to use:

- 'Simple PIN' allows the setting of a numeric code, such as '1234'
- 'Strong Alphanumeric' allows letters as well as numbers can be used.

To Disable

Go to Start > Settings > Security > Device Lock, enter your PIN and untick the box 'Prompt if device unused for'

Lock/Unlock keypad

You may lock the keypad to stop accidental pressing of the buttons. Press and hold the 'Home' key to lock. To unlock press the left soft key , followed by the '*' key.

Additional sources of information

Your user manual gives a detailed guide through the capabilities of your device.

The Getting Started CD that accompanies your device also holds useful information, including detailed step-by-step instructions on how to set up your SPL for specific tasks (for example, how to use the device as a dial-up modem for your PC)

You can get full support for your SPL from the club i-mate™ website. From there you can chat live to a support engineer, download the latest operating system upgrade for your device or read through the Frequently asked questions. You can also purchase extra games, productivity applications and utilities at a discounted rate.
